Background: As Europe's largest economy and second most populous nation (after Russia), Germany is a key member of the continent's economic, political, and defense organizations. European power struggles immersed Germany in two devastating World Wars in the first half of the 20th century and left the country occupied by the victorious Allied powers of the US, UK, France, and the Soviet Union in 1945. With the advent of the Cold War, two German states were formed in 1949: the western Federal Republic of Germany (FRG) and the eastern German Democratic Republic (GDR). The democratic FRG embedded itself in key Western economic and security organizations, the EC, which became the EU, and NATO, while the Communist GDR was on the front line of the Soviet-led Warsaw Pact. The decline of the USSR and the end of the Cold War allowed for German unification in 1990. Since then, Germany has expended considerable funds to bring Eastern productivity and wages up to Western standards. In January 1999, Germany and 10 other EU countries introduced a common European exchange currency, the euro. In January 2011, Germany assumed a nonpermanent seat on the UN Security Council for the 2011–12 term.

Flag description: three equal horizontal bands of black (top), red, and gold; these colors have played an important role in German history and can be traced back to the medieval banner of the Holy Roman Emperor—a black eagle with red claws and beak on a gold field

National symbol(s): black eagle

National anthem: *name:* "Lied der Deutschen" (Song of the Germans)

lyrics/music: August Heinrich HOFFMANN VON FALLERSLEBEN/Franz Joseph HAYDN

note: adopted 1922, restored 1990; the anthem, also known as "Deutschlandlied" (Song of Germany), was abolished in 1945 because of the Nazi's use of the first verse, specifically the phrase, "Deutschland, Deutschland ueber alles" (Germany, Germany above all) to promote nationalism; since restoration in 1990, only the third verse is sung

ECONOMY

Economy—overview: The German economy—the fifth largest economy in the world in PPP terms and Europe's largest—is a leading exporter of machinery, vehicles, chemicals, and household equipment and benefits from a highly skilled labor force. Like its Western European neighbors, Germany faces significant demographic challenges to sustained long-term growth. Low fertility rates and declining net immigration are increasing pressure on the country's social welfare system and necessitate structural reforms. Reforms launched by the government of Chancellor Gerhard SCHROEDER (1998–2005), deemed necessary to address chronically high unemployment and low average growth, contributed to strong growth in 2006 and 2007 and falling unemployment. These advances, as well as a government subsidized, reduced working hour scheme, help explain the relatively modest increase in unemployment during the 2008–09 recession—the deepest since World War II—and its decrease to 6.0% in 2011. GDP contracted 5.1% in 2009 but grew by 3.6% in 2010, and 2.7% in 2011. The recovery was attributable primarily to rebounding manufacturing orders and exports—increasingly outside the Euro Zone. Germany's central bank projects that GDP will grow 0.6% in 2012, a reflection of the worsening euro-zone financial crisis and the financial burden it places on Germany as well as falling demand for German exports. Domestic demand is therefore becoming a more significant driver of Germany's economic expansion. Stimulus and stabilization efforts initiated in 2008 and 2009 and tax cuts introduced in Chancellor Angela MERKEL's second term increased Germany's budget deficit to 3.3% in 2010, but slower spending and higher tax revenues reduce the deficit to 1.7% in 2011, below the EU's 3% limit. A constitutional amendment approved in 2009 limits the federal government to structural deficits of no more than 0.35% of GDP per annum as of 2016. Following the March 2011 Fukushima nuclear disaster, Chancellor Angela Merkel announced i

GHANA

INTRODUCTION

Background: Formed from the merger of the British colony of the Gold Coast and the Togoland trust territory, Ghana in 1957 became the first sub-Saharan country in colonial Africa to gain its independence. Ghana endured a long series of coups before Lt. Jerry RAWLINGS took power in 1981 and banned political parties. After approving a new constitution and restoring multiparty politics in 1992, RAWLINGS won presidential elections in 1992 and 1996 but was constitutionally prevented from running for a third term in 2000. John KUFUOR succeeded him and was reelected in 2004. John Atta MILLS took over as head of state in early 2009.

ECONOMY

Economy—overview: Ghana's economy
 has been strengthened by a quarter century
 of relatively sound management, a competi-
 tive business environment, and sustained
 reductions in poverty levels. Ghana is well
 endowed with natural resources and agri-
 culture accounts for roughly one-quarter
 of GDP and employs more than half of the
 workforce, mainly small landholders. The
 services sector accounts for 50% of GDP.
 Gold and cocoa production and individual
 remittances are major sources of foreign
 exchange. Oil production at Ghana's off-
 shore Jubilee field began in mid-December,
 2010, and is expected to boost economic
 growth. President MILLS faces challenges
 in managing new oil revenue while main-
 taining fiscal discipline and resisting debt
 accumulation. Estimated oil reserves have
 jumped to almost 700 million barrels. Ghana

signed a Millennium Challenge Corporation (MCC) Compact in 2006, which aims to assist in transforming Ghana's agricultural sector. Ghana opted for debt relief under the Heavily Indebted Poor Country (HIPC) program in 2002, and is also benefiting from the Multilateral Debt Relief Initiative that took effect in 2006. In 2009 Ghana signed a three-year Poverty Reduction and Growth Facility with the IMF to improve macroeconomic stability, private sector competitiveness, human resource development, and good governance and civic responsibility. Sound macro-economic management along with high prices for gold and cocoa helped sustain GDP growth in 2008–11.

TRANSNATIONAL ISSUES

Disputes—International: Ghana struggles to accommodate returning nationals who worked in the cocoa plantations and escaped fighting in Cote d'Ivoire

Refugees and internally displaced persons: refugees (country of origin): 35,653 (Liberia); 8,517 (Togo) (2007)

Illicit drugs: illicit producer of cannabis for the international drug trade; major transit hub for Southwest and Southeast Asian heroin and, to a lesser extent, South American cocaine destined for Europe and the US; widespread crime and money laundering problem, but the lack of a well developed financial infrastructure limits the country's utility as a money laundering center; significant domestic cocaine and cannabis use

GIBRALTAR

INTRODUCTION

Background: Strategically important, Gibraltar was reluctantly ceded to Great Britain by Spain in the 1713 Treaty of Utrecht; the British garrison was formally declared a colony in 1830. In a referendum held in 1967, Gibraltarians voted overwhelmingly to remain a British dependency. The subsequent granting of autonomy in 1969 by the UK led to Spain closing the border and severing all communication links. Between 1997 and 2002, the UK and Spain held a series of talks on establishing temporary joint sovereignty over Gibraltar. In response to these talks, the Gibraltar Government called a referendum in late

2002 in which the majority of citizens voted overwhelmingly against any sharing of sovereignty with Spain. Since late 2004, Spain, the UK, and Gibraltar have held tripartite talks with the aim of cooperatively resolving problems that affect the local population, and work continues on cooperation agreements in areas such as taxation and financial services; communications and maritime security; policy, legal and customs services; environmental protection; and education and visa services. Throughout 2009, a dispute over Gibraltar's claim to territorial waters extending out three miles gave rise to periodic non-violent maritime confrontations between Spanish and UK naval patrols. A new noncolonial constitution came into effect in 2007, and the European Court of First Instance recognized Gibraltar's right to regulate its own tax regime in December 2008. The UK retains responsibility for defense, foreign relations, internal security, and financial stability.

ECONOMY

Economy—overview: Self-sufficient Gibraltar benefits from an extensive shipping trade, offshore banking, and its position as an international conference center. Tax rates are low to attract foreign investment. The British military presence has been sharply reduced and now contributes about 7% to the local economy, compared with 60% in 1984. The financial sector, tourism (almost 5 million visitors in 1998), gaming revenues, shipping services fees, and duties on consumer goods also generate revenue. The financial sector, tourism, and the shipping sector contribute 30%, 30%, and 25%, respectively, of GDP. Telecommunications, e-commerce, and e-gaming account for the remaining 15%. In recent years, Gibraltar has seen major structural change from a public to a private sector economy, but changes in government spending still have a major impact on the level of employment.

GREECE

INTRODUCTION

Background: Greece achieved independence from the Ottoman Empire in 1830. During the second half of the 19th century and the first half of the 20th century, it gradually added neighboring islands and territories, most with Greek-speaking populations. In World War II, Greece was first invaded by Italy (1940) and subsequently occupied

by Germany (1941–44); fighting endured in a protracted civil war between supporters of the king and other anti-Communists and Communist rebels. Following the latter's defeat in 1949, Greece joined NATO in 1952. In 1967, a group of military officers seized power, establishing a military dictatorship that suspended many political liberties and forced the king to flee the country. In 1974, democratic elections and a referendum

created a parliamentary republic and abolished the monarchy. In 1981, Greece joined the EC (now the EU); it became the 12th member of the European Economic and Monetary Union in 2001. In 2010, the prospect of a Greek default on its euro-denominated debt created severe strains within the EMU and raised the question of whether a member country might voluntarily leave the common currency or be removed.

Flag description: nine equal horizontal stripes of blue alternating with white; a blue square bearing a white cross appears in the upper hoist-side corner; the cross sym-

bolizes Greek Orthodoxy, the established religion of the country; there is no agreed upon meaning for the nine stripes or for the colors; the exact shade of blue has never been set by law and has varied from a light to a dark blue over time

National symbol(s): Greek cross (white cross on blue field; arms equal length)

National anthem: *name*: "Ymnos eis tin Eleftherian" (Hymn to Liberty)

lyrics/music: Dionysios SOLOMOS/Nikolaos MANTZAROS

note: adopted 1864; the anthem is based on a 158 verse poem by the same name, which was inspired by the Greek Revolution of 1821 against the Ottomans; Cyprus also uses "Hymn to Liberty" as its anthem

ECONOMY

Economy—overview: Greece has a capitalist economy with a public sector accounting for about 40% of GDP and with per capita GDP about two-thirds that of the leading euro-zone economies. Tourism provides 15% of GDP. Immigrants make up nearly one-fifth of the work force, mainly in agricultural and unskilled jobs. Greece is a major beneficiary of EU aid, equal to about 3.3% of annual GDP. The Greek economy grew by nearly 4% per year between 2003 and 2007, due partly to infrastructural spending related to the 2004 Athens Olympic Games, and in part to an increased availability of credit, which has sustained record levels of consumer spending. But the economy went into recession in 2009 as a result of the world financial crisis, tightening credit conditions, and Athens' failure to address a growing budget deficit. The economy contracted by 2.3% in 2009, 3.5% in 2010, and 6.0% in 2011. Greece violated the EU's Growth and Stability Pact budget deficit criterion of no more than 3% of GDP from 2001 to 2006, but finally met that criterion in 2007–08, before exceeding it again in 2009, with the deficit reaching 15% of GDP. Austerity measures reduced the deficit to 11% of GDP in 2010 and about 9% in 2011. Eroding public finances, inaccurate and misreported statistics, and consistent underperformance on reforms prompted major credit rating agencies in late 2009 to downgrade Greece's international debt rating, and has led the country into a financial crisis. Under intense pressure from the EU and international market participants, the government adopted a medium-term austerity program that includes cutting government spending, decreasing tax evasion, reworking the health-care and pension systems, and reforming the labor and product markets. Athens, however, faces long-term challenges to push through unpopular reforms in the face of widespread unrest from the country's powerful labor unions and the general public. In April 2010 a leading credit agency assigned Greek debt its lowest possible credit rating; in May 2010, the International Monetary Fund and Eurozone governments provided Greece emergency short- and medium-term loans worth \$147 billion so that the country

could make debt repayments to creditors. In exchange for the largest bailout ever assembled, the government announced combined spending cuts and tax increases totaling \$40 billion over three years, on top of the tough austerity measures already taken. Greece, however, struggled to meet 2010 targets set by the EU and the IMF, especially after Eurostat—the EU's statistical office—revised upward Greece's deficit and debt numbers for 2009 and 2010. European leaders and the IMF agreed in October 2011 to provide Athens a second bailout package of \$169 billion. The second deal however, calls for Greece's creditors to write down a significant portion of their Greek government bond holdings. In exchange for the second loan Greece has promised to introduce an additional \$7.8 billion in austerity measures during 2013–15. However, these massive austerity cuts are lengthening Greece's economic recession and depressing tax revenues. Greece's lenders are calling on Athens to step up efforts to increase tax collection, privatize public enterprises, and rein in health spending, and are planning to give Greece more time to shore up its economy and finances. Many investors doubt that Greece can sustain fiscal efforts in the face of a bleak economic outlook, public discontent, and political instability.

GREENLAND

INTRODUCTION

Background: Greenland, the world's largest island, is about 81% ice capped. Vikings reached the island in the 10th century from Iceland; Danish colonization began in the 18th century, and Greenland was made an integral part of Denmark in 1953. It joined the European Community (now the EU) with Denmark in 1973 but withdrew in 1985 over a dispute centered on stringent fishing quotas. Greenland

was granted self-government in 1979 by the Danish parliament; the law went into effect the following year. Greenland voted in favor of increased self-rule in November 2008 and acquired greater responsibility for internal affairs when the Act on Greenland Self Government was signed into law in June 2009. Denmark, however, continues to exercise control of Greenland's foreign affairs, security, and financial policy in consultation with Greenland's Home Rule Government.

GEOGRAPHY

Flag description: two equal horizontal bands of white (top) and red with a large disk slightly to the hoist side of center—the top half of the disk is red, the bottom half is white; the design represents the sun reflecting off a field of ice; the colors are the same as those of the Danish flag and symbolize Greenland's links to the Kingdom of Denmark

National symbol(s): polar bear

National anthem: *name:* "Nunarput utoqqarsuanngoravit" ("Our Country, Who's Become So Old" also translated as "You Our Ancient Land")

lyrics/music: Henrik LUND/Jonathan PETERSEN

note: adopted 1916; the government also recognizes "Nuna asiilasooq" as a secondary anthem

ECONOMY

Economy—overview: The economy remains critically dependent on exports of shrimp and fish, income from resource exploration and extraction, and on a substantial subsidy from the Danish Government. The subsidy is budgeted to be about \$650 million in 2012, approximately 56% of government revenues in 2012 for the year. The public sector, including publicly owned enterprises and the municipalities, plays the dominant role in Greenland's economy. Greenland's real GDP contracted about 1% in 2009 as a result of the global economic slowdown, but is estimated to have grown 2% in 2010 and 3% in 2011. The relative ease with which Greenland has weathered the economic crisis is due to increased hydrocarbon and

mineral exploration and extraction activities, a high level of construction activity in the Nuuk area and the increasing price of fish and shrimp. During the last decade the Greenland Home Rule Government (GHRG) pursued conservative fiscal and monetary policies, but public pressure has increased for better schools, health care and retirement systems. The Greenlandic economy has benefited from increasing catches and exports of shrimp, Greenland halibut and, more recently, crabs. Due to Greenland's continued dependence on exports of fish—which accounted for 89% of exports in 2010—the economy remains very sensitive to foreign developments. International consortia are increasingly active in exploring for hydrocarbon resources off Greenland's western coast, and international studies indicate the potential for oil and gas fields in northern and northeastern Greenland. In May 2007 a US aluminum producer concluded a memorandum of understanding with the Greenland Home Rule Government to build an aluminum smelter and a power generation facility, which takes advantage of Greenland's abundant hydropower potential. Within the area of mining, olivine sand continues to be produced and gold production has resumed in south Greenland. Tourism also offers another avenue of economic growth for Greenland

GRENADA

INTRODUCTION

Background: Carib Indians inhabited Grenada when Christopher COLUMBUS discovered the island in 1498, but it remained uncolonized for more than a century. The French settled Grenada in the 17th century, established sugar estates, and imported large numbers of African slaves. Britain took the island in 1762 and vigorously expanded sugar production. In the 19th century, cacao eventually surpassed sugar as the main export crop; in the 20th century, nutmeg became the leading export. In 1967, Britain gave Grenada autonomy over its internal affairs. Full independence was attained in 1974 making Grenada one

of the smallest independent countries in the Western Hemisphere. Grenada was seized by a Marxist military council on 19 October 1983. Six days later the island was invaded by US forces and those of six other Caribbean nations, which quickly captured the ringleaders and their hundreds of Cuban advisers. Free elections were reinstituted the following year and have continued since that time. Hurricane Ivan struck Grenada in September of 2004 causing severe damage.

ECONOMY

Economy—overview: Grenada relies on tourism as its main source of foreign exchange especially since the construction of an international airport in 1985. Hurricanes Ivan (2004) and Emily (2005) severely damaged the agricultural sector—particularly nutmeg and cocoa cultivation—which had been a key driver of economic growth. Grenada has rebounded from the devastating effects of the hurricanes but is now saddled with the debt burden from the rebuilding process. Public debt-to-GDP is nearly 110%, leaving the THOMAS administration limited room to engage in public investments and social spending. Strong performances in construction and manufacturing, together with the development of tourism and an offshore financial

industry, have also contributed to growth in national output; however, economic growth remained stagnant in 2010–11 after a sizeable contraction in 2009, because of the global economic slowdown's effects on tourism and remittances.

GUATEMALA

INTRODUCTION

Background: The Mayan civilization flourished in Guatemala and surrounding regions during the first millennium A.D. After almost three centuries as a Spanish colony, Guatemala won its independence in 1821. During the second half of the 20th century, it experienced a variety of military and civilian governments, as well as a 36-year guerrilla war. In 1996, the government signed a peace agreement formally ending the conflict, which had left more than 200,000 people dead and had created, by some estimates, some 1 million refugees. In January 2012, Guatemala assumed a nonpermanent seat on the UN Security Council for the 2012–13 term.

GEOGRAPHY

Location: Central America, bordering the North Pacific Ocean, between El Salvador and Mexico, and bordering the Gulf of Honduras (Caribbean Sea) between Honduras and Belize

Geographic coordinates: 15 30 N, 90 15 W

ECONOMY

Economy—overview: Guatemala is the most populous country in Central America with a GDP per capita roughly one-half that of the average for Latin America and the Caribbean. The agricultural sector accounts for 13% of GDP and 38% of the labor force; key agricultural exports include coffee, sugar, bananas, and vegetables. The 1996 peace accords, which ended 36 years of civil war, removed a major obstacle to foreign investment, and since then Guatemala has pursued important reforms and macroeconomic stabilization. The Dominican Republic-Central American Free Trade Agreement (CAFTA-DR) entered into force in July 2006 spurring increased investment and diversification of exports, with the largest increases in ethanol and non-traditional agricultural exports. While CAFTA-DR has helped improve the investment climate, concerns over security, the lack of skilled workers and poor infrastructure continue to hamper foreign direct investment. The distribution of income remains highly unequal with the richest 20% of the population accounting for more than 51% of Guatemala's overall consumption. More than half of the population is below the national poverty line and 13% of the population lives in extreme poverty. Poverty among indigenous groups, which make up 38% of the population, averages 73% and extreme poverty rises to 28%. Nearly one-half of Guatemala's children under age five are chronically malnourished, one of the highest malnutrition rates in the world. Given Guatemala's large expatriate community in the United States, it is the top remittance recipient in Central America, with inflows serving as a primary source of foreign income equivalent to nearly two-fifths of exports or one-tenth of GDP. Economic growth fell in 2009 as export demand from US and other Central American markets dropped and foreign investment slowed amid the global recession, but the economy recovered gradually in 2010–11 and will likely return to more normal growth rates in 2012.

TRANSNATIONAL ISSUES

Disputes—International: annual ministerial meetings under the Organization of American States-initiated Agreement on the Framework for Negotiations and Confidence Building Measures continue to address Guatemalan land and maritime claims in Belize and the Caribbean Sea; Guatemala persists in its territorial claim to half of Belize, but agrees to Line of Adjacency to keep Guatemalan squatters out of Belize's forested interior; Mexico must deal with thousands of impoverished Guatemalans and other Central Americans who cross the porous border looking for work in Mexico and the United States

Refugees and internally displaced persons: IDPs: undetermined (the UN does not estimate there are any IDPs, although some NGOs estimate over 200,000 IDPs as a result of over three decades of internal conflict that ended in 1996) (2007)

Illicit drugs: major transit country for cocaine and heroin; in 2005, cultivated 100 hectares of opium poppy after reemerging as a potential source of opium in 2004; potential production of less than 1 metric ton of pure heroin; marijuana cultivation for mostly domestic consumption; proximity to Mexico makes Guatemala a major staging area for drugs (particularly for cocaine); money laundering is a serious problem; corruption is a major problem

GUAYANA

INTRODUCTION

Background: Originally a Dutch colony in the 17th century, by 1815 Guyana had become a British possession. The abolition of slavery led to black settlement of urban areas and the importation of indentured servants from India to work the sugar plantations. This ethnocultural divide has persisted and has led to turbulent politics. Guyana achieved independence from the UK in 1966, and since then it has been ruled mostly by socialist-oriented governments. In 1992, Cheddi JAGAN was elected president in what is considered the

country's first free and fair election since independence. After his death five years later, his wife, Janet JAGAN, became president but resigned in 1999 due to poor health. Her successor, Bharrat JAGDEO, was reelected in 2001 and again in 2006. Donald RAMOTAR was elected president in 2011.

ECONOMY

Economy—overview: The Guyanese economy exhibited moderate economic growth in recent years and is based largely on agriculture and extractive industries. The economy is heavily dependent upon the export of six commodities—sugar, gold, bauxite, shrimp, timber, and rice—which represent nearly 60% of the country's GDP and are highly susceptible to adverse weather conditions and fluctuations in commodity prices. Guyana's entrance into the Caricom Single Market and Economy (CSME) in January 2006 has broadened the country's export market, primarily in the raw materials sector. Guyana has experienced positive growth almost every year over the past decade. Inflation has been kept under control. Recent years have seen the Government's stock of debt reduced significantly—with external debt now less than half of what it was in the early 1990s. Chronic problems include a shortage of skilled labor and a deficient infrastructure. Despite recent improvements, the government is still juggling a sizable external debt against the urgent need for expanded public investment. In March 2007, the Inter-American Development Bank, Guyana's principal donor, canceled Guyana's nearly \$470 million debt, equivalent to 21% of GDP, which along with other Highly Indebted Poor Country (HIPC) debt forgiveness brought the debt-to-GDP ratio down from 183% in 2006 to 120% in 2007. Guyana became heavily indebted as a result of the inward-looking, state-led development model pursued in the 1970s and 1980s. Growth slowed in 2009 as a result of the world recession, but picked up in 2010–11. The slowdown in the domestic

economy and lower import costs helped to narrow the country's current account deficit, despite generally lower earnings from exports.

TRANSNATIONAL ISSUES

Disputes—international: all of the area west of the Essequibo River is claimed by Venezuela preventing any discussion of a maritime boundary; Guyana has expressed its intention to join Barbados in asserting claims before UN Convention on the Law of the Sea (UNCLOS) that Trinidad and Tobago's maritime boundary with Venezuela extends into their waters; Suriname claims a triangle of land between the New and Kutari/Koetari rivers in a historic dispute over the headwaters of the Courantyne; Guyana seeks arbitration under provisions of the UNCLOS to resolve the long-standing dispute with Suriname over the axis of the territorial sea boundary in potentially oil-rich waters

Illicit drugs: transshipment point for narcotics from South America—primarily Venezuela—to Europe and the US; producer of cannabis; rising money laundering related to drug trafficking and human smuggling

GUERNSEY

INTRODUCTION

Background: Guernsey and the other Channel Islands represent the last remnants of the medieval Dukedom of Normandy, which held sway in both France and England. The islands were the only British soil occupied by German troops in World War II. Guernsey is a British crown dependency but is not part of the UK or of the European Union. However, the UK Government is constitutionally responsible for its defense and international representation.

ECONOMY

Economy—overview: Financial services—banking, fund management, insurance—account for about 23% of employment and about 55% of total income in this tiny, prosperous Channel Island economy. Tourism, manufacturing, and horticulture, mainly tomatoes and cut flowers, have been declining. Financial services, construction, retail, and the public sector have been growing. Light tax and death duties make Guernsey a popular tax haven. The evolving economic integration of the EU nations is changing the environment under which Guernsey operates.

GUINEA

INTRODUCTION

Background: Guinea has had a history of authoritarian rule since gaining its independence from France in 1958. Lansana CONTE came to power in 1984 when the military seized the government after the death of the first president, Sekou TOURE. Guinea did not hold democratic elections until 1993 when Gen. CONTE (head of the military government) was elected

president of the civilian government. He was reelected in 1998 and again in 2003, though all the polls were marred by irregularities. History repeated itself in December 2008 when following President CONTE's death, Capt. Moussa Dadis CAMARA led a military coup, seizing power and suspending the constitution. His unwillingness to yield to domestic and international pressure to step down led to heightened political tensions that culminated in September

2009 when presidential guards opened fire on an opposition rally killing more than 150 people, and in early December 2009 when CAMARA was wounded in an assassination attempt and evacuated to Morocco and subsequently to Burkina Faso. A transitional government led by General Sekouba KONATE held democratic elections in 2010 and Alpha CONDE was elected president in the country's first free and fair elections since independence.

ECONOMY

Economy—overview: Guinea is a poor country that possesses major mineral, hydropower, and agricultural resources. The country has almost half of the world's bauxite reserves and significant iron ore, gold, and diamond reserves. However, Guinea has been unable to profit from this potential, as rampant corruption, dilapidated infrastructure, and political uncertainty have drained investor confidence. In the time since a 2008 coup following the death of long-term President Lansana CONTE, international donors, including the G-8, the IMF, and the World Bank, have significantly curtailed their development programs. Throughout 2009, policies of the ruling military junta severely weakened the economy. The junta leaders spent and printed money at an accelerating rate, driving inflation and debt to perilously high levels. In early 2010, the junta collapsed and was replaced by a Transition Government, which ceded power in December 2010 to the country's first-ever democratically elected president, Alpha CONDE. International assistance and investment are expected to return to Guinea, but the levels will depend upon the ability of the new government to combat corruption, reform its banking system, improve its business environment, and build infrastructure. IMF and World Bank programs will be especially critical as Guinea attempts to gain debt relief. International investors have expressed keen interest in Guinea's vast iron ore reserves, which could further propel the country's growth. The government put forward a new mining code in September 2011 that includes provisions to combat corruption, protect the environment, and review all existing mining contracts.

TRANSNATIONAL ISSUES

Disputes—International: conflicts among rebel groups, warlords, and youth gangs in neighboring states have spilled over into Guinea resulting in domestic instability; Sierra Leone considers Guinea's definition of the flood plain limits to define the left bank boundary of the Makona and Moa rivers excessive and protests Guinea's continued occupation of these lands, including the hamlet of Yenga, occupied since 1998

Refugees and internally displaced persons: *refugees (country of origin):* 21,856 (Liberia); 5,259 (Sierra Leone); 3,900 (Cote d'Ivoire)

IDPs: 19,000 (cross-border incursions from Cote d'Ivoire, Liberia, Sierra Leone) (2007)

Trafficking in persons: *current situation:* Guinea is a source, transit, and destination country for men, women, and children trafficked for the purposes of forced labor and sexual exploitation; the majority of victims are children, and internal trafficking is more prevalent than transnational trafficking; within the country, girls are trafficked primarily for domestic servitude and sexual exploitation, while boys are trafficked for forced agricultural labor, and as forced beggars, street vendors, shoe shiners, and laborers in gold and diamond mines; some Guinean men are also trafficked for agricultural labor within Guinea; transnationally, girls are trafficked into Guinea for domestic servitude, forced labor, and likely also for sexual exploitation

tier rating: Tier 2 Watch List—Guinea is on the Tier 2 Watch List for its failure to provide evidence of increased efforts to eliminate trafficking; although the government

acknowledges that trafficking in persons is a problem in Guinea, it is unclear if the new government, which took power in December 2010, will demonstrate an increase over the previous regime's minimal efforts to combat trafficking; the government failed

to investigate and prosecute trafficking offenses; no new prosecutions or convictions were reported; 12 cases from the previous reporting period remain pending in the courts, and 18 additional cases have disappeared from the court system; no pro-

tection to trafficking victims was provided, and although the government conducted an anti-trafficking awareness campaign on radio and television, overall prevention efforts remain weak (2008)

GUINEA-BISSAU

INTRODUCTION

Background: Since independence from Portugal in 1974, Guinea-Bissau has experienced considerable political and military upheaval. In 1980, a military coup established authoritarian dictator Joao Bernardo 'Nino' VIEIRA as president. Despite setting a path to a market economy and multiparty system, VIEIRA's regime was characterized by the suppression of political opposition and the purging of political rivals. Several coup attempts through the 1980s and early 1990s failed to unseat him. In 1994 VIEIRA was elected president in the country's first free elections. A military mutiny and resulting civil war in 1998 eventually led to VIEIRA's ouster in May 1999. In February 2000, a transitional government turned over power to opposition leader Kumba YALA after he was elected president in transparent polling. In September 2003, after only three years in office, YALA was ousted by the military in a bloodless coup, and businessman Henrique ROSA was sworn in as interim president. In 2005, former President VIEIRA was re-elected president pledging to pursue economic development and national reconciliation; he was assassinated in March 2009. Malam Bacai SANHA was elected in an emergency election held in June 2009, but he passed away abruptly in January 2012. A military coup on 12 April 2012 prevented Guinea-Bissau's second-round presidential election—to determine SANHA's successor—from taking place.

ECONOMY

Economy—overview: One of the poorest countries in the world, Guinea-Bissau's legal economy depends mainly on farming and fishing, but trafficking in narcotics

is probably the most lucrative trade. The combination of limited economic prospects, a weak and faction-ridden government, and favorable geography have made this West African country a way station for drugs bound for Europe. Cashew crops have increased remarkably in recent years; low rainfall hindered cereals and other crops in 2011. Guinea-Bissau exports fish and seafood along with small amounts of peanuts, palm kernels, and timber. Rice is the major crop and staple food. However, intermittent fighting between Senegalese-backed government troops and a military junta destroyed much of the country's infrastructure and caused widespread damage to the economy in 1998; the civil war led to a 28% drop in GDP that year, with partial recovery in 1999–2002. In December 2003, the World Bank, IMF, and UNDP were forced to step in to provide emergency budgetary support in the amount of \$107 million for 2004, representing over 80% of the total national budget. The government is successfully implementing a three-year \$33 million extended credit arrangement with the IMF that runs through 2012. In December 2010 the World Bank and IMF announced support for \$1.2 billion worth of debt relief. Guinea-Bissau made progress with debt relief in 2011 when members of the Paris Club agreed to write-off much of the country's obligations.

TRANSNATIONAL ISSUES

Disputes—International: in 2006, political instability within Senegal's Casamance region resulted in thousands of Senegalese refugees, cross-border raids, and arms smuggling into Guinea-Bissau

Refugees and internally displaced persons: *refugees (country of origin):* 7,454 (Senegal) (2007)

Trafficking in persons: *current situation:* Guinea-Bissau is a country of origin for children subjected to forced labor and sex trafficking; the scope of the problem

of trafficking women or men for forced labor or forced prostitution is unknown; boys reportedly were transported to southern Senegal for forced manual and agricultural labor; girls may be subjected to forced domestic service and child prostitution in Senegal

tier rating: Tier 3—Guinea-Bissau is not making significant efforts to comply with the minimum standards for the elimination of trafficking; the government acknowledged that human trafficking is a problem in the country and took steps to enact legislation outlawing all forms of trafficking; Guinea-Bissau did not increase efforts to prosecute and punish trafficking offenders; the government did not take steps to proactively identify victims and lacked resources to provide victim services directly, but provided some resources to NGOs that care for victims (2008)

Illicit drugs: increasingly important transit country for South American cocaine en route to Europe; enabling environment for trafficker operations thanks to pervasive corruption; archipelago-like geography around the capital facilitates drug smuggling

INTRODUCTION

Background: The native Taino Amerindians—who inhabited the island of Hispaniola when it was discovered by Christopher COLUMBUS in 1492—were virtually annihilated by Spanish settlers within 25 years. In the early 17th century, the French established a presence on Hispaniola. In 1697, Spain ceded to the French the western third of the island, which later became Haiti. The French colony, based on forestry and sugar-related industries, became one of the wealthiest in the Caribbean but only through the heavy importation of African slaves and considerable environmental degradation. In the late 18th century, Haiti's nearly half million slaves revolted under Toussaint L'OUVERTURE. After a prolonged struggle, Haiti became the first black republic to declare independence in 1804. The poorest country in the Western Hemisphere, Haiti has been plagued by political violence for most of its history. After an armed rebellion led to the forced resignation and exile of President Jean-Bertrand ARISTIDE in February 2004, an interim government took office to organize new elections under the auspices of the United Nations. Continued violence and technical delays prompted repeated postponements, but Haiti finally did inaugurate a democratically elected president and parliament in May of 2006. A massive magnitude 7.0 earthquake struck Haiti in January 2010 with an epicenter about 25 km (15 mi) west of the capital, Port-au-Prince. Over 300,000 people were killed and some 1 million left homeless. The earthquake was assessed as the worst in this region over the last 200 years.

ECONOMY

Economy—overview: Haiti is a free market economy that enjoys the advantages of low labor costs and tariff-free access to the US for many of its exports. Poverty, corruption, and poor access to education for much of the population are among Haiti's most serious disadvantages. Haiti's economy suffered a severe setback in January 2010 when a 7.0 magnitude earthquake destroyed much of its capital city, Port-au-Prince, and neighboring areas. Already the poorest country in the Western Hemisphere with 80% of the population living under the poverty line and 54% in abject poverty, the earthquake inflicted \$7.8 billion in damage and caused the country's GDP to contract 5.4% in 2010. Following the earthquake, Haiti received \$4.59 billion in international pledges for reconstruction, which has proceeded slowly. Two-fifths of all Haitians depend on the agricultural sector, mainly small-scale subsistence farming, and remain vulnerable to damage from

frequent natural disasters, exacerbated by the country's widespread deforestation. US economic engagement under the Haitian Hemispheric Opportunity through Partnership Encouragement (HOPE) Act, passed in December 2006, has boosted apparel exports and investment by providing duty-free access to the US. Congress voted in 2010 to extend the legislation until 2020 under the Haitian Economic Lift Act (HELP); the apparel sector accounts for about 90% of Haitian exports and nearly one-tenth of GDP. Remittances are the primary source of foreign exchange, equaling nearly 20% of GDP and more than twice the earnings from exports. Haiti suffers from a lack of investment, partly because of limited infrastructure and a lack of security. In 2005, Haiti paid its arrears to the World Bank, paving the way for reengagement with the Bank. Haiti received debt forgiveness for over \$1 billion through the Highly-Indebted Poor Country initiative in mid-2009. The remainder of its outstanding external debt was cancelled by donor countries following the 2010 earthquake but has since risen to over \$600 million. The government relies on formal international economic assistance for fiscal sustainability, with over half of its annual budget coming from outside sources. The MARTELLY administration in 2011 launched a campaign aimed at drawing foreign investment into Haiti as a means for sustainable development.

TRANSNATIONAL ISSUES

Disputes—International: since 2004, about 8,000 peacekeepers from the UN Stabilization Mission in Haiti maintain civil order in Haiti; despite efforts to control illegal migration, Haitians cross into the Dominican Republic and sail to neighboring countries; Haiti claims US-administered Navassa Island

Illicit drugs: Caribbean transshipment point for cocaine en route to the US and Europe; substantial bulk cash smuggling activity; Colombian narcotics traffickers favor Haiti for illicit financial transactions; pervasive corruption; significant consumer of cannabis

HEARD ISLAND AND MCDONALD ISLANDS

INTRODUCTION

Background: These uninhabited, barren, sub-Antarctic islands were transferred from the UK to Australia in 1947. Populated by large numbers of seal and bird species, the islands have been designated a nature preserve.

HOLY SEE (VATICAN CITY)

INTRODUCTION

Background: Popes in their secular role ruled portions of the Italian peninsula for more than a thousand years until the mid 19th century, when many of the Papal States were seized by the newly united Kingdom of Italy. In 1870, the pope's holdings were further circumscribed when Rome itself was annexed. Disputes between a series of "prisoner" popes and Italy were resolved in 1929 by three Lateran Treaties, which established the independent state of Vatican City and granted Roman Catholicism special status in Italy. In 1984, a concordat between the Holy See and Italy modified certain of the earlier treaty provisions, including the primacy of Roman Catholicism as the Italian state religion. Present concerns of the Holy See include religious freedom, international development, the environment, the Middle East, China,

the decline of religion in Europe, terrorism, interreligious dialogue and reconciliation, and the application of church doctrine in an era of rapid change and globalization. About 1 billion people worldwide profess the Catholic faith.

ECONOMY

Economy—overview: The Holy See is supported financially by a variety of sources, including investments, real estate income, and donations from Catholic individuals, dioceses, and institutions; these help fund the Roman Curia (Vatican bureaucracy), diplomatic missions, and media outlets. The separate Vatican City State budget includes the Vatican museums and post office and is supported financially by the sale of stamps, coins, medals, and tourist mementos; by fees for admission to museums; and by publications sales. Moreover, an annual collection taken up in dioceses and direct donations go to a non-budgetary fund known as Peter's Pence, which is used directly by the Pope for charity, disaster relief, and aid to churches in developing nations. The incomes and living standards of lay workers

are comparable to those of counterparts who work in the city of Rome.

HONDURAS

INTRODUCTION

Background: Once part of Spain's vast empire in the New World, Honduras became an independent nation in 1821. After two and a half decades of mostly military rule, a freely elected civilian government came to power in 1982. During the 1980s, Honduras proved a haven for anti-Sandinista contras fighting the Marxist Nicaraguan Government and an ally to Salvadoran Government forces fighting leftist guerrillas. The country was devastated by Hurricane Mitch in 1998, which killed about 5,600 people and caused approximately \$2 billion in damage. Since then, the economy has slowly rebounded.

Flag description: three equal horizontal bands of blue (top), white, and blue, with five blue, five-pointed stars arranged in an X pattern centered in the white band; the stars represent the members of the former Federal Republic of Central America—Costa Rica, El Salvador, Guatemala, Honduras, and Nicaragua; the blue bands symbolize the Pacific Ocean and the Caribbean Sea; the white band represents the land between the two bodies of water and the peace and prosperity of its people *note:* similar to the flag of El Salvador, which features a round emblem encircled by the words REPUBLICA DE EL SALVADOR EN LA AMERICA CENTRAL centered in the white band; also similar to the flag of Nicaragua, which features a triangle encircled by the words REPUBLICA DE NICARAGUA on top and AMERICA CENTRAL on the bottom, centered in the white band

National symbol(s): scarlet macaw; white-tailed deer

National anthem: *name:* “Himno Nacional de Honduras” (National Anthem of Honduras)

lyrics/music: Augusto Constanancio COELLO/Carlos HARTLING

note: adopted 1915; the anthem’s seven verses chronicle Honduran history; on official occasions, only the chorus and last verse are sung

ECONOMY

Economy—overview: Honduras, the second poorest country in Central America, suffers from extraordinarily unequal distribution of income, as well as high underemployment. While historically dependent on the export of bananas and coffee, Honduras has diversified its export base to include apparel and automobile wire harnessing. Nearly half of Honduras’s economic activity is directly tied to the US, with exports to the US accounting for 30% of GDP and remittances for another 20%. The US-Central America Free Trade Agreement (CAFTA) came into force in 2006 and has helped foster foreign direct investment, but physical and political insecurity, as well as crime and perceptions of corruption, may deter potential investors; about 70% of FDI is from US firms. The economy registered sluggish economic growth in 2010, insufficient to improve living standards for the nearly 65% of the population in poverty. The LOBO administration inherited a difficult fiscal position with off-budget debts accrued in previous administrations and government salaries nearly equivalent to tax collections. His government has displayed a commitment to improving tax collection and cutting expenditures, and attracting foreign investment. This enabled Tegucigalpa to secure an IMF Precautionary Stand-By agreement in October 2010. The IMF agreement has helped renew multilateral and bilateral donor confidence in Honduras following the ZELAYA administration’s economic mismanagement and the 2009 coup.

Background: Occupied by the UK in 1841, Hong Kong was formally ceded by China the following year; various adjacent lands were added later in the 19th century. Pursuant to an agreement signed by China and the UK on 19 December 1842, Hong Kong became the Hong Kong Special Administrative Region (SAR) of the People's Republic of China on 1 July 1997. In this agreement, China promised that, under its “one country, two systems” formula, China's socialist economic system would not be imposed on Hong Kong and that Hong Kong would enjoy a high degree of autonomy in all matters except foreign and defense affairs for the next 50 years.

Flag description: red with a stylized, white, five-petal Bauhinia flower in the center; each petal contains a small, red, five-pointed star in its middle; the red color is the same as that on the Chinese flag and represents the motherland; the fragrant Bauhinia—developed in Hong Kong the late 19th century—has come to symbolize the region; the five stars echo those on the flag of China

National symbol(s): orchid tree flower

National anthem: note: as a Special Administrative Region of China, "Yiyong-gjun Jinxingqu" is the official anthem (see China)

ECONOMY

Economy—overview: Hong Kong has a free market economy, highly dependent on international trade and finance—the value of goods and services trade, including the sizable share of re-exports, is about four times GDP. Hong Kong's open economy left it exposed to the global economic slowdown that began in 2008. Although increasing integration with China, through trade, tourism, and financial links, helped it to make an initial recovery more quickly than many observers anticipated, it again faces a possible slowdown as exports to the Euro zone and US slump. The Hong Kong government is promoting the Special Administrative Region (SAR) as the site for Chinese renminbi (RMB) internationalization. Hong Kong residents are allowed to establish RMB-denominated savings accounts; RMB-denominated corporate and Chinese government bonds have been issued in Hong Kong; and RMB trade settlement is allowed. The territory far exceeded the RMB conversion quota set by Beijing for trade settlements in 2010 due to the growth of earnings from exports to the mainland. RMB deposits grew to roughly 7.8% of total system deposits in Hong Kong by the end of 2011, an increase of over 59% since the beginning of the year. The government is pursuing efforts to introduce additional use of RMB in Hong Kong financial markets and is seeking to expand the RMB quota. The mainland has long been Hong Kong's largest trading partner, accounting for about half of Hong Kong's exports by value. Hong Kong's natural resources are limited, and food and raw materials must be imported. As a result of China's easing of travel restrictions, the number of mainland tourists to the territory has surged from 4.5 million in 2001 to 28 million in 2011,

outnumbering visitors from all other countries combined. Hong Kong has also established itself as the premier stock market for Chinese firms seeking to list abroad. In 2011 mainland Chinese companies constituted about 43% of the firms listed on the Hong Kong Stock Exchange and accounted for about 56% of the Exchange's market capitalization. During the past decade, as Hong Kong's manufacturing industry moved to the mainland, its service industry has grown rapidly. Growth slowed to 5% in 2011. Credit expansion and tight housing supply conditions caused Hong Kong property prices to rise rapidly in 2010 and inflation to rise 5.3% in 2011. Lower and middle income segments of the population are increasingly unable to afford adequate housing. Hong Kong continues to link its currency closely to the US dollar, maintaining an arrangement established in 1983.

HUNGARY

INTRODUCTION

Background: Hungary became a Christian kingdom in A.D. 1000 and for many centuries served as a bulwark against Ottoman Turkish expansion in Europe. The kingdom eventually became part of the polyglot Austro-Hungarian Empire, which collapsed during World War I. The country fell under Communist rule following World War II. In 1956, a revolt and an announced withdrawal from the Warsaw Pact were met with a massive military intervention by Moscow. Under the leadership of Janos KADAR in 1968, Hungary began liberalizing its economy, introducing so-called "Goulash Communism." Hungary held its first multiparty elections in 1990 and initiated a free market economy. It joined NATO in 1999 and the EU five years later. In 2011, Hungary assumed the six-month rotating presidency of the EU for the first time.

Flag description: three equal horizontal bands of red (top), white, and green; the flag dates to the national movement of the 18th and 19th centuries, and fuses the medieval colors of the Hungarian coat of arms with the revolutionary tricolor form of the French flag; folklore attributes virtues to the colors: red for strength, white for faithfulness, and green for hope; alternatively, the red is seen as being for the blood spilled in defense of the land, white for freedom, and green for the pastureslands that make up so much of the country

National symbol(s): Holy Crown of Hungary (Crown of Saint Stephen); turlu (falcon)

National anthem:

name: "Himnusz" (Hymn)

lyrics/music: Ferenc KOLCSEY/Ferenc ERKEL

note: adopted 1844

ECONOMY

Economy—overview: Hungary has made the transition from a centrally planned to a market economy, with a per capita income nearly two-thirds that of the EU-25 average. The private sector accounts for more than 80% of GDP. Foreign ownership of and investment in Hungarian firms are widespread, with cumulative foreign direct investment worth more than \$70 billion. In late 2008, Hungary's impending inability to service its short-term debt—brought on by the global financial crisis—led Budapest to obtain an IMF/EU/World Bank-arranged financial assistance package worth over \$25 billion. The global economic downturn, declining exports, and low domestic consumption and fixed asset accumulation, dampened by government austerity measures, resulted in an economic contraction of 6.8% in 2009. In 2010 the new government implemented a number of changes including cutting business and personal income taxes, but imposed "crisis taxes" on financial institutions, energy and telecom companies, and retailers. The IMF/EU bail-out program lapsed at the end of the year and was replaced by Post Program Monitoring and Article IV Consultations on overall economic and fiscal processes. The economy began to recover in 2010 with a big boost from exports, especially to Germany, and achieved growth of approximately 1.4% in 2011. At the end of 2011 the government turned to the IMF and the EU to obtain a new loan for foreign currency debt and bond obligations in 2012 and beyond. Whether negotiations result in a loan depend on Hungary meeting EU and IMF requirements for ensuring the independence of monetary, judicial, and data privacy institutions. The EU also launched an Excessive Deficit Procedure and requested that the government outline measures to sustainably reduce the budget deficit to under 3% of GDP. Unemployment remained high, at nearly 11% in 2011. Ongoing economic weakness in Western Europe is likely to further constrain growth in 2012.

TRANSNATIONAL ISSUES

Disputes—international: bilateral government, legal, technical and economic working group negotiations continue in 2006 with Slovakia over Hungary's failure to complete its portion of the Gabčíkovo-Nagymaros hydroelectric dam project along the Danube; as a member state that forms part of the EU's external border, Hungary has implemented the strict Schengen border rules

Illicit drugs: transshipment point for Southwest Asian heroin and cannabis and for South American cocaine destined for Western Europe; limited producer of precursor chemicals, particularly for amphetamine and methamphetamine; efforts to counter money laundering, related to organized crime and drug trafficking are improving but remain vulnerable; significant consumer of ecstasy

ICELAND

INTRODUCTION

Background: Settled by Norwegian and Celtic (Scottish and Irish) immigrants during the late 9th and 10th centuries A.D., Iceland boasts the world's oldest functioning legislative assembly, the Althing, established in 930. Independent for over 300 years, Iceland was subsequently ruled by Norway and Denmark. Fallout from the Askja volcano of 1875 devastated the Icelandic economy and caused widespread famine. Over the next quarter century, 20% of the island's population emigrated, mostly to Canada and the US. Limited home rule from Denmark was granted in 1874 and complete independence attained in 1944. The second half of the 20th century saw substantial economic growth driven primarily by the fishing industry. The economy diversified greatly after the country joined the European Economic Area in 1994, but Iceland was especially hard hit by the global financial crisis in the years following 2008. Literacy, longevity, and social cohesion are first rate by world standards.

note: adopted 1944; the anthem, also known as "Ó, Guð vors lands" (O, God of Our Land), was originally written and performed in 1874

ECONOMY

Economy—overview: Iceland's Scandinavian-type social-market economy combines a capitalist structure and free-market principles with an extensive welfare system. Prior to the 2008 crisis, Iceland had achieved high growth, low unemployment, and a remarkably even distribution of income. The economy depends heavily on the fishing industry, which provides 40% of export earnings, more than 12% of GDP, and employs 7% of the work force. It remains sensitive to declining fish stocks as well as to fluctuations in world prices for its main exports: fish and fish products, aluminum, and ferrosilicon. Iceland's economy has been diversifying into manufacturing and service industries in the last decade, particularly within the fields of software production, biotechnology, and tourism. Abundant geothermal and hydropower sources have attracted substantial foreign investment in the aluminum sector, boosted economic growth, and sparked some interest from high-tech firms looking to establish data centers using cheap green energy, although the financial crisis has put several investment projects on hold. Much of Iceland's economic growth in recent years came as the result of a boom in domestic demand following the rapid expansion of the country's financial sector. Domestic banks expanded aggressively in foreign markets, and consumers and businesses borrowed heavily in foreign currencies, following the privatization of the banking sector in the early 2000s. Worsening global financial conditions throughout 2008 resulted in a sharp depreciation of the krona vis-a-vis other major currencies. The foreign exposure of Icelandic banks, whose loans and other assets totaled more than 10 times the country's GDP, became unsustainable. Iceland's three largest banks collapsed in late 2008. The country secured over \$10

billion in loans from the IMF and other countries to stabilize its currency and financial sector, and to back government guarantees for foreign deposits in Icelandic banks. GDP fell 6.8% in 2009, and unemployment peaked at 9.4% in February 2009. GDP rose 2.4% in 2011 and unemployment declined to 6.0%. Since the collapse of Iceland's financial sector, government economic priorities have included: stabilizing the krona, implementing capital controls, reducing Iceland's high budget deficit, containing inflation, addressing high household debt, restructuring the financial sector, and diversifying the economy. Three new banks were established to take over the domestic assets of the collapsed banks. Two of them have foreign majority ownership, while the State holds a majority of the shares of the third. Iceland began making payments to the UK, the Netherlands, and other claimants in late 2011 following Iceland's Supreme Court ruling that upheld 2008 emergency legislation that gives priority to depositors for compensation from failed Icelandic banks. Iceland owes British and Dutch authorities approximately \$5.5 billion for compensating British and Dutch citizens who lost deposits in Icesave when parent bank Landsbanki failed in 2008. Iceland began accession negotiations with the EU in July 2010; however, public support has dropped substantially because of concern about losing control over fishing resources and in reaction to worries over the ongoing Eurozone crisis.

Military—note: Iceland has no standing military force; under a 1951 bilateral agreement—still valid—its defense was provided by the US-manned Icelandic Defense Force (IDF) headquartered at Keflavik; however, all US military forces in Iceland were withdrawn as of October 2006; although wartime defense of Iceland remains a NATO commitment, in April 2007, Iceland and Norway signed a bilateral agreement providing for Norwegian aerial surveillance and defense of Icelandic airspace (2008)

TRANSNATIONAL ISSUES

Disputes—international: Iceland, the UK, and Ireland dispute Denmark's claim that the Faroe Islands' continental shelf extends beyond 200 nm; the European Free Trade Association Surveillance Authority filed a suit against Iceland, claiming the country violated the European Economic Area agreement in failing to pay minimum compensation to Icesave depositors

INDIA

INTRODUCTION

Background: The Indus Valley civilization, one of the world's oldest, flourished during the 3rd and 2nd millennia B.C. and extended into northwestern India. Aryan tribes from the northwest infiltrated onto the Indian subcontinent about 1500 B.C.; their merger with the earlier Dravidian inhabitants created the classical Indian culture. The Maurya Empire of the 4th and

3rd centuries B.C.—which reached its zenith under ASHOKA—united much of South Asia. The Golden Age ushered in by the Gupta dynasty (4th to 6th centuries A.D.) saw a flowering of Indian science, art, and culture. Islam spread across the subcontinent over a period of 700 years. In the 10th and 11th centuries, Turks and Afghans invaded India and established the Delhi Sultanate. In the early 16th century, the Emperor BABUR established the Mughal Dynasty which ruled India for more than three centuries. European explorers began establishing footholds in India during the 16th century. By the 19th century, Great Britain had become the dominant political power on the subcontinent. The British Indian Army played a vital role in both World Wars. Nonviolent resistance to British rule, led by Mohandas GANDHI and Jawaharlal NEHRU, eventually brought about independence in 1947. Communal violence led to the subcontinent's bloody partition, which resulted in the creation of two separate states, India and Pakistan. The two countries have fought three wars since independence, the last of which in 1971 resulted in East Pakistan becoming the separate nation of Bangladesh. India's nuclear

weapons tests in 1998 caused Pakistan to conduct its own tests that same year. In November 2008, terrorists originating from Pakistan conducted a series of coordinated attacks in Mumbai, India's financial capital. In January 2011, India assumed a nonpermanent seat in the UN Security Council for the 2011-12 term. Despite pressing problems such as significant overpopulation, environmental degradation, extensive poverty, and widespread corruption, rapid economic development is fueling India's rise on the world stage.

ECONOMY

Economy—overview: India is developing into an open-market economy, yet traces of its past autarkic policies remain. Economic liberalization, including industrial deregulation, privatization of state-owned enterprises, and reduced controls on foreign trade and investment, began in the early 1990s and has served to accelerate the country's growth, which has averaged more than 7% per year since 1997. India's diverse economy encompasses traditional village farming, modern agriculture, handicrafts, a wide range of modern industries, and a multitude of services. Slightly more than half of the work force is in agriculture, but services are the major source of economic growth, accounting for more than half of India's output, with only one-third of its labor force. India has capitalized on its large educated English-speaking population to become a major exporter of information technology services and software workers. In 2010, the Indian economy rebounded robustly from the global financial crisis—in large part because of strong domestic demand—and growth exceeded 8% year-on-year in real terms. However, India's economic growth in 2011 slowed because of persistently high inflation and interest rates and little progress on economic reforms. High international crude prices have exacerbated the government's fuel subsidy expenditures contributing to a higher fiscal

deficit, and a worsening current account deficit. Little economic reform took place in 2011 largely due to corruption scandals that have slowed legislative work. India's medium-term growth outlook is positive due to a young population and corresponding low dependency ratio, healthy savings and investment rates, and increasing integration into the global economy. India has many long-term challenges that it has not yet fully addressed, including widespread poverty, inadequate physical and social infrastructure, limited non-agricultural employment opportunities, scarce access to quality basic and higher education, and accommodating

supported by recent deregulation and liberalization of telecommunications laws and policies, India has emerged as one of the fastest growing telecom markets in the world; total telephone subscribership base approached 800 million in 2010, an overall teledensity exceeding 65%, and subscribership is currently growing more than 20 million per month; urban teledensity now exceeds 100% and rural teledensity is about 30% and steadily growing

domestic: mobile cellular service introduced in 1994 and organized nationwide into four metropolitan areas and 19 telecom circles each with multiple private service providers and one or more state-owned service providers; in recent years significant trunk capacity added in the form of fiber-optic cable and one of the world's largest domestic satellite systems, the Indian National Satellite system (INSAT), with 6 satellites supporting 33,000 very small aperture terminals (VSAT)

international: country code-91; a number of major international submarine cable systems, including Sea-Me-We-3 with landing sites at Cochin and Mumbai (Bombay), Sea-Me-We-4 with a landing site at Chennai, Fiber-Optic Link Around the Globe (FLAG) with a landing site at Mumbai (Bombay), South Africa-Far East (SAFE) with a landing site at Cochin, the i2i cable network linking to Singapore with landing sites at Mumbai (Bombay) and Chennai (Madras), and Tata Indicom linking Singapore and Chennai (Madras), provide a significant increase in the bandwidth available for both voice and data traffic; satellite earth stations-8 Intelsat (Indian Ocean) and 1 Inmarsat (Indian Ocean region); 9 gateway exchanges operating from Mumbai (Bombay), New Delhi, Kolkata (Calcutta), Chennai (Madras), Jalandhar, Kanpur, Gandhinagar, Hyderabad, and Ernakulam (2010)

Broadcast media: Doordarshan, India's public TV network, operates about 20 national, regional, and local services; a large and increasing number of privately-owned TV stations are distributed by cable and satellite service providers; by 2011, more than 100 million homes had access to cable and satellite TV offering more than 700 TV channels; government controls AM radio with All India Radio operating domestic and external networks; news broadcasts via radio are limited to the All India Radio Network; since 2000, privately-owned FM stations have been permitted and their numbers have increased rapidly (2007)

INDIAN OCEAN

INTRODUCTION

Background: The Indian Ocean is the third largest of the world's five oceans (after the Pacific Ocean and Atlantic Ocean, but larger than the Southern Ocean and Arctic Ocean). Four critically important access waterways are the Suez Canal (Egypt), Bab el Mandeb (Djibouti-Yemen), Strait of Hormuz (Iran-Oman), and Strait of Malacca (Indonesia-Malaysia). The decision by the International Hydrographic Organization in the spring of 2000 to delimit a fifth ocean, the Southern Ocean, removed the portion of the Indian Ocean south of 60 degrees south latitude.

GEOGRAPHY

Location: body of water between Africa, the Southern Ocean, Asia, and Australia

Geographic coordinates: 20 00 S, 80 00 E

Map references:

Political Map of the World

Area: total: 68,556 million sq km

note: includes Andaman Sea, Arabian Sea, Bay of Bengal, Flores Sea, Great Australian Bight, Gulf of Aden, Gulf of Oman, Java Sea, Mozambique Channel, Persian Gulf, Red Sea, Savu Sea, Strait of Malacca, Timor Sea, and other tributary water bodies

Area—comparative: about 5.5 times the size of the US

Coastline: 66,526 km

Climate: northeast monsoon (December to April), southwest monsoon (June to October); tropical cyclones occur during May/June and October/November in the northern Indian Ocean and January/February in the southern Indian Ocean

Terrain: surface dominated by counter-clockwise gyre (broad, circular system of currents) in the southern Indian Ocean; unique reversal of surface currents in the northern Indian Ocean; low atmospheric pressure over southwest Asia from hot, rising, summer air results in the southwest monsoon and southwest-to-northeast winds and currents, while high pressure over northern Asia from cold, falling, winter air results in the northeast monsoon and northeast-to-southwest winds and currents; ocean floor is dominated by the Mid-Indian Ocean Ridge and subdivided by the Southeast Indian Ocean Ridge, Southwest Indian Ocean Ridge, and Ninetyeast Ridge

Elevation extremes: lowest point: Java Trench -7,258 m

highest point: sea level 0 m

Natural resources: oil and gas fields, fish, shrimp, sand and gravel aggregates, placer deposits, polymetallic nodules

Natural hazards: occasional icebergs pose navigational hazard in southern reaches

Environment—current issues: endangered marine species include the dugong, seals, turtles, and whales; oil pollution in the Arabian Sea, Persian Gulf, and Red Sea

Geography—note: major chokepoints include Bab el Mandeb, Strait of Hormuz, Strait of Malacca, southern access to the Suez Canal, and the Lombok Strait

ECONOMY

Economy—overview: The Indian Ocean provides major sea routes connecting the Middle East, Africa, and East Asia with Europe and the Americas. It carries a particularly heavy traffic of petroleum and petroleum products from the oilfields of the Persian Gulf and Indonesia. Its fish are of great and growing importance to the bordering countries for domestic

consumption and export. Fishing fleets from Russia, Japan, South Korea, and Taiwan also exploit the Indian Ocean, mainly for shrimp and tuna. Large reserves of hydrocarbons are being tapped in the offshore areas of Saudi Arabia, Iran, India, and western Australia. An estimated 40% of the world's offshore oil production comes from the Indian Ocean. Beach sands rich in heavy minerals and offshore placer deposits are actively exploited by bordering countries, particularly India, South Africa, Indonesia, Sri Lanka, and Thailand.

TRANSPORTATION

Ports and terminals: Chennai (Madras, India); Colombo (Sri Lanka); Durban (South Africa); Jakarta (Indonesia); Kolkata (Calcutta, India); Melbourne (Australia); Mumbai (Bombay, India); Richards Bay (South Africa)

Transportation—note: the International Maritime Bureau reports the territorial waters of littoral states and offshore waters as high risk for piracy and armed robbery against ships, particularly in the Gulf of Aden, along the east coast of Africa, the Bay of Bengal, and the Strait of Malacca; numerous vessels, including commercial shipping and pleasure craft, have been attacked and hijacked both at anchor and while underway; hijacked vessels are often disguised and cargoes stolen; crew and passengers are often held for ransom, murdered, or cast adrift; the presence of several naval task forces in the Gulf of Aden and additional anti-piracy measures on the part of ship operators have reduced the piracy incidents in that body of water by more than half in 2010; in response, Somali-based pirates, using hijacked fishing trawlers as “mother ships” to extend their range, shifted operations as far south as the Mozambique Channel and eastward to the vicinity of the Maldives

TRANSNATIONAL ISSUES

Disputes—International: some maritime disputes (see littoral states)

INDONESIA

INTRODUCTION

Background: The Dutch began to colonize Indonesia in the early 17th century; Japan occupied the islands from 1942 to 1945. Indonesia declared its independence after Japan's surrender, but it required four years of intermittent negotiations, recurring hos-

tilities, and UN mediation before the Netherlands agreed to transfer sovereignty in 1949. After decades of repressive rule, free and fair legislative elections took place in 1999. Indonesia is now the world's third most populous democracy, the world's largest archipelagic state, and home to the world's largest Muslim population. Current

issues include: alleviating poverty, improving education, preventing terrorism, consolidating democracy after four decades of authoritarianism, implementing economic and financial reforms, stemming corruption, reforming the criminal justice system, holding the military and police accountable for human rights violations, addressing

climate change, and controlling infectious diseases, particularly those of global and regional importance. In 2005, Indonesia reached a historic peace agreement with armed separatists in Aceh, which led to democratic elections in Aceh in December 2006. Indonesia continues to face low intensity armed resistance by the separatist Free Papua Movement.

ECONOMY

Economy—overview: Indonesia, a vast polyglot nation, grew an estimated 6.1% and 6.4% in 2010 and 2011, respectively. The government made economic advances under the first administration of President YUDHOYONO (2004-09), introducing significant reforms in the financial sector, including tax and customs reforms, the use of Treasury bills, and capital market development and supervision. During the global financial crisis, Indonesia outperformed its regional neighbors and joined China and India as the only G20 members posting growth in 2009. The government has promoted fiscally conservative policies, resulting in a debt-to-GDP ratio of less than 25%, a small current account surplus, a fiscal deficit below 2%, and historically low rates of inflation. Fitch and Moody's upgraded Indonesia's credit rating to investment grade in December 2011. Indonesia still struggles with poverty and unemployment, inadequate infrastructure, corruption, a complex regulatory environment, and unequal resource distribution among regions. The government in 2012 faces the ongoing challenge of improving Indonesia's insufficient infrastructure to remove impediments to economic growth, labor unrest over wages, and reducing its fuel subsidy program in the face of rising oil prices.

IRAN

INTRODUCTION

Background: Known as Persia until 1935, Iran became an Islamic republic in 1979 after the ruling monarchy was overthrown and Shah Mohammad Reza PAHLAVI was forced into exile. Conservative clerical forces established a theocratic system of government with ultimate political authority vested in a learned religious scholar referred to commonly as the Supreme Leader who, according to the constitution, is accountable only to the Assembly of Experts—a popularly elected 86-member body of clerics. US-Iranian relations have been strained since a group of Iranian students seized the US Embassy in Tehran on 4 November 1979 and held it until 20 January 1981. During 1980–88, Iran fought a bloody, indecisive war with Iraq that eventually expanded into the Persian Gulf and led to clashes between US Navy and Iranian military forces between 1987 and 1988. Iran has been designated a state sponsor of terrorism for its activities in Lebanon and elsewhere in the world and remains subject to US, UN, and EU economic sanctions and export controls because of its continued involvement in terrorism and its nuclear weapons ambitions. Following the election of reformer Hojjat ol-Eslam Mohammad KHATAMI as president in 1997 and a reformist Majles (legislature) in 2000, a campaign to foster political reform in response to popular dissatisfaction was initiated. The movement floundered as conservative politicians, through the control of unelected institutions, prevented reform measures from being enacted and increased repressive measures. Starting with nationwide municipal elections in 2003 and continuing through Majles elections in 2004, conservatives reestablished control over Iran's elected government institutions, which culminated with the August 2005 inauguration of hardliner Mahmud AHMADI-NEJAD as president. His controversial reelection in June 2009 sparked nationwide protests over allegations of electoral fraud. The UN Security Council has passed a number of resolutions (1696 in

July 2006, 1737 in December 2006, 1747 in March 2007, 1803 in March 2008, and 1835 in September 2008 and 1929 in June 2010) calling for Iran to suspend its uranium enrichment and reprocessing activities and comply with its IAEA obligations and responsibilities. Resolutions 1737, 1477, 1803 and 1929 subject a number of Iranian individuals and entities involved in Iran's nuclear and ballistic missile programs to sanctions. Additionally, several Iranian entities are subject to US sanctions under Executive Order 13382 designations for proliferation activities and EO 13224 designations for support of terrorism. In mid-February 2011, opposition activists conducted the largest antigovernment rallies since December 2009, spurred by the success of uprisings in Tunisia and Egypt. Protester turnout probably was at most tens of thousands and security forces were deployed to disperse protesters. Additional protests in March 2011 failed to elicit significant participation largely because of the robust security response, although discontent still smolders.

National holiday: Republic Day, 1 April (1979)

Constitution: 2–3 December 1979; revised 1989

note: the revision in 1989 expanded powers of the presidency and eliminated the prime ministership

Legal system: religious legal system based on sharia law

International law organization

participation:

has not submitted an ICJ jurisdiction declaration; non-party state to the ICCt

Suffrage: 18 years of age; universal

Executive branch: chief of state: Supreme Leader Ali Hoseini-KHAMENEI (since 4 June 1989)

head of government: President Mahmud AHMADI-NEJAD (since 3 August 2005); First Vice President Mohammad Reza RAHIMI (since 13 September 2009)

cabinet: Council of Ministers selected by the president with legislative approval;

the Supreme Leader has some control over appointments to the more sensitive ministries (For more information visit the World Leaders website)

note: also considered part of the Executive branch of government are three oversight bodies: 1) Assembly of Experts (Majles-e Khoebregan), a popularly elected body charged with determining the succession of the Supreme Leader, reviewing his performance, and deposing him if deemed necessary; 2) Expediency Council or the Council for the Discernment of Expediency (Majma-ye Tashkhis-e Maslahat-e Nezam) exerts supervisory authority over the executive, judicial, and legislative branches and resolves legislative issues when the Majles and the Council of Guardians disagree and since 1989 has been used to advise national religious leaders on matters of national policy; in 2005 the Council's powers were expanded to act as a supervisory body for the government; 3) Council of Guardians of the Constitution or Council of Guardians or Guardians Council (Shora-ye Negban-e Qanon-e Asasi) determines whether proposed legislation is both constitutional and faithful to Islamic law, vets candidates in popular elections for suitability, and supervises national elections

elections: supreme leader appointed for life by the Assembly of Experts; president elected by popular vote for a four-year term (eligible for a second term and additional nonconsecutive term); election last held on 12 June 2009 (next presidential election slated for June 2013)

election results: Mahmud AHMADI-NEJAD reelected president; percent of vote—Mahmud AHMADI-NEJAD 62.6%, Mir-Hosein MUSAVI-Khamenei 33.8%, other 3.6%; voter turnout 85% (according to official figures published by the government)

Legislative branch: unicameral Islamic Consultative Assembly or Majles-e Shura-ye Eslami or Majles (290 seats; members elected by popular vote from single and multimember districts to serve four-year terms) **elections:** last held on 2 March 2012 (first round); second round date—NA (next election to be held in 2016)

election results: percent of vote—NA; seats by party—NA

Judicial branch: The Supreme Court (Qevh Qazaieh) and the four-member High Council of the Judiciary have a single head and overlapping responsibilities; together they supervise the enforcement of all laws and establish judicial and legal policies; lower courts include a special clerical court, a revolutionary court, and a special administrative court

Political parties and leaders: **Note:** formal political parties are a relatively new phenomenon in Iran and most conservatives still prefer to work through political pressure groups rather than parties; often political parties or coalitions are formed prior to elections and disbanded soon thereafter; a loose pro-reform coalition called the 2nd Khordad Front, which

includes political parties as well as less formal groups and organizations, achieved considerable success in elections for the sixth Majles in early 2000; groups in the coalition included the Islamic Iran Participation Front (IIPF), Executives of Construction Party (Kargozaran), Solidarity Party, Islamic Labor Party, Mardom Salari, Mojahedin of the Islamic Revolution Organization (MIRO), and Militant Clerics Society (MCS; Ruhaniyun); the coalition participated in the seventh Majles elections in early 2004 but boycotted them after 80 incumbent reformists were disqualified; following his defeat in the 2005 presidential elections, former MCS Secretary General and sixth Majles Speaker Mehdi KARUBI formed the National Trust Party; a new conservative group, Islamic Iran Developers Coalition (Abadgaran), took a leading position in the new Majles after winning a majority of the seats in February 2004; ahead of the 2008 Majles elections, traditional and hardline conservatives attempted to close ranks under the United Front of Principlists and the Broad Popular Coalition of Principlists; several reformist groups, such as the MIRO and the IIPF, also came together as a reformist coalition in advance of the 2008 Majles elections; the IIPF has repeatedly complained that the overwhelming majority of its candidates were unfairly disqualified from the 2008 elections

Political pressure groups and leaders:

groups that generally support the Islamic Republic: Ansar-e Hizballah; Followers of the Line of the Imam and the Leader; Islamic Coalition Party (Motalefeh); Islamic Engineers Society; Tehran Militant Clergy Association (MCA; Ruhaniyat) active pro-reform student group: Office of Strengthening Unity (OSU) opposition groups: Freedom Movement of Iran; Green Path movement [Mehdi KARUBI, Mir-Hosein MUSAVI]; Marz-e Por Gohar; National Front; various ethnic and monarchist organizations armed political groups repressed by the government: Democratic Party of Iranian Kurdistan (KDPI); Jundallah; Komala; Mojahedin-e Khalq Organization (MEK or MKO); People's Fedayeen; People's Free Life Party of Kurdistan (PJAK)

ECONOMY

Economy—overview: Iran's economy is marked by an inefficient state sector, reliance on the oil sector, which provides the majority of government revenues, and statist policies, which create major distortions throughout the system. Private sector activity is typically limited to small-scale workshops, farming, and services. Price controls, subsidies, and other rigidities weigh down the economy, undermining the potential for private-sector-led growth. Significant informal market activity flourishes and corruption is widespread. Tehran since the early 1990s has recognized the need to reduce these inefficiencies, and in December 2010 the legislature passed President Mahmud AHMADI-NEJAD's Targeted Subsidies Law (TSL) to reduce state subsidies on food and energy. The bill over a five-year period will phase out subsidies that previously cost Tehran \$60-\$100 billion annually and benefited Iran's upper and middle classes most. Direct cash payouts of \$45 per person to more than 90% of Iranian households have mitigated initial widespread resistance to the TSL program, though this acceptance remains vulnerable to rising inflation. This is the most extensive economic reform since the government implemented gasoline rationing in 2007. The continued rise in world oil prices in the last calendar year increased Iran's oil export revenue by roughly \$28 billion over 2010, easing some of the financial impact of international sanctions. However, expansionary fiscal and monetary policies, government mismanagement, the sanctions, and a depreciating currency are fueling inflation, and GDP growth remains stagnant. Iran also continues to suffer from double-digit unemployment and underemployment. Underemployment among Iran's educated youth

has convinced many to seek jobs overseas, resulting in a significant "brain drain."

Telephone system: *general assessment:* currently being modernized and expanded with the goal of not only improving the efficiency and increasing the volume of the urban service but also bringing telephone service to several thousand villages, not presently connected

domestic: the addition of new fiber cables and modern switching and exchange systems installed by Iran's state-owned telecom company have improved and

expanded the fixed-line network greatly; fixed-line availability has more than doubled to nearly 27 million lines since 2000; additionally, mobile-cellular service has increased dramatically serving roughly 67 million subscribers in 2010; combined fixed and mobile-cellular subscribership now exceeds 100 per 100 persons

international: country code—98; submarine fiber-optic cable to UAE with access to Fiber-Optic Link Around the Globe (FLAG); Trans-Asia-Europe (TAE) fiber-optic line runs from Azerbaijan through the northern portion of Iran to Turkmenistan with expansion to Georgia and Azerbaijan; HF radio and microwave radio relay to Turkey, Azerbaijan, Pakistan, Afghanistan, Turkmenistan, Syria, Kuwait, Tajikistan, and Uzbekistan; satellite earth stations—13 (9 Intelsat and 4 Inmarsat) (2009)

Broadcast media: state-run broadcast media with no private, independent broadcasters; Islamic Republic of Iran Broadcasting (IRIB), the state-run TV broadcaster, operates 5 nationwide channels, a news channel, about 30 provincial channels, and several international channels; about 20 foreign Persian-language TV stations broadcasting on satellite TV are capable of being seen in Iran; satellite dishes are illegal and, while their use had been tolerated, authorities began confiscating satellite dishes following the unrest stemming from the 2009 presidential election; IRIB operates 8 nationwide radio networks, a number of provincial stations, and an external service; most major international broadcasters transmit to Iran (2009)

TRANSNATIONAL ISSUES

Disputes—international: Iran protests Afghanistan's limiting flow of dammed Helmand River tributaries during drought; Iraq's lack of a maritime boundary with Iran prompts jurisdiction disputes beyond the mouth of the Shatt al Arab in the Persian Gulf; Iran and UAE dispute Tunb Islands and Abu Musa Island, which are occupied by Iran; Azerbaijan, Kazakhstan, and Russia ratified Caspian seabed delimitation treaties based on equidistance, while Iran continues to insist on a one-fifth slice of the sea; Afghan and Iranian commissioners have discussed boundary monument densification and resurvey

Refugees and internally displaced persons:

refugees (country of origin): 914,268 (Afghanistan); 54,024 (Iraq) (2007)

Trafficking in persons: current situation: Iran is a source, transit, and destination country for men, women, and children trafficked for the purposes of sexual exploitation and involuntary servitude; Iranian women

are trafficked internally for the purpose of forced prostitution and for forced marriages to settle debts; Iranian and Afghan children living in Iran are trafficked internally for the purpose of forced marriages, commercial sexual exploitation and involuntary servitude as beggars or laborers to pay debts, provide income, or support drug addiction of their families; press reports indicate that criminal organizations play significant role in human trafficking to and from Iran, in connection with smuggling of migrants, drugs, and arms; Iranian women and children are also subjected to sex trafficking in Pakistan, Turkey, Qatar, Kuwait, the United Arab Emirates, Bahrain, Iraq, France, Germany, and the United Kingdom tier rating: Tier 3—Iran did not report any law enforcement efforts to punish trafficking offenders and continues to lack any semblance of victim protection measures; victims of trafficking are, by government policy, detained and deported if foreign, or simply jailed or turned away if Iranian; lack of access to Iran by US Government officials impedes the collection of information on the country's human trafficking problem and the government's efforts to curb it (2009)

Illicit drugs: despite substantial interdiction efforts and considerable control measures along the border with Afghanistan, Iran remains one of the primary transshipment routes for Southwest Asian heroin to Europe; suffers one of the highest opiate addiction rates in the world, and has an increasing problem with synthetic drugs; lacks anti-money laundering laws; has reached out to neighboring countries to share counter-drug intelligence

IRAQ

INTRODUCTION

Background: Formerly part of the Ottoman Empire, Iraq was occupied by Britain during the course of World War I; in 1920, it was declared a League of Nations mandate

under UK administration. In stages over the next dozen years, Iraq attained its independence as a kingdom in 1932. A "republic" was proclaimed in 1958, but in actuality a series of strongmen ruled the country until 2003. The last was SADDAM Husayn. Territorial disputes with Iran led to an inconclusive and costly eight-year war (1980–88). In August 1990, Iraq seized Kuwait but was expelled by US-led, UN coalition forces during the Gulf War of January–February 1991. Following Kuwait's liberation, the UN Security Council (UNSC) required Iraq to scrap all weapons of mass destruction and long-range missiles and to allow UN verification inspections. Continued Iraqi noncompliance with UNSC resolutions over a period of 12 years led to the US-led invasion of Iraq in March 2003 and the ouster of the SADDAM Husayn regime. US forces remained in Iraq under a UNSC mandate through 2009 and under a bilateral security agreement thereafter, helping to provide security and to train and mentor Iraqi security forces. In October 2005, Iraqis approved a constitution in

a national referendum and, pursuant to this document, elected a 275-member Council of Representatives (COR) in December 2005. The COR approved most cabinet ministers in May 2006, marking the transition to Iraq's first constitutional government in nearly a half century. In January 2009, Iraq held elections for provincial councils in all governorates except for the three governorates comprising the Kurdistan Regional Government and Kirkuk Governorate. Iraq held a national legislative election in March 2010—choosing 325 legislators in an expanded COR—and, after nine months of deadlock the COR approved the new government in December 2010. Nearly nine years after the start of the Second Gulf War in Iraq, US military operations there ended in mid-December 2011.

GEOGRAPHY

note: adopted 2004; following the ousting of Saddam HUSSEIN, Iraq adopted "Mawtini," a popular folk song throughout the Arab world, which also serves as an unofficial anthem of the Palestinian people

ECONOMY

Economy—overview: An improving security environment and foreign investment are helping to spur economic activity, particularly in the energy, construction, and retail sectors. Broader economic development, long-term fiscal health, and sustained improvements in the overall standard of living still depend on the central government passing major policy reforms. Iraq's largely state-run economy is dominated by the oil sector, which provides more than 90% of government revenue and 80% of foreign exchange earnings. Since mid-2009, oil export earnings have returned to levels seen before Operation Iraqi Freedom. As global oil prices remained high for much of 2011, government revenues increased accordingly. For 2012, Iraq's draft budget forecasts oil exports of 2.6 million barrels per day (bbl/day), a significant increase from Iraq's average of 2.2 million bbl/day in 2011. Iraq's contracts with major oil companies have the potential to further expand oil revenues, but Iraq will need to make significant upgrades to its oil processing, pipeline, and export infrastructure to enable these deals to reach their economic potential. Iraq is making slow progress enacting laws and developing the institutions needed to implement economic policy, and political reforms are still needed to assuage investors' concerns regarding the uncertain business climate. The government of Iraq is eager to attract additional foreign direct investment, but it faces a number of obstacles including a tenuous political system and concerns about security and societal stability. Rampant corruption, outdated infrastructure, insufficient essential services, and antiquated commercial laws stifle investment and continue to constrain growth of private, nonoil sectors. In 2010, Baghdad signed agreements with both the IMF and World Bank for conditional aid programs designed to help strengthen Iraq's economic institutions. Iraq is considering a package of laws to establish a modern legal framework for the oil sector and a mechanism to equitably divide oil revenues within the nation, although these reforms are still under contentious and sporadic negotiation. Political and economic tensions between Baghdad and local governments have led some provincial councils to use their budgets to independently promote and facilitate investment at the local level. The Central Bank has successfully held the exchange rate at about 1,170 Iraqi dinar/US dollar since January 2009. Inflation has remained under control since 2006 as

security improved. However, Iraqi leaders remain hard pressed to translate macroeconomic gains into an improved standard of living for the Iraqi populace. Unemployment remains a problem throughout the country. Encouraging private enterprise through deregulation would make it easier for both Iraqi citizens and foreign investors to start new businesses. Rooting out corruption and implementing reforms—such as bank restructuring and developing the private sector—would be important steps in this direction.

Telephone system: *general assessment:* the 2003 liberation of Iraq severely disrupted telecommunications throughout Iraq including international connections; widespread government efforts to rebuild domestic and international communications through fiber optic links are in progress; the mobile cellular market has expanded rapidly and its subscribership base is expected to continue increasing rapidly

domestic: repairs to switches and lines destroyed during 2003 continue; additional switching capacity is improving access; mobile-cellular service is available and centered on 3 GSM networks which are being expanded beyond their regional roots, improving country-wide connectivity; wireless local loop is available in some metropolitan areas and additional licenses have been issued with the hope of overcoming the lack of fixed-line infrastructure
international: country code—964; satellite earth stations—4 (2 Intelsat—1 Atlantic Ocean and 1 Indian Ocean, 1 Intersputnik—Atlantic Ocean region, and 1 Arabsat (inoperative)); local microwave radio relay connects border regions to Jordan, Kuwait, Syria, and Turkey; international terrestrial fiber-optic connections have been established with Saudi Arabia, Turkey, and Kuwait with planned connections to Iran and Jordan; a link to the Fiber-Optic Link

Around the Globe (FLAG) submarine fiber-optic cable is planned (2009)

Broadcast media: the number of private radio and TV stations has increased rapidly since 2003; government-owned TV and radio stations are operated by the publicly-funded Iraqi Public Broadcasting Service; private broadcast media are mostly linked to political, ethnic, or religious groups; satellite TV is available to an estimated 70% of viewers and many of the broadcasters are based abroad; transmissions of multiple international radio broadcasters are accessible (2007)

IRELAND

INTRODUCTION

Background: Celtic tribes arrived on the island between 600–150 B.C. Invasions by Norsemen that began in the late 8th century were finally ended when King Brian BORU defeated the Danes in 1014. English invasions began in the 12th century and set off more than seven centuries of Anglo-Irish struggle marked by fierce rebellions

and harsh repressions. A failed 1916 Easter Monday Rebellion touched off several years of guerrilla warfare that in 1921 resulted in independence from the UK for 26 southern counties; six northern (Ulster) counties remained part of the UK. In 1949, Ireland withdrew from the British Commonwealth; it joined the European Community in 1973. Irish governments have sought the peaceful unification of Ireland and have cooperated with Britain against terrorist groups. A peace settlement for Northern Ireland is gradually being implemented despite some difficulties. In 2006, the Irish and British governments developed and began to implement the St. Andrews Agreement, building on the Good Friday Agreement approved in 1998.

Flag description: three equal vertical bands of green (hoist side), white, and orange; officially the flag colors have no meaning, but a common interpretation is that the green represents the Irish nationalist (Gaelic) tradition of Ireland; orange represents the Orange tradition (minority supporters of William of Orange); white symbolizes peace (or a lasting truce) between the green and the orange

note: similar to the flag of Cote d'Ivoire, which is shorter and has the colors reversed—orange (hoist side), white, and green; also similar to the flag of Italy, which is shorter and has colors of green (hoist side), white, and red

National symbol(s): harp

National anthem: *name:* "Amhrán na bhFiann" (The Soldier's Song)

lyrics/music: Peadar KEARNEY [English], Liam O RINN [Irish]/Patrick HEENEY and Peadar KEARNEY

note: adopted 1926; instead of "Amhrán na bhFiann," the song "Ireland's Call" is often used in athletic events where citizens of the Republic of Ireland and Northern Ireland compete as a unified team

ECONOMY

Economy—overview: Ireland is a small, modern, trade-dependent economy. Ireland was among the initial group of 12 EU nations that began circulating the euro on 1 January 2002. GDP growth averaged 6% in 1995–2007, but economic activity has dropped sharply since the onset of the world financial crisis, with GDP falling by over 3% in 2008, nearly 7% in 2009, and less than 1% in 2010. Ireland entered into a recession in 2008 for the first time in more than a decade, with the subsequent collapse of its domestic property and construction markets. Property prices rose more rapidly in Ireland in the decade up to 2007 than in any other developed economy. Since their 2007 peak, average house prices have fallen 47%. In the wake of the collapse of the construction sector and the downturn in consumer spending and business investment, the export sector, dominated by foreign multinationals, has become a key component of Ireland's economy. Agriculture, once the most important sector, is now dwarfed by industry and services. In 2008 the COWEN government moved to guarantee all bank deposits, recapitalize the banking system, and establish partly-public venture capital funds in response to the

country's economic downturn. In 2009, in continued efforts to stabilize the banking sector, the Irish Government established the National Asset Management Agency (NAMA) to acquire problem commercial property and development loans from Irish banks. Faced with sharply reduced revenues and a burgeoning budget deficit, the Irish Government introduced the first in a series of draconian budgets in 2009. In addition to across-the-board cuts in spending, the 2009 budget included wage reductions for all public servants. These measures were not sufficient. In 2010, the budget deficit reached 32.4% of GDP—the world's largest deficit, as a percentage of GDP—because of additional government support for the banking sector. In late 2010, the former COWEN Government agreed to a \$112 billion loan package from the EU and IMF to help Dublin further increase the capitalization of its banking sector and avoid defaulting on its sovereign debt. Since entering office in March 2011, the KENNY government has intensified austerity measures to try to meet the deficit targets under Ireland's EU-IMF program. Ireland achieved moderate growth in 2011 and cut the budget deficit to 10.1% of GDP, although the recovery is expected to slow in 2012 as a result of the euro-zone debt crisis.

ISLE OF MAN

INTRODUCTION

Background: Part of the Norwegian Kingdom of the Hebrides until the 13th century when it was ceded to Scotland, the isle came under the British crown in 1765. Current concerns include reviving the almost extinct Manx Gaelic language. Isle of Man is a British crown dependency but is not part of the UK or of the European Union. However, the UK Government remains constitutionally responsible for its defense and international representation.

TRANSNATIONAL ISSUES

Disputes—International: Ireland, Iceland, and the UK dispute Denmark's claim that the Faroe Islands' continental shelf extends beyond 200 nm

Illicit drugs: transshipment point for and consumer of hashish from North Africa to the UK and Netherlands and of European-produced synthetic drugs; increasing consumption of South American cocaine; minor transshipment point for heroin and cocaine destined for Western Europe; despite recent legislation, narcotics-related money laundering—using bureaux de change, trusts, and shell companies involving the offshore financial community—remains a concern

as a local anthem; as a British crown depen-
dency, “God Save the Queen” is official (see
United Kingdom) and is played when the
sovereign, members of the royal family, or
the lieutenant governor are present

ECONOMY

Economy—overview: Offshore banking,
manufacturing, and tourism are key sectors
of the economy. The government offers low

taxes and other incentives to high-technol-
ogy companies and financial institutions to
locate on the island; this has paid off in
expanding employment opportunities in
high-income industries. As a result, agricul-
ture and fishing, once the mainstays of the
economy, have declined in their contribu-
tions to GDP. The Isle of Man also attracts
online gambling sites and the film industry.
Trade is mostly with the UK. The Isle of
Man enjoys free access to EU markets.

ISRAEL

INTRODUCTION

Background: Following World War II, the British withdrew from their mandate of Palestine, and the UN partitioned the area into Arab and Jewish states, an arrange-

ment rejected by the Arabs. Subsequently, the Israelis defeated the Arabs in a series of wars without ending the deep tensions between the two sides. The territories Israel occupied since the 1967 war are not included in the Israel country profile, unless otherwise noted. On 25 April 1982, Israel withdrew from the Sinai pursuant to the 1979 Israel-Egypt Peace Treaty. In keeping with the framework established at the Madrid Conference in October 1991, bilateral negotiations were conducted between Israel and Palestinian representatives and Syria to achieve a permanent settlement. Israel and Palestinian officials signed on 13 September 1993 a Declaration of Principles (also known as the "Oslo Accords") guiding an interim period of Palestinian self-rule. Outstanding territorial and other disputes with Jordan were resolved in the 26 October 1994 Israel-Jordan Treaty of Peace. In addition, on 25 May 2000, Israel withdrew unilaterally from southern Lebanon, which it had occupied since 1982. In April 2003, US President BUSH, working in conjunction with the EU, UN, and Russia—the "Quartet"—took the lead in laying out a roadmap to a final settlement of the conflict by 2005, based on reciprocal steps by the two parties leading to two states, Israel and a democratic Palestine. However, progress toward a permanent status agreement was undermined by Israeli-Palestinian violence between September 2003 and February 2005. In the summer of 2005, Israel unilaterally disengaged from the Gaza Strip, evacuating settlers and its military while retaining control over most points of entry into the Gaza Strip. The election of HAMAS to head the Palestinian Legislative Council froze relations between Israel

and the Palestinian Authority (PA). Ehud OLMERT became prime minister in March 2006 and presided over a 34-day conflict with Hizballah in Lebanon in June-August 2006 and a 23-day conflict with HAMAS in the Gaza Strip during December 2008 and January 2009. OLMERT, who in June 2007 resumed talks with PA President Mahmoud ABBAS, resigned in September 2008. Prime Minister Binyamin NETANYAHU formed a coalition in March 2009 following a February 2009 general election. Direct talks launched in September 2010 collapsed following the expiration of Israel's 10-month partial settlement construction moratorium in the West Bank.

Flag description: white with a blue hexagram (six-pointed linear star) known as the Magen David (Shield of David) centered between two equal horizontal blue bands near the top and bottom edges of the flag; the basic design resembles a Jewish prayer shawl (tallit), which is white with blue stripes; the hexagram as a Jewish symbol dates back to medieval times

National symbol(s): Star of David

National anthem: *name:* "Hatikvah" (The Hope)

lyrics/music: Naftali Herz IMBER/traditional, arranged by Samuel COHEN

note: adopted 2004, unofficial since 1948; used as the anthem of the Zionist movement since 1897; the 1888 arrangement by Samuel COHEN is thought to be based on the Romanian folk song "Carul cu boi" (The Ox Driven Cart)

ECONOMY

Economy—overview: Israel has a technologically advanced market economy. It depends on imports of crude oil, grains, raw materials, and military equipment. Cut diamonds, high-technology equipment, and agricultural products (fruits and vegetables) are the leading exports. Israel usually posts sizable trade deficits, which are covered by tourism and other service exports, as well as significant foreign investment inflows. The global financial crisis of 2008–09 spurred a brief recession in Israel, but the country entered the crisis with solid fundamentals—following years of prudent fiscal policy and a resilient banking sector. The economy has recovered better than most advanced, comparably sized economies. In 2010, Israel formally acceded to the OECD. Natural gasfields discovered off Israel's coast during the past two years have brightened Israel's

energy security outlook. The Leviathan field was one of the world's largest offshore natural gas finds this past decade. In mid-2011, public protests arose around income inequality and rising housing and commodity prices. The government formed committees to address some of the grievances but has maintained that it will not engage in deficit spending to satisfy populist demands.

INTRODUCTION

Background: Italy became a nation-state in 1861 when the regional states of the peninsula, along with Sardinia and Sicily, were united under King Victor EMMANUEL II. An era of parliamentary government came to a close in the early 1920s when Benito MUSSOLINI established a Fascist dictatorship. His alliance with Nazi Germany led to Italy's defeat in World War II. A democratic republic replaced the monarchy in 1946 and economic revival followed. Italy was a charter member of NATO and the European Economic Community (EEC). It has been at the forefront of European economic and political unification, joining the Economic and Monetary Union in 1999. Persistent problems include illegal immigration, organized crime, corruption, high unemployment, sluggish economic growth, and the low incomes and technical standards of southern Italy compared with the prosperous north.

Flag description: three equal vertical bands of green (hoist side), white, and red; design inspired by the French flag brought to Italy by Napoleon in 1797; colors are those of Milan (red and white) combined with the green uniform color of the Milanese civic guard

note: similar to the flag of Mexico, which is longer, uses darker shades of red and green, and has its coat of arms centered on the white band; Ireland, which is longer and is green (hoist side), white, and orange;

also similar to the flag of the Cote d'Ivoire, which has the colors reversed—orange (hoist side), white, and green

National symbol(s): white, five-pointed star (Stella d'Italia)

National anthem: name: "Il Canto degli Italiani" (The Song of the Italians)

lyrics/music: Goffredo MAMELI/Michele NOVARO

note: adopted 1946; the anthem, originally written in 1847, is also known as "L'Inno di Mameli" (Mameli's Hymn), and "Fratelli d'Italia" (Brothers of Italy)

ECONOMY

Economy—overview: Italy has a diversified industrial economy, which is divided into a developed industrial north, dominated by private companies, and a less-developed, welfare-dependent, agricultural south, with high unemployment. The Italian economy is driven in large part by the manufacture of high-quality consumer goods produced by small and medium-sized enterprises, many of them family owned. Italy also has a sizable underground economy, which by some estimates accounts for as much as 17% of GDP. These activities are most common within the agriculture, construction, and service sectors. Italy is the third-largest economy in the euro-zone, but exceptionally high public debt burdens and structural impediments to growth have rendered it vulnerable to scrutiny by financial markets. Public debt has increased steadily since 2007, reaching 120% of GDP in 2011, and borrowing costs on sovereign government debt have risen to record levels. During the second half of 2011 the government passed a series of three austerity packages to balance its budget by 2013 and decrease its public debt burden. These measures included a hike in the value-added tax, pension reforms, and cuts to public administration. The government also faces pressure from investors and European partners to address Italy's long-standing structural impediments to growth, such as an inflexible labor market and widespread tax evasion. The international financial crisis worsened conditions in Italy's labor market, with unemployment rising from 6.2% in 2007 to 8.4% in 2011, but in the longer-term Italy's low fertility rate and quota-driven immigration policies will increasingly strain its economy. The euro-zone crisis along with Italian austerity measures have reduced exports and domestic demand, slowing Italy's recovery. Italy's GDP is still 5% below its 2007 pre-crisis level.

Illicit drugs: important gateway for and consumer of Latin American cocaine and Southwest Asian heroin entering the European market; money laundering by organized crime and from smuggling

JAMAICA

INTRODUCTION

Background: The island—discovered by Christopher COLUMBUS in 1494—was settled by the Spanish early in the 16th century. The native Taino Indians, who had inhabited Jamaica for centuries, were gradually exterminated and replaced by African slaves. England seized the island in 1655 and established a plantation economy based on sugar, cocoa, and coffee. The abolition of slavery in 1834 freed a quarter million slaves, many of whom became small farmers. Jamaica gradually increased its independence from Britain. In 1958 it joined other British Caribbean colonies in forming the Federation of the West Indies. Jamaica gained full independence when it withdrew from the Federation in 1962. Deteriorating economic conditions during the 1970s led to recurrent violence as rival gangs affiliated with the major political parties evolved into powerful organized crime networks involved in international drug smuggling and money laundering. Violent crime, drug trafficking, and poverty pose significant challenges to the government today. Nonetheless, many rural and resort areas remain relatively safe and contribute substantially to the economy.

The country continues to derive most of its foreign exchange from tourism, remittances, and bauxite/alumina. Remittances account for nearly 15% of GDP and exports of bauxite and alumina make up about 10%. The bauxite/alumina sector was most affected by the global downturn while the tourism industry was resilient, experiencing an increase of 4% in tourist arrivals. Tourism revenues account for roughly 10% of GDP, and both arrivals and revenues grew in 2010, up 4% and 6% respectively. Jamaica's economy faces many challenges to growth: high crime and corruption, large-scale unemployment and underemployment, and a debt-to-GDP ratio of more than 120%. Jamaica's onerous public debt burden is the result of government bailouts to ailing sectors of the economy, most notably to the financial sector in the mid-to-late 1990s. In early 2010, the Jamaican government created the Jamaica Debt Exchange in order to retire high-priced domestic bonds and significantly reduce annual debt servicing. The Government of Jamaica signed a \$1.27 billion, 27-month Standby Agreement with the International Monetary Fund for balance of payment support in February 2010. Other multilaterals have also provided millions of dollars in loans and grants. Despite the improvement, debt servicing costs still hinder the government's ability to spend on infrastructure and social programs, particularly as job losses rise in a shrinking economy. The SIMPSON-MILLER administration faces the difficult prospect of having to achieve fiscal discipline in order to maintain debt payments, while simultaneously attacking a serious crime problem that is hampering economic growth. High unemployment exacerbates the crime problem, including gang violence that is fueled by the drug trade.**GDP (purchasing power parity):**

JAM MAYEN

INTRODUCTION

Background: This desolate, arctic, mountainous island was named after a Dutch whaling captain who indisputably discovered it in 1614 (earlier claims are inconclusive). Visited only occasionally by seal hunters and trappers over the following centuries, the island came under Norwegian sovereignty in 1929. The long dormant Beerenberg volcano, the northernmost active volcano on earth, resumed activity in 1970 and the most recent eruption occurred in 1985.

GEOGRAPHY

Location: Northern Europe, island between the Greenland Sea and the Norwegian Sea, northeast of Iceland

Geographic coordinates: 71 00 N, 8 00 W

Map references: Europe

Area: total: 377 sq km

country comparison to the world: 203

conventional short form: Jan Mayen

Dependency status: territory of Norway; since August 1994, administered from Oslo through the county governor (fylkesmann) of Nordland; however, authority has been delegated to a station commander of the Norwegian Defense Communication Service

Legal system: the laws of Norway, where applicable, apply

Flag description: the flag of Norway is used

ECONOMY

Economy—overview: Jan Mayen is a volcanic island with no exploitable natural resources, although surrounding waters contain substantial fish stocks and potential untapped petroleum resources. Economic activity is limited to providing services for employees of Norway's radio and meteorological stations on the island.

COMMUNICATIONS

JAPAN

INTRODUCTION

Background: In 1603, after decades of civil warfare, the Tokugawa shogunate (a military-led, dynastic government) ushered in a long period of relative political stability and isolation from foreign influence. For more than two centuries this policy enabled Japan to enjoy a flowering of its indigenous culture. Japan opened its ports after signing the Treaty of Kanagawa with the US in 1854 and began to intensively modernize and industrialize. During the late 19th and early 20th centuries, Japan became a regional power that was able to defeat the forces of both China and Russia. It occupied Korea, Formosa (Taiwan), and southern Sakhalin Island. In 1931–32 Japan occupied Manchuria, and in 1937 it launched a full-scale invasion of China. Japan attacked US forces in 1941—triggering America's entry into World War II—and soon occupied much of East and Southeast Asia. After its defeat in World War II, Japan recovered to become an economic power and an ally of the US. While the emperor retains his throne as a symbol of national unity, elected politicians hold actual decision-making power. Following three decades of unprecedented growth, Japan's economy experienced a major slowdown starting in the 1990s, but the country remains a major economic power. In March 2011, Japan's strongest-ever earthquake, and an accompanying tsunami, devastated the northeast part of Honshu island, killing thousands and damaging several nuclear power plants. The catastrophe hobbled the country's economy and its energy infrastructure, and tested its ability to deal with humanitarian disasters.

GEOGRAPHY

Location: Eastern Asia, island chain between the North Pacific Ocean and the Sea of Japan, east of the Korean Peninsula
Geographic coordinates: 36 00 N, 138 00 E
Map references: Asia
Area: total: 377,915 sq km
 country comparison to the world: 61

note: includes Bonin Islands (Ogasawara-gunto), Daito-shoto, Minami-jima, Okinotori-shima, Ryukyu Islands (Nansei-shoto), and Volcano Islands (Kazan-retto)

Area—comparative: slightly smaller than California

Land boundaries: 0 km

Coastline: 29,751 km

Maritime claims: territorial sea: 12 nm; between 3 nm and 12 nm in the international straits—La Perouse or Soya, Tsugaru, Osumi, and Eastern and Western Channels of the Korea or Tsushima Strait
 contiguous zone: 24 nm
 exclusive economic zone: 200 nm

Climate: varies from tropical in south to cool temperate in north

Terrain: mostly rugged and mountainous

Elevation extremes: lowest point: Hachirogata -4 m

highest point: Fujiyama 3,776 m

Natural resources: negligible mineral resources, fish **note:** with virtually no energy natural resources, Japan is the world's largest importer of coal and liquefied natural gas, as well as the second largest importer of oil

Freshwater withdrawal (domestic/industrial/agricultural): total: 88.43 cu km/yr (20%/18%/62%)

per capita: 690 cu m/yr (2000)

Natural hazards: many dormant and some active volcanoes; about 1,500 seismic occurrences (mostly tremors but occasional severe earthquakes) every year; tsunamis; typhoons

volcanism: both Unzen (elev. 1,500 m) and Sakura-jima (elev. 1,117 m), which lies near the densely populated city of Kagoshima, have been deemed "Decade Volcanoes" by the International Association of Volcanology and Chemistry of the Earth's Interior, worthy of study due to their explosive history and close proximity to human populations; other notable historically active volcanoes include Asama, Honshu Island's most active volcano, Aso, Bandai, Fuji, Iwo-jima, Kikai, Kirishima, Komaga-take, Oshima, Suwanosejima, Tokachi, Yake-dake, and Usu

Environment—current issues: air pollution from power plant emissions results in acid rain; acidification of lakes and reservoirs degrading water quality and threatening aquatic life; Japan is one of the largest consumers of fish and tropical timber, contributing to the depletion of these resources in Asia and elsewhere

Environment—international agreements: party to: Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Biodiversity, Climate Change, Climate Change-

Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling

ECONOMY

Economy—overview: In the years following World War II, government-industry cooperation, a strong work ethic, mastery of high technology, and a comparatively small defense allocation (1% of GDP) helped Japan develop a technologically advanced economy. Two notable characteristics of the post-war economy were the close interlocking structures of manufacturers, suppliers, and distributors, known as *keiretsu*, and the guarantee of lifetime employment for a substantial portion of the urban labor force. Both features are now eroding under the dual pressures of global competition and domestic demographic change. Japan's industrial sector is heavily dependent on imported raw materials and fuels. A tiny agricultural sector is highly subsidized and protected, with crop yields among the highest in the world. Usually self-sufficient in rice, Japan imports about 60% of its food on a caloric basis. Japan maintains one of the world's largest fishing fleets and accounts for nearly 15% of the global catch. For three decades, overall real economic growth had been spectacular—a 10% average in the 1960s, a 5% average in the 1970s, and a 4% average in the 1980s. Growth slowed markedly in the 1990s, averaging just 1.7%, largely because of the after effects of inefficient investment and an asset price bubble in the late 1980s that required a protracted period of time for firms to reduce excess debt, capital, and labor. Measured on a purchasing power parity (PPP) basis that adjusts for price differences, Japan in 2011 stood as the fourth-largest economy in the world after second-place China, which surpassed Japan in 2001, and third-place India, which edged out Japan in 2011. A sharp downturn in business investment and global demand for Japan's exports in late 2008 pushed Japan further into recession. Government stimulus spending helped the economy recover in late 2009 and 2010, but the economy contracted again in 2011 as the massive 9.0 magnitude earthquake in March disrupted manufacturing. Electricity supplies remain tight because Japan has temporarily shut down almost all of its nuclear power plants after the Fukushima Daiichi nuclear reactors were crippled by the earthquake and resulting tsunami. Estimates of the direct costs of the damage—rebuilding homes, factories, and infrastructure—range from \$235 billion to \$310 billion, and GDP declined almost 0.5% in 2011. Prime Minister Yoshihiko NODA has proposed opening the agricultural and services sectors to greater foreign competition and boosting exports through membership in the US-led Trans-Pacific Partnership trade talks and by pursuing free-trade agreements with the EU and others, but debate

continues on restructuring the economy and reining in Japan's huge government debt, which exceeds 200% of GDP. Persistent deflation, reliance on exports to drive growth, and an aging and shrinking population are other major long-term challenges for the economy.

TRANSNATIONAL ISSUES

Disputes—international: the sovereignty dispute over the islands of Etorofu, Kunashiri, and Shikotan, and the Habomai group, known in Japan as the “Northern Territories” and in Russia as the “Southern Kuril Islands,” occupied by the Soviet Union in 1945, now administered by Russia and claimed by Japan, remains the primary sticking point to signing a peace treaty formally ending World War II hostilities; Japan and South Korea claim Liancourt Rocks (Take-shima/Tok-do) occupied by South Korea since 1954; China and Taiwan dispute both Japan’s claims to the uninhabited islands of the Senkaku-shoto (Diaoyu Tai) and Japan’s unilaterally declared exclusive economic zone in the East China Sea, the site of intensive hydrocarbon prospecting

JERSEY

INTRODUCTION

Background: Jersey and the other Channel Islands represent the last remnants of the medieval Dukedom of Normandy that held sway in both France and England. These islands were the only British soil occupied by German troops in World War II. Jersey is a British crown dependency but is not part of the UK or of the European Union. However, the UK Government is constitutionally responsible for its defense and international representation.

Flag description: white with a diagonal red cross extending to the corners of the flag; in the upper quadrant, surmounted by a yellow crown, a red shield with three lions in yellow; according to tradition, the ships of Jersey—in an attempt to differentiate themselves from English ships flying the horizontal cross of St. George—rotated the cross to the "X" (saltire) configuration; because this arrangement still resembled the Irish cross of St. Patrick, the yellow Plantagenet crown and Jersey coat of arms were added

National symbol(s): Jersey cow

National anthem: *name:* "Isle de Siez Nous" (Island Home)

lyrics/music: Gerard LE FEUVRE

note: adopted 2008; serves as a local anthem; as a British crown dependency, "God Save the Queen" is official (see United Kingdom)

ECONOMY

Economy—overview: Jersey's economy is based on international financial services, agriculture, and tourism. In 2005 the finance sector accounted for about 50% of the island's output. Potatoes, cauliflower, tomatoes, and especially flowers are important export crops, shipped mostly to the UK. The Jersey breed of dairy cattle is known worldwide and represents an important export income earner. Milk products go to the UK and other EU countries. Tourism accounts for one-quarter of GDP. In recent years, the government has encouraged light industry to locate in Jersey with the result that an electronics industry has developed, displacing more traditional industries. All raw material and energy requirements are imported as well as a large share of Jersey's food needs. Light taxes and death duties

make the island a popular tax haven. Living standards come close to those of the UK.

JORDAN

INTRODUCTION

Background: Following World War I and the dissolution of the Ottoman Empire, the UK received a mandate to govern much of the Middle East. Britain separated out a semi-autonomous region of Transjordan from Palestine in the early 1920s, and the area gained its independence in 1946; it adopted the name of Jordan in 1950. The country's long-time ruler was King HUSSEIN (1953–99). A pragmatic leader, he successfully navigated competing pressures from the major powers (US, USSR, and UK), various Arab states, Israel, and a large internal Palestinian population. Jordan lost the West Bank to Israel in the 1967 war and defeated Palestinian rebels who attempted to overthrow the monarchy in 1970. King HUSSEIN in 1988 permanently relinquished Jordanian claims to the West Bank. In 1989, he reinstituted parliamentary elections and initiated a gradual political liberalization; political parties were legalized in 1992. In 1994, he signed a peace treaty with Israel. King ABDALLAH II, King HUSSEIN's eldest son, assumed the throne following his father's death in February 1999. Since then, he has consolidated his power and implemented some economic and political reforms. Jordan acceded to the World Trade Organization in 2000, and began to participate in the European Free Trade Association in 2001. In 2003, Jordan staunchly supported the Coalition ouster of SADDAM in Iraq and, following the outbreak of insurgent violence in Iraq, absorbed thousands of displaced Iraqis. Municipal elections were held in July 2007 under a system in which 20% of seats in all municipal councils were reserved by quota for women. Parliamentary elections were last held in November 2010 and saw independent pro-government candidates win the vast majority of seats.

Beginning in January 2011 in the wake of unrest in Tunisia and Egypt, as many as several thousand Jordanians staged weekly demonstrations and marches in Amman and other cities throughout Jordan to push for political reforms and protest government

corruption, rising prices, rampant poverty, and high unemployment. In response, King ABDALLAH replaced his prime minister and formed two commissions—one to propose specific reforms to Jordan's electoral and political parties laws, and the other to consider limited constitutional amendments. In a televised speech in June 2011, the King announced plans to work toward transferring authority for appointing future prime ministers and cabinet ministers to parliament; in a subsequent announcement, he outlined a revised political parties law intended to encourage greater political participation. Protesters and opposition elements generally acknowledged those measures as steps in the right direction but many continue to push for greater limits on the King's authority and to fight against government corruption. In September 2011, a royal decree approved constitutional amendments passed by the Parliament aimed at strengthening a more independent judiciary and establishing a constitutional court and independent election commission to oversee the next municipal and parliamentary elections, slated for April 2012 and fall 2012, respectively. King ABDALLAH in October 2011 dismissed the Jordanian cabinet and replaced the prime minister in response to widespread public dissatisfaction with government performance and escalating criticism of the premier because of public concerns over his reported involvement in corruption.

ECONOMY

Economy—overview: Jordan's economy is among the smallest in the Middle East, with insufficient supplies of water, oil, and other natural resources, underlying the government's heavy reliance on foreign assistance. Other economic challenges for the government include chronic high rates of poverty, unemployment, inflation, and a large budget deficit. Since assuming the throne in 1999, King ABDALLAH has implemented significant economic reforms, such as opening the trade regime, privatizing state-owned companies, and eliminating some fuel subsidies, which in the last decade spurred economic growth by attracting foreign investment and creating some jobs. The global economic slowdown and regional turmoil, however, have depressed Jordan's GDP growth, impacting export-oriented sectors, construction, and tourism. In 2011 the government approved two economic relief packages and a budgetary supplement, largely to improve the living conditions for the middle and poor classes. Jordan's finances have also been strained by a series of natural gas pipeline attacks in Egypt, causing Jordan to substitute more expensive heavy fuel oils to generate electricity. An influx of foreign aid, especially from Gulf countries, has helped to somewhat offset these extrabudgetary expenditures, but the budget deficit is likely to remain high, at nearly 10% of GDP excluding grants. Amman likely will continue to depend heavily on foreign assistance to finance the deficit in 2012. Jordan's financial sector has been relatively isolated from the international financial crisis because of its limited exposure to overseas capital markets. Jordan is currently exploring nuclear power generation to forestall energy shortfalls.

KAZAKHSTAN

INTRODUCTION

Background: Ethnic Kazakhs, a mix of Turkic and Mongol nomadic tribes who migrated into the region in the 13th century, were rarely united as a single nation. The area was conquered by Russia in the 18th century, and Kazakhstan became a Soviet Republic in 1936. During the 1950s and 1960s agricultural "Virgin Lands" program, Soviet citizens were encouraged to help cultivate Kazakhstan's northern pastures. This influx of immigrants (mostly Russians, but also some other deported nationalities) skewed the ethnic mixture and enabled non-ethnic Kazakhs to outnumber natives. Independence in 1991 drove many of these newcomers to emigrate. Kazakhstan's economy is larger than those of all the other Central Asian states largely due to the country's vast natural resources. Current issues include: developing a cohesive national identity; expanding the development of the country's vast energy resources and exporting them to world markets; diversifying the economy outside the oil, gas, and mining sectors; enhancing Kazakhstan's economic competitiveness; developing a multiparty parliament and advancing political and social reform; and strengthening relations with neighboring states and other foreign powers.

GEOGRAPHY

Location: Central Asia, northwest of China; a small portion west of the Ural (Zhayya) River in eastern-most Europe

Geographic coordinates: 48 00 N, 68 00 E

Map references: Asia

Area: total: 2,724,900 sq km

country comparison to the world: 9

land: 2,699,700 sq km

water: 25,200 sq km

Area—comparative: slightly less than four times the size of Texas

Land boundaries: total: 12,185 km

border countries: China 1,533 km, Kyrgyzstan 1,224 km, Russia 6,846 km, Turkmenistan 379 km, Uzbekistan 2,203 km

Coastline: 0 km (landlocked); note—Kazakhstan borders the Aral Sea, now split

into two bodies of water (1,070 km), and the Caspian Sea (1,894 km)

Maritime claims: none (landlocked)

Climate: continental, cold winters and hot summers, arid and semiarid

Terrain: vast flat steppe extending from the Volga in the west to the Altai Mountains in the east and from the plains of western Siberia in the north to oases and deserts of Central Asia in the south

Elevation extremes: lowest point: Vpadina Kaundy -132 m

highest point: Khan Tangiri Shyngy (Pik Khan-Tengri) 6,995 m

Natural resources: major deposits of petroleum, natural gas, coal, iron ore, manganese, chrome ore, nickel, cobalt, copper, molybdenum, lead, zinc, bauxite, gold, uranium

Land use: arable land: 8.28%

permanent crops: 0.05%

other: 91.67% (2005)

Irrigated land: 35,560 sq km (2003)

Total renewable water resources: 109.6 cu km (1997)

Freshwater withdrawal (domestic/industrial/agricultural):

total: 35 cu km/yr (2%/17%/82%)

per capita: 2,360 cu m/yr (2000)

Natural hazards: earthquakes in the south; mudslides around Almaty

Environment—current issues: radioactive or toxic chemical sites associated with former defense industries and test ranges scattered throughout the country pose health risks for humans and animals; industrial pollution is severe in some cities; because the two main rivers that flowed into the Aral Sea have been diverted for irrigation, it is drying up and leaving behind a harmful layer of chemical pesticides and natural salts; these substances are then picked up by the wind and blown into noxious dust storms; pollution in the Caspian Sea; soil pollution from overuse of agricultural chemicals and salination from poor infrastructure and wasteful irrigation practices

Environment—international agreements: party to: Air Pollution, Biodiversity, Climate Change, Desertification, Endangered Species, Environmental Modification, Hazardous

Wastes, Ozone Layer Protection, Ship Pollution, Wetlands
signed, but not ratified: Climate Change-Kyoto Protocol

Geography—note: landlocked; Russia leases approximately 6,000 sq km of territory enclosing the Baykonur Cosmodrome; in January 2004, Kazakhstan and Russia extended the lease to 2050

Flag description: a gold sun with 32 rays above a soaring golden steppe eagle, both centered on a sky blue background; the hoist side displays a national ornamental pattern "koshkar-muiz" (the horns of the ram) in gold; the blue color is of religious significance to the Turkic peoples of the country, and so symbolizes cultural and ethnic unity; it also represents the endless sky as well as water; the sun, a source of life and energy, exemplifies wealth and plenitude; the sun's rays are shaped like grain, which is the basis of abundance and prosperity; the eagle has appeared on the flags of Kazakh tribes for centuries and represents freedom, power, and the flight to the future

National symbol(s): golden eagle

National anthem:

name: "Menin Qazaqstanım"
 (My Kazakhstan)

lyrics/music: Zhumeke NASHIMEDENOV and Nursultan NAZARBAYEV/Shamshi KALDAYAKOV

note: adopted 2006; President Nursultan NAZARBAYEV played a role in revising the lyrics

ECONOMY

Economy—overview: Kazakhstan, geographically the largest of the former Soviet republics, excluding Russia, possesses enormous fossil fuel reserves and plentiful supplies of other minerals and metals, such as uranium, copper, and zinc. It also has a large agricultural sector featuring livestock and grain. In 2002 Kazakhstan became the first country in the former Soviet Union to receive an investment-grade credit rating. Kazakhstan's economy has largely recovered from the global financial crisis of 2008, and GDP increased 7% year-on-year in 2011. Extractive industries have been and will continue to be the engine of this growth. Landlocked, with restricted access to the high seas, Kazakhstan relies on its neighbors to export its products, especially oil and grain. Although its Caspian Sea ports,

pipelines, and rail lines carrying oil have been upgraded, civil aviation and roadways have been neglected. Telecoms are improving, but require considerable investment, as does the information technology base. Supply and distribution of electricity can be erratic because of regional dependencies. At the end of 2007, global financial markets froze up and the loss of capital inflows to Kazakhstani banks caused a credit crunch. The subsequent and sharp fall of oil and commodity prices in 2008 aggravated the economic situation, and Kazakhstan plunged into recession. While the global financial crisis took a significant toll on Kazakhstan's economy, it has rebounded well. In response to the crisis, Kazakhstan's government devalued the tenge (Kazakhstan's currency) to stabilize market pressures and injected around \$10 billion in economic stimulus. Rising commodity prices have helped revive Kazakhstan's economy, which registered roughly 7% growth in 2010-11. Despite solid macroeconomic indicators, the government realizes that its economy suffers from an overreliance on oil and extractive industries, the so-called "Dutch disease." In response, Kazakhstan has embarked on an ambitious diversification program, aimed at developing targeted sectors like transport, pharmaceuticals, telecommunications, petrochemicals and food processing. In 2010 Kazakhstan joined the Belarus-Kazakhstan-Russia Customs Union in an effort to boost foreign investment and improve trade relationships. The government expects to join the World Trade Organization in 2012, which should also help to develop the manufacturing and service sector base.

KENYA

INTRODUCTION

Background: Founding president and liberation struggle icon Jomo KENYATTA led Kenya from independence in 1963 until his death in 1978, when President Daniel Toroitich arap MOI took power in a constitutional succession. The country was a de facto one-party state from 1969 until 1982 when the ruling Kenya African National Union (KANU) made itself the sole legal party in Kenya. MOI acceded to internal and external pressure for political liberalization in late 1991. The ethnically fractured opposition failed to dislodge KANU from power in elections in 1992 and 1997, which were marred by violence and fraud, but were viewed as having generally reflected the will of the Kenyan people. President MOI stepped down in December 2002 following fair and peaceful elections. Mwai KIBAKI, running as the candidate of the multiethnic, united opposition group, the National Rainbow Coalition (NARC), defeated KANU candidate Uhuru KENYATTA and assumed the presidency following a campaign centered on an anticorruption platform. KIBAKI's NARC coalition splintered in 2005 over a constitutional review process. Government defectors joined with KANU to form a new opposition coalition, the Orange Democratic Movement (ODM), which defeated the government's draft constitution in a popular referendum in November 2005. KIBAKI's reelection in December 2007 brought charges of vote rigging from ODM candidate Raila ODINGA and unleashed two months of violence in which as many as 1,500 people died. UN-sponsored talks in late February 2008 produced a power-sharing accord bringing ODINGA into the government in the restored position of prime minister. Kenya in August 2010 adopted a new constitution that eliminates the role of prime minister after the next presidential election.

ECONOMY

Economy—overview: Although the regional hub for trade and finance in East Africa, Kenya has been hampered by corruption and by reliance upon several primary goods whose prices have remained low. Low infrastructure investment threatens Kenya's long-term position as the largest East African economy. The IMF halted lending in 2001 when the government failed to institute several anticorruption measures. In the key December 2002 elections, Daniel Arap MOI's 24-year-old reign ended, and a new opposition government took on the formidable economic problems facing the nation. After some early progress in rooting out corruption and encouraging donor support, the KIBAKI government was rocked by high-level graft scandals in 2005 and 2006. In 2006, the World Bank and IMF delayed loans pending action by the government on corruption. The international financial institutions and donors have since resumed lending, despite little action on the government's part to deal with corruption. Post-election violence in early 2008, coupled with the effects of the global financial crisis on remittance and exports, reduced GDP growth to 1.7 in 2008, but the economy rebounded in 2009–10. GDP growth in 2011 was only 4.3% due to inflationary pressures and sharp currency depreciation—as a result of high food and fuel import prices, a severe drought, and reduced tourism. In accordance with IMF prescriptions, Kenya raised interest rates and increased the cash reserve in November 2011.

TRANSNATIONAL ISSUES

Disputes—international: Kenya served as an important mediator in brokering Sudan's north-south separation in February 2005; Kenya provides shelter to almost a quarter million refugees, including Ugandans who flee across the border periodically to seek protection from Lord's Resistance Army rebels; Kenya works hard to prevent the clan and militia fighting in Somalia from spreading across the border, which has long been open to nomadic pastoralists; the boundary that separates Kenya's and Sudan's sovereignty is unclear in the "Ilemi Triangle," which Kenya has administered since colonial times

Refugees and internally displaced persons: *refugees (country of origin):* 173,702 (Somalia); 73,004 (Sudan); 16,428 (Ethiopia)

IDPs: 250,000–400,000 (2007 post-election violence; KANU attacks on opposition tribal groups in 1990s) (2007)

Illicit drugs: widespread harvesting of small plots of marijuana; transit country for South Asian heroin destined for Europe and North America; Indian methaqualone also transits on way to South Africa; significant potential for money-laundering activity given the country's status as a regional financial center; massive corruption, and relatively high levels of narcotics-associated activities

KIRIBATI

INTRODUCTION

Background: The Gilbert Islands became a British protectorate in 1892 and a colony in 1915; they were captured by the Japanese in the Pacific War in 1941. The islands of Makin and Tarawa were the sites of major US amphibious victories over

entrenched Japanese garrisons in 1943. The Gilbert Islands were granted self-rule by the UK in 1971 and complete independence in 1979 under the new name of Kiribati. The US relinquished all claims to the sparsely inhabited Phoenix and Line Island groups in a 1979 treaty of friendship with Kiribati.

GEOGRAPHY

Location: Oceania, group of 33 coral atolls in the Pacific Ocean, straddling the Equator, as well as the International Date Line; the capital Tarawa is about half way between Hawaii and Australia

Geographic coordinates: 1 25 N, 173 00 E

Map references: Oceania

Area: total: 811 sq km

country comparison to the world: 186

land: 811 sq km

water: 0 sq km

note: includes three island groups—Gilbert Islands, Line Islands, Phoenix Islands

Area—comparative: four times the size of Washington, DC

Land boundaries: 0 km

Coastline: 1,143 km

Maritime claims: territorial sea: 12 nm

exclusive economic zone: 200 nm

Climate: tropical; marine, hot and humid, moderated by trade winds

Terrain: mostly low-lying coral atolls surrounded by extensive reefs

Elevation extremes: lowest point: Pacific Ocean 0 m

highest point: unnamed elevation on Banaba 81 m

Natural resources: phosphate (production discontinued in 1979)

Land use: arable land: 2.74%

permanent crops: 47.95%

other: 49.31% (2005)

Irrigated land: NA

Natural hazards: typhoons can occur any time, but usually November to March; occasional tornadoes; low level of some of the islands make them sensitive to changes in sea level

Environment—current issues: heavy pollution in lagoon of south Tarawa atoll due to heavy migration mixed with traditional practices such as lagoon latrines and open-pit dumping; ground water at risk

Environment—international agreements: party to: Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Whaling
signed, but not ratified: none of the selected agreements

Geography—note: 21 of the 33 islands are inhabited; Banaba (Ocean Island) in Kiribati is one of the three great phosphate rock islands in the Pacific Ocean—the others are Makatea in French Polynesia, and Nauru; Kiribati is the only country in the world

to fall into all four hemispheres (northern, southern, eastern, and western)

ECONOMY

Economy—overview: A remote country of 33 scattered coral atolls, Kiribati has few natural resources and is one of the least developed Pacific Islands. Commercially viable phosphate deposits were exhausted at the time of independence from the UK in 1979. Copra and fish now represent the bulk of production and exports. The economy has fluctuated widely in recent years. Economic development is constrained by a shortage of skilled workers, weak infrastructure, and remoteness from international markets. Tourism provides more than one-fifth of GDP. Private sector initiatives and a financial sector are in the early stages of development. Foreign financial aid from the EU, UK, US, Japan, Australia, New Zealand, Canada, UN agencies, and Taiwan accounts for 20–25% of GDP. Remittances from seamen on merchant ships abroad account for more than \$5 million each year. Kiribati receives around \$15 million annually for the government budget from an Australian trust fund.

KOREA, NORTH

INTRODUCTION

Background: An independent kingdom for much of its long history, Korea was occupied by Japan beginning in 1905 following the Russo-Japanese War. Five years later, Japan formally annexed the entire peninsula. Following World War II, Korea was split with the northern half coming under Soviet-sponsored Communist control. After failing in the Korean War (1950–53) to conquer the US-backed Republic of Korea (ROK) in the southern portion by force, North Korea (DPRK), under its

founder President KIM Il Sung, adopted a policy of ostensible diplomatic and economic “self-reliance” as a check against outside influence. The DPRK demonized the US as the ultimate threat to its social system through state-funded propaganda, and molded political, economic, and military policies around the core ideological objective of eventual unification of Korea under Pyongyang’s control. KIM Il Sung’s son, KIM Jong Il, was officially designated as his father’s successor in 1980, assuming a growing political and managerial role until the elder KIM’s death in 1994. KIM Jong Un was publicly unveiled as his father’s successor in September 2010. Following KIM Jong Il’s death in December 2011, the regime began to take actions to transfer power to KIM Jong Un and Jong Un has begun to assume his father’s former titles and duties. After decades of economic mismanagement and resource misallocation, the DPRK since the mid-1990s has relied heavily on international aid to feed its population. North Korea’s history of regional military provocations, proliferation of military-related items, long-range missile development, WMD programs including tests of nuclear devices in 2006 and 2009, and massive conventional armed forces are of major concern to the international community. The regime has marked 2012, the

centenary of KIM Il Sung’s birth, a banner year; to that end, the country has heightened its focus on developing its economy and improving its people’s livelihoods.

ECONOMY

Economy—overview: North Korea, one of the world's most centrally directed and least open economies, faces chronic economic problems. Industrial capital stock is nearly beyond repair as a result of years of underinvestment, shortages of spare parts, and poor maintenance. Large-scale military spending draws off resources needed for investment and civilian consumption. Industrial and power output have stagnated for years at a fraction of pre-1990 levels. Frequent weather-related crop failures aggravated chronic food shortages caused by on-going systemic problems, including a lack of arable land, collective farming practices, poor soil quality, insufficient fertilization, and persistent shortages of tractors and fuel. Large-scale international food aid deliveries have allowed the people of North Korea to escape widespread starvation since famine threatened in 1995, but the population continues to suffer from prolonged malnutrition and poor living conditions. Since 2002, the government has allowed

private "farmers' markets" to begin selling a wider range of goods. It also permitted some private farming—on an experimental basis—in an effort to boost agricultural output. In December 2009, North Korea carried out a redenomination of its currency, capping the amount of North Korean won that could be exchanged for the new notes, and limiting the exchange to a one-week window. A concurrent crackdown on markets and foreign currency use yielded severe shortages and inflation, forcing Pyongyang to ease the restrictions by February 2010. In response to the sinking of the South Korean destroyer Cheonan and the shelling of Yeonpyeong Island, South Korea's government cut off most aid, trade, and bilateral cooperation activities, with the exception of operations at the Kaesong Industrial Complex. In preparation for 2012, the 100th anniversary of KIM Il-sung's birthday, North Korea continued efforts to develop special economic zones with China and expressed willingness to permit construction of a trilateral gas pipeline that would carry Russian natural gas to South Korea. The North Korean government often highlights its 2012 goal of becoming a "strong and prosperous" nation and attracting foreign investment, a key factor for improving the overall standard of living. Nevertheless, firm political control remains the government's overriding concern, which likely will inhibit changes to North Korea's current economic system.

TRANSNATIONAL ISSUES

Disputes—International: risking arrest, imprisonment, and deportation, tens of thousands of North Koreans cross into China to escape famine, economic privation, and political oppression; North Korea and China dispute the sovereignty of certain islands in Yalu and Tumen rivers; Military Demarcation Line within the 4-km-wide Demilitarized Zone has separated North from South Korea since 1953; periodic incidents in the Yellow Sea with South Korea which claims the Northern Limiting Line as a maritime boundary; North Korea supports South Korea in rejecting Japan's claim to Liancourt Rocks (Tok-do/Take-shima)

Refugees and internally displaced persons: IDPs: undetermined (flooding in mid-2007 and famine during mid-1990s) (2007)

Trafficking in persons: *current situation:* North Korea is a source country for men, women, and children trafficked for the purposes of forced labor and commercial sexual exploitation; the most common form of trafficking involves North Korean women and girls who cross the border into China voluntarily; additionally, North Korean women and girls are lured out of North Korea to escape poor social and economic conditions by the promise of food, jobs, and freedom, only to be forced into prostitution, marriage, or exploitative labor arrangements once in China; within the country, North Koreans do not have a choice in the work the government assigns them and are not free to change jobs at will

tier rating: Tier 3—North Korea does not fully comply with minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government does not acknowledge the existence of human rights abuses in the country or recognize trafficking, either within the country or transnationally (2008)

Illicit drugs: for years, from the 1970s into the 2000s, citizens of the Democratic People's Republic of (North) Korea (DPRK), many of them diplomatic employees of the government, were apprehended abroad while trafficking in narcotics, including two in Turkey in December 2004; police investigations in Taiwan and Japan in recent years have linked North Korea to large illicit shipments of heroin and methamphetamine, including an attempt by the North Korean merchant ship Pong Su to deliver 150 kg of heroin to Australia in April 2003

KOREA, SOUTH

INTRODUCTION

Background: An independent Korean state or collection of states has existed almost continuously for several millennia. Between its initial unification in the 7th century—from three predecessor Korean states—until the 20th century, Korea existed as a single country. It became a Chinese tributary state in 1392 with the formation of the Choson Dynasty. Korea gained independence from China at the conclusion of the Sino-Japanese War in 1895 with the Treaty of Shimonoseki. Imperial Japan, following the Russo-Japanese War in 1905, forced Korea to sign the Protectorate Treaty beginning a period of Japanese occupation. In 1910, Tokyo formally annexed the Peninsula. Korea regained its independence following Japan's surrender to the United States in 1945. After World War II, a democratic-based government (Republic of Korea, ROK) was set up in the southern half of the Korean Peninsula while a Communist-style government was installed in the north (the DPRK). During the Korean War (1950–53), US troops and UN forces fought alongside soldiers from the ROK to defend South Korea from DPRK attacks supported by China and the Soviet Union. An armistice was signed in 1953, splitting the peninsula along a demilitarized zone at about the 38th parallel. Thereafter, South Korea under the PARK Chung-hee regime achieved rapid economic growth with per capita income rising to roughly 17 times the level of North Korea. In 1993, KIM Young-sam became South Korea's first civilian president following 32 years of military rule. South Korea today is a fully functioning modern democracy. President LEE Myung-bak has pursued a policy of global engagement since taking office in February 2008, highlighted by Seoul's hosting of the G-20 summit in November 2010 and its scheduled hosting of the Nuclear Security Summit in March 2012, as well as the 2018 Winter Olympic Games. Serious tensions with North Korea have punctuated inter-Korean relations in recent years, including the North's sinking of the South Korean warship Cheonan in March 2010 and its

artillery attack on South Korean soldiers and citizens in November 2010.

ECONOMY

Economy—overview: South Korea over the past four decades has demonstrated incredible growth and global integration to become a high-tech industrialized economy. In the 1960s, GDP per capita was comparable with levels in the poorer countries of Africa and Asia. In 2004, South Korea joined the trillion dollar club of world economies, and currently is among the world's 20 largest economies. Initially, a system of close government and business ties, including directed credit and import

restrictions, made this success possible. The government promoted the import of raw materials and technology at the expense of consumer goods, and encouraged savings and investment over consumption. The Asian financial crisis of 1997–98 exposed longstanding weaknesses in South Korea's development model including high debt/equity ratios and massive short-term foreign borrowing. GDP plunged by 6.9% in 1998, and then recovered by 9% in 1999–2000. Korea adopted numerous economic reforms following the crisis, including greater openness to foreign investment and imports. Growth moderated to about 4% annually between 2003 and 2007. With the global economic downturn in late 2008, South Korean GDP growth slowed to 0.3% in 2009. In the third quarter of 2009, the economy began to recover, in large part due to export growth, low interest rates, and an expansionary fiscal policy, and growth was 3.6% in 2011. In 2011, the US-South Korea Free Trade Agreement was ratified by both governments and is projected to go into effect in early 2012. The South Korean economy's long term challenges include a rapidly aging population, inflexible labor market, and heavy reliance on exports—which comprise half of GDP.

KOSOVO

INTRODUCTION

Background: The central Balkans were part of the Roman and Byzantine Empires before ethnic Serbs migrated to the territories of modern Kosovo in the 7th century. During the medieval period, Kosovo became the center of a Serbian Empire and saw the construction of many important Serb religious sites, including many architecturally significant Serbian Orthodox monasteries. The defeat of Serbian forces at the Battle of Kosovo in 1389 led to five centuries of Ottoman rule during which large numbers of Turks and Albanians moved to Kosovo. By the end of the 19th century, Albanians replaced the Serbs as the dominant ethnic group in Kosovo. Serbia reacquired control over Kosovo from the Ottoman Empire during the First Balkan War of 1912. After World War II, Kosovo became an autonomous province

of Serbia in the Socialist Federal Republic of Yugoslavia (S.F.R.Y.) with status almost equivalent to that of a republic under the 1974 S.F.R.Y. constitution. Despite legislative concessions, Albanian nationalism increased in the 1980s, which led to riots and calls for Kosovo's independence. At the same time, Serb nationalist leaders, such as Slobodan MILOSEVIC, exploited Kosovo Serb claims of maltreatment to secure votes from supporters, many of whom viewed Kosovo as their cultural heartland. Under MILOSEVIC's leadership, Serbia instituted a new constitution in 1989 that revoked Kosovo's status as an autonomous province of Serbia. Kosovo Albanian leaders responded in 1991 by organizing a referendum that declared Kosovo independent. Under MILOSEVIC, Serbia carried out repressive measures against the Albanians in the early 1990s as the unofficial Kosovo

government, led by Ibrahim RUGOVA, used passive resistance in an attempt to try to gain international assistance and recognition of an independent Kosovo. Albanians dissatisfied with RUGOVA's passive strategy in the 1990s created the Kosovo Liberation Army and launched an insurgency. Starting in 1998, Serbian military, police, and paramilitary forces under MILOSEVIC conducted a brutal counterinsurgency campaign that resulted in massacres and massive expulsions of ethnic Albanians. Approximately 800,000 Albanians were forced from their homes in Kosovo during this time. International attempts to mediate the conflict failed, and MILOSEVIC's rejection of a proposed settlement led to a three-month NATO military operation against Serbia beginning in March 1999 that forced Serbia to agree to withdraw its military and police forces from Kosovo. UN Security Council Resolution 1244 (1999) placed Kosovo under a transitional administration, the UN Interim Administration Mission in Kosovo (UNMIK), pending a determination of Kosovo's future status. A UN-led process began in late 2005 to determine Kosovo's final status. The negotiations ran in stages between 2006 and 2007, but ended without agreement between Belgrade and Pristina. On 17 February 2008, the Kosovo Assembly declared Kosovo independent. Since then, over 85 countries have recognized Kosovo, and it has joined the International Monetary Fund and World Bank. Serbia continues to reject Kosovo's independence and in October 2008, it sought an advisory opinion from the International Court of Justice (ICJ) on the legality under international law of Kosovo's declaration of independence. The ICJ released the advisory opinion in July 2010 affirming that Kosovo's declaration of independence did not violate general principles of international law, UN Security Council Resolution 1244, or the Constitutive Framework. The opinion was closely tailored to Kosovo's unique history and circumstances.

ECONOMY

Economy—overview: Over the past few years Kosovo's economy has shown significant progress in transitioning to a market-based system and maintaining macroeconomic stability, but it is still highly dependent on the international community and the diaspora for financial and technical assistance. Remittances from the diaspora—located mainly in Germany, Switzerland, and the Nordic countries—are estimated to account for about 10% of GDP, and donor-financed activities and aid for approximately 7.5%. Kosovo's citizens are the poorest in Europe with an average annual per capita income (PPP) of \$6,500. Unemployment, around 45%, is a significant problem that encourages outward migration and black market activity. Most of Kosovo's population lives in rural towns outside of the capital, Pristina. Inefficient, near-subsistence farming is common—the result of small plots, limited mechanization, and lack of technical expertise. With international assistance, Kosovo has been able to privatize 50% of its state-owned enterprises (SOEs) by number, which represents a majority of SOE assets. Minerals and metals—including lignite, lead, zinc, nickel, chrome, aluminum, magnesium, and a wide variety of construction materials—once formed the backbone of industry, but output has declined because of ageing equipment and insufficient investment. A limited and unreliable electricity supply due to technical and financial problems is a major impediment to economic development, but Kosovo has received technical assistance to help improve accounting and controls. The US Government is cooperating with the Ministry for Energy and Mines and the World Bank to prepare a commercial tender for a project to include construction of a new power plant and the development of a coal mine to supply the new power plant

as well as two existing plants. Privatization of the distribution and supply divisions of the national energy and telecommunications corporations is also planned. In July 2008, Kosovo received pledges of \$1.9 billion from 37 countries in support of its reform priorities. In June 2009, Kosovo joined the World Bank and International Monetary Fund, and Kosovo began servicing its share of the former Yugoslavia's debt. Kosovo continues to work with the international community on measures to improve the business environment and attract foreign investment. In order to help integrate Kosovo into regional economic structures, UNMIK signed (on behalf of Kosovo) its accession to the Central Europe Free Trade Area (CEFTA) in 2006. Serbia and Bosnia previously had refused to recognize Kosovo's customs stamp or extend reduced tariff privileges for Kosovo products under CEFTA, but both countries resumed trade with Kosovo in 2011. The official currency of Kosovo is the euro, but the Serbian dinar is also used in Serb enclaves. Kosovo's tie to the euro has helped keep core inflation low. Until 2011, Kosovo maintained a budget surplus as a result of efficient value added tax (VAT) collection at the borders and inefficient budget execution; in 2011 expenditures climbed sharply. Kosovo's small size and relatively small trade sector has helped to protect it from the worst of the global financial crisis.

KUWAIT

INTRODUCTION

Background: Britain oversaw foreign relations and defense for the ruling Kuwaiti AL-SABAH dynasty from 1899 until independence in 1961. Kuwait was attacked and overrun by Iraq on 2 August 1990. Following several weeks of aerial bombardment, a US-led, UN coalition began a ground assault on 23 February 1991 that liberated Kuwait in four days. Kuwait spent more than \$5 billion to repair oil infrastructure damaged during 1990–91. The AL-SABAH family has ruled since returning to power in 1991 and reestablished an elected legislature that in recent years has become increasingly assertive. The country witnessed the historic

election in May 2009 of four women to its National Assembly. Amid the 2010–11 uprisings and protests across the Arab world, stateless Arabs, known as bidoon, staged small protests in February and March 2011 demanding citizenship, jobs, and other benefits available to Kuwaiti nationals. Youth activist groups—supported by opposition legislators and the prime minister's rivals within the ruling family—rallied in March 2011 for an end to corruption and the ouster of the prime minister and his cabinet. Similar protests continued sporadically throughout April and May. In late September 2011 government inquiries of widespread corruption drew more public anger and renewed calls for the prime minister's removal.

ECONOMY

Economy—overview: Kuwait has a geographically small, but wealthy, relatively open economy with crude oil reserves of about 104 billion barrels—about 7% of world reserves. Petroleum accounts for nearly half of GDP, 95% of export revenues, and 95% of government income. Kuwaiti officials have committed to increasing oil production to 4 million barrels per day by 2020. The rise in global oil prices throughout 2011 is reviving government consumption and economic growth. Kuwait has experienced a 20% increase in government budget revenue, which has led to higher budget expenditures, particularly wage hikes for many public sector employees. Kuwait has done little to diversify its economy, in part,

because of this positive fiscal situation, and, in part, due to the poor business climate and the acrimonious relationship between the National Assembly and the executive branch, which has stymied most movement on economic reforms. In 2010, Kuwait passed an economic development plan that pledges to spend up to \$130 billion over five years to diversify the economy away from oil, attract more investment, and boost private sector participation in the economy.

TRANSNATIONAL ISSUES

Disputes—International: Kuwait and Saudi Arabia continue negotiating a joint maritime boundary with Iran; no maritime boundary exists with Iraq in the Persian Gulf

Trafficking in persons: current situation:

Kuwait is a destination country for men and women subjected to forced labor and, to a lesser degree, forced prostitution; men and women migrate from India, Egypt, Bangladesh, Syria, Pakistan, the Philippines, Sri Lanka, Indonesia, Nepal, Iran, Jordan, Ethiopia, and Iraq to work in Kuwait, most of them in the domestic service, construction, and sanitation sectors; although most of these migrants enter Kuwait voluntarily, upon arrival some are subjected to conditions of forced labor by their sponsors and labor agents, including nonpayment of wages, long working hours without rest, deprivation of food, threats, physical or sexual abuse, and restrictions on movement, such as the withholding of passports or confinement to the workplace

tier rating: Tier 3—Kuwait does not fully comply with the minimum standards for the elimination of trafficking and is not making sufficient efforts to do so; the government did not enact its draft comprehensive anti-trafficking law; Kuwait's victim-protection measures remain weak, particularly due to its lack of proactive victim-identification procedures and continued reliance on the sponsorship system, which causes victims of trafficking to be punished for immigration violations rather than protected (2009)

KYRGYZTAN

INTRODUCTION

Background: A Central Asian country of incredible natural beauty and proud nomadic traditions, most of Kyrgyzstan was formally annexed to Russia in 1876. The Kyrgyz staged a major revolt against the Tsarist Empire in 1916 in which almost one-sixth of the Kyrgyz population was killed. Kyrgyzstan became a Soviet republic in 1936 and achieved independence in 1991 when the USSR dissolved. Nationwide demonstrations in the spring of 2005 resulted in the ouster of President Askar AKAIEV, who had run the country since 1990. Subsequent presidential elections in July 2005 were won overwhelmingly by former prime minister Kurmanbek BAKIEV. Over the next few years, the new president manipulated the parliament to accrue new powers for himself. In July 2009, after months of harassment against his opponents and media critics, BAKIEV won reelection in a presidential campaign that the international community deemed flawed. In April 2010, nationwide protests led to the resignation and expulsion of BAKIEV. His successor, Roza OTUNBAEVA, served as transitional president until Almazbek ATAMBAEV was inaugurated in December 2011. Continuing concerns include: the trajectory of democratization, endemic corruption, poor interethnic relations, and terrorism.

ECONOMY

Economy—overview: Kyrgyzstan is a poor, mountainous country with a dominant agricultural sector. Cotton, tobacco, wool, and meat are the main agricultural products, although only tobacco and cotton are exported in any quantity. Industrial exports include gold, mercury, uranium, natural gas, and electricity. The economy depends heavily on gold exports—mainly from output at the Kumtor gold mine. Following independence, Kyrgyzstan was progressive in carrying out market reforms, such as an improved regulatory system and land reform. Kyrgyzstan was the first Commonwealth of Independent States (CIS) country to be accepted into the World Trade Organization. Much of the government’s stock in enterprises has been sold. Drops in production had been severe after the breakup of the Soviet Union in December 1991, but by mid-1995, production began to recover and exports began to increase. In 2005, the BAKIEV government and international financial institutions initiated a comprehensive medium-term poverty reduction and economic growth strategy. The government made steady strides in controlling its substantial fiscal deficit, nearly closing the gap between revenues and expenditures in 2006, before boosting expenditures more than 20% in 2007–08. GDP grew about 8% annually in 2007–08, partly due to higher gold prices internationally, but slowed to

2.9% in 2009. The overthrow of President BAKIEV in April 2010 and subsequent ethnic clashes left hundreds dead and damaged infrastructure. Shrinking trade and agricultural production, as well as political instability, caused GDP to contract 0.4% in 2010. The fiscal deficit widened to 11% of GDP, reflecting significant increases in crisis-related spending, including both rehabilitation of damaged infrastructure and bank recapitalization. The economy grew 5.7% in 2011, and the budget deficit was reduced to just over 5% of GDP. Progress in reconstruction, fighting corruption, restructuring domestic industry, and attracting foreign aid and investment are key to future growth

LAOS

INTRODUCTION

Background: Modern-day Laos has its roots in the ancient Lao kingdom of Lan Xang, established in the 14th Century under King FA NGUM. For 300 years Lan Xang had influence reaching into present-day Cambodia and Thailand, as well as over all of what is now Laos. After centuries of gradual decline, Laos came under the domination of Siam (Thailand) from the late 18th century until the late 19th century when it became part of French Indochina. The Franco-Siamese Treaty of 1907 defined the current Lao border with Thailand. In 1975, the Communist Pathet Lao took control of the government ending a six-century-old monarchy and instituting a strict socialist regime closely aligned to Vietnam. A gradual, limited return to private enterprise and the liberalization of foreign investment laws began in 1988. Laos became a member of ASEAN in 1997.

ECONOMY**Economy—overview:** The government of Laos, one of the few remaining one-party communist states, began decentralizing control and encouraging private enterprise in 1986. The results, starting from an extremely low base, were striking—growth averaged 6% per year from 1988–2008 except during the short-lived drop caused by the Asian financial crisis that began in 1997. Lao's growth exceeded 7% per year during 2008–11. Despite this high growth rate, Laos remains a country with an underdeveloped infrastructure, particularly in rural areas. It has a rudimentary, but improving, road system, and limited external and internal land-line telecommunications. Electricity is available in urban areas and in many rural districts. Subsistence agriculture, dominated by rice cultivation in lowland areas, accounts for about 30% of GDP and 75% of total employment. Economic growth has reduced official poverty rates from 46% in 1992 to 26% in 2010. The economy has benefited from high foreign investment in hydropower, mining, and construction. Laos gained Normal Trade Relations status with the US in 2004, and is taking steps required to join the World Trade Organization, such as reforming import licensing. Related trade policy reforms will improve the business environment. On the fiscal side, Laos initiated a VAT tax system in 2010. Simplified investment procedures and expanded bank credits for small farmers and small entrepreneurs will improve Lao's economic prospects. The government appears committed to raising the country's profile among investors, opening the country's first stock exchange in 2011. The World Bank has declared that Laos's goal of graduating from the UN Development Program's list of least-developed countries by 2020 is achievable. According to Laotian officials, the 7th Socio-Economic Development Plan for 2011–15 will outline efforts to achieve Millennium Development Goals.**GDP (purchasing power parity):**

country comparison to the world: 162

Military—note: serving one of the world's least developed countries, the Lao People's

Armed Forces (LPAF) is small, poorly funded, and ineffectively resourced; its mission focus is border and internal security, primarily in countering ethnic Hmong insurgent groups; together with the Lao People's Revolutionary Party and the government, the Lao People's Army (LPA) is the third pillar of state machinery, and as such is expected to suppress political and civil unrest and similar national emergencies, but the LPA also has upgraded skills to respond to avian influenza outbreaks; there is no perceived external threat to the state and the LPA maintains strong ties with the neighboring Vietnamese military (2008)

TRANSNATIONAL ISSUES

Disputes—International: southeast Asian states have enhanced border surveillance to

check the spread of avian flu; talks continue on completion of demarcation with Thailand but disputes remain over islands in the Mekong River; concern among Mekong Commission members that China's construction of dams on the Mekong River and its tributaries will affect water levels; Cambodia is concerned about Laos' extensive upstream dam construction

Illicit drugs: estimated opium poppy cultivation in 2008 was 1,900 hectares, about a 73% increase from 2007; estimated potential opium production in 2008 more than tripled to 17 metric tons; unsubstantiated reports of domestic methamphetamine production; growing domestic methamphetamine problem (2007)

INTRODUCTION

Background: The name "Latvia" originates from the ancient Latgians, one of four eastern Baltic tribes that formed the ethnic core of the Latvian people (ca. 8th-12th centuries A.D.). The region subsequently came under the control of Germans, Poles, Swedes, and finally, Russians. A Latvian republic emerged following World War I, but it was annexed by the USSR in 1940—an action never recognized by the US and many other countries. Latvia reestablished its independence in 1991 following the breakup of the Soviet Union. Although the last Russian troops left in 1994, the status of the Russian minority (some 28% of the population) remains of concern to Moscow. Latvia joined both NATO and the EU in the spring of 2004.

ECONOMY

Economy—overview: Latvia is a small, open economy with exports contributing significantly to its GDP. Due to its geographical location, transit services are highly-developed, along with timber and wood-processing, agriculture and food products, and manufacturing of machinery and electronic devices. Export growth contributed to the economic recovery, however the bulk of the country's economic activity is in the services sector. Corruption continues to be an impediment to attracting foreign direct investment and Latvia's low birth rate and decreasing population are major challenges to its long-term economic vitality. Latvia's economy experienced GDP

growth of more than 10% per year during 2006-07, but entered a severe recession in 2008 as a result of an unsustainable current account deficit and large debt exposure amid the softening world economy. Triggered by the collapse of the second largest bank, GDP plunged 18% in 2009. A rebound in the export sector contributed to the economy's first real quarterly GDP growth in over two years (2.9%) in the third quarter of 2010. The IMF, EU, and other international donors provided substantial financial assistance to Latvia as part of an agreement to defend the currency's peg to the euro in exchange for the government's commitment to stringent austerity measures. The IMF/EU program successfully concluded in December 2011. The government of Prime Minister Valdis DOMBROVSKIS reduced the fiscal deficit to 7.7% of GDP in 2010, and to 4% of GDP in 2011. Riga plans to reduce the budget deficit to less than 3% of GDP in 2012 in order to meet its goal of joining the euro zone in 2014. The majority of companies, banks, and real estate have been privatized, although the state still holds sizable stakes in a few large enterprises, including 99.8% ownership of the Latvian national airline. Latvia officially joined the World Trade Organization in February, 1999 and the EU in May 2004.

TRANSNATIONAL ISSUES

Disputes—International: Russia demands better Latvian treatment of ethnic Russians in Latvia; boundary demarcated with Latvia and Lithuania; the Latvian parliament has not ratified its 1998 maritime boundary treaty with Lithuania, primarily due to concerns over oil exploration rights; as a member state that forms part of the EU's external border, Latvia has implemented the strict Schengen border rules with Russia
Illicit drugs: transshipment and destination point for cocaine, synthetic drugs, opiates, and cannabis from Southwest Asia, Western Europe, Latin America, and neighboring Balkan countries; despite improved legislation, vulnerable to money laundering due to nascent enforcement capabilities and comparatively weak regulation of off-shore companies and the gaming industry; CIS organized crime (including counterfeiting, corruption, extortion, stolen cars, and prostitution) accounts for most laundered proceeds

LEBANON

INTRODUCTION

Background: Following World War I, France acquired a mandate over the northern portion of the former Ottoman Empire province of Syria. The French separated out the region of Lebanon in 1920, and granted this area independence in 1943. A lengthy civil war (1975–90) devastated the country, but Lebanon has since made progress toward rebuilding its political institutions. Under the Ta'if Accord—the blueprint for national reconciliation—the Lebanese established a more equitable political system, particularly by giving Muslims a greater voice in the political process while institutionalizing sectarian divisions in the government. Since the end of the war, Lebanon has conducted several successful elections. Most militias have been reduced or disbanded, with the exception of Hizballah, designated by the US State Department as a Foreign Terrorist Organization, and Palestinian militant groups. During Lebanon's civil war, the Arab League legitimized in the Ta'if Accord Syria's troop deployment, numbering about 16,000 based mainly east of Beirut and in the Bekaa Valley. Israel's withdrawal from southern Lebanon in May 2000 and the passage in September 2004 of UNSCR 1559—a resolution calling for Syria to withdraw from Lebanon and end its interference in Lebanese affairs—encouraged some Lebanese groups to demand that Syria withdraw its forces. The assassination of former Prime Minister Rafiq HARIRI and 22 others in February 2005 led to massive demonstrations in Beirut against the Syrian presence (“the Cedar Revolution”), and Syria withdrew the remainder of its military forces in April 2005. In May–June 2005, Lebanon held its first legislative elections since the end of the civil war free of foreign interference, handing a majority to the bloc led by Sa'ad HARIRI, the slain prime minister's son. In July 2006, Hizballah kidnapped two Israeli soldiers leading to a 34-day conflict with Israel in which approximately 1,200 Lebanese civilians were killed. UNSCR 1701 ended the war in August 2006, and Lebanese Armed Forces

(LAF) deployed throughout the country for the first time in decades, charged with securing Lebanon's borders against weapons smuggling and maintaining a weapons-free zone in south Lebanon with the help of the UN Interim Force in Lebanon (UNIFIL). The LAF in May–September 2007 battled Sunni extremist group Fatah al-Islam in the Nahr al-Barid Palestinian refugee camp, winning a decisive victory, but destroying the camp and displacing 30,000 Palestinian residents. Lebanese politicians in November 2007 were unable to agree on a successor to Emile LAHUD when he stepped down as president, creating a political vacuum until the election of LAF Commander Gen. Michel SULAYMAN in May 2008 and the formation of a new unity government in July 2008. Legislative elections in June 2009 again produced victory for the bloc led by Sa'ad HARIRI, but a period of prolonged negotiation over the composition of the cabinet ensued. A national unity government was finally formed in November 2009 and approved by the National Assembly the following month. Inspired by the popular revolts that began in late 2010 against dictatorships across the Middle East and North Africa, marches and demonstrations in Lebanon were directed instead against sectarian politics. Although the protests gained some traction, they were limited in size and unsuccessful in changing the system. Opposition politicians collapsed the national unity government under Prime Minister Sa'ad HARIRI in February 2011. After several months in caretaker status, the government named Najib MIQATI Prime Minister.

ECONOMY

Economy—overview: Lebanon has a free-market economy and a strong laissez-faire commercial tradition. The government does not restrict foreign investment; however, the investment climate suffers from red tape, corruption, arbitrary licensing decisions, complex customs procedures, high taxes, tariffs, and fees, archaic legislation, and weak intellectual property rights. The Lebanese economy is service-oriented; main growth sectors include banking and tourism. The 1975-90 civil war seriously damaged Lebanon's economic infrastructure, cut national output by half, and derailed Lebanon's position as a Middle Eastern entrepot and banking hub. Following the civil war Lebanon rebuilt much of its war-torn physical and financial infrastructure by borrowing heavily—mostly from domestic banks—saddling the government with a huge debt burden. Pledges of economic and financial reforms made at separate international donor conferences during the 2000s have mostly gone unfulfilled, including those made during the Paris III Donor Conference in 2007 following the July 2006 war. The collapse of the government in early 2011 over its backing of the Special Tribunal for Lebanon and unrest in neighboring Syria slowed economic growth to 1.5% after four years of 8% average growth. In September 2011 the Cabinet endorsed a bill that would provide \$1.2 billion in funding to improve Lebanon's downtrodden electricity sector, but fiscal limitations will test the government's ability to invest in other areas, such as water.

TRANSNATIONAL ISSUES

Disputes—International: lacking a treaty or other documentation describing the boundary, portions of the Lebanon-Syria boundary are unclear with several sections in dispute; since 2000, Lebanon has claimed Shab'a Farms area in the Israeli-occupied Golan Heights; the roughly 2,000-strong UN Interim Force in Lebanon has been in place since 1978

Refugees and internally displaced persons:

refugees (country of origin): 405,425 (Palestinian refugees (UNRWA)); 50,000–60,000 (Iraq)

IDPs: 17,000 (1975–90 civil war, Israeli invasions); 200,000 (July–August 2006 war) (2007)

Illicit drugs: cannabis cultivation dramatically reduced to 2,500 hectares in 2002 despite continued significant cannabis consumption; opium poppy cultivation minimal; small amounts of Latin American cocaine and Southwest Asian heroin transit country on way to European markets and for Middle Eastern consumption; money laundering of drug proceeds fuels concern that extremists are benefiting from drug trafficking

LESOTHO

INTRODUCTION

Background: Basutoland was renamed the Kingdom of Lesotho upon independence from the UK in 1966. The Basuto National Party ruled for the first two decades. King MOSHOESHOE was exiled in 1990, but returned to Lesotho in 1992 and was reinstated in 1995 and subsequently succeeded by his son, King LETSIE III, in 1996. Constitutional government was restored in 1993 after seven years of military rule. In 1998, violent protests and a military

mutiny following a contentious election prompted a brief but bloody intervention by South African and Botswana military forces under the aegis of the Southern African Development Community. Subsequent constitutional reforms restored relative political stability. Peaceful parliamentary elections were held in 2002, but the National Assembly elections of February 2007 were hotly contested and aggrieved parties continue to dispute how the electoral law was applied to award proportional seats in the Assembly.

GOVERNMENT

leader of the majority party in the Assembly automatically becomes prime minister.

the monarchy is hereditary, but, under the terms of the constitution that came into effect after the March 1993 election, the monarch is a "living symbol of national unity" with no executive or legislative powers; under traditional law the college of chiefs has the power to depose the monarch, determine who is next in the line of succession, or who shall serve as regent in the event that the successor is not of mature age

Legislative branch: bicameral Parliament consists of the Senate (33 members—22 principal chiefs and 11 other members appointed by the ruling party) and the Assembly (120 seats, 80 by popular vote and 40 by proportional vote; members elected by popular vote to serve five-year terms) *elections:* last held on 26 May 2012 (next to be held in 2017)

election results: percent of vote by party—NA; seats by party—DC 48, ABC 30, LCD 26, BNP 5, PFD 3, NIP 2, other 6

Judicial branch: High Court (chief justice appointed by the monarch acting on the advice of the prime minister); Court of Appeal; Magistrate Courts; customary or traditional courts

National anthem: *name:* "Lesotho fatse la bo nta'ta rona" (Lesotho, Land of Our Fathers) *lyrics/music:* Francois COILLARD/Ferdinand-Samuel LAUR

note: adopted 1967; the anthem's music derives from an 1823 Swiss songbook

ECONOMY

Economy—overview: small, landlocked, and mountainous, Lesotho relies on remittances from Basotho employed in South Africa, customs duties from the Southern Africa Customs Union (SACU), and export revenue for the majority of government revenue. However, the government has recently strengthened its tax system to reduce dependency on customs duties. Completion of a major hydropower facility in January 1998 permitted the sale of water to South Africa and generated royalties for Lesotho. Lesotho produces about 90% of its own electrical power needs. As the number of mineworkers has declined steadily over the past several years, a small manufacturing base has developed based on farm products that support the milling, canning, leather, and jute industries, as well as an apparel-assembly sector. Despite Lesotho's market-based economy being heavily tied to its neighbor South Africa, the US is an important trade partner because of the export sector's heavy dependence on apparel exports. Exports have grown significantly because of the trade benefits contained in the Africa Growth and Opportunity Act. Most of the labor force is engaged in subsistence agriculture, especially livestock herding, although drought has decreased agricultural activity. The extreme inequality in the distribution of income remains a major drawback. Lesotho has signed an Interim Poverty Reduction and Growth Facility with the IMF. In July 2007, Lesotho signed a Millennium Challenge Account Compact with the US worth \$362.5 million. Economic growth dropped in 2009, due mainly to the effects of the global economic crisis as demand for the country's exports declined and SACU revenue fell precipitously when South Africa—the primary contributor to the SACU revenue pool—went into recession, but growth returned to 3.6% in 2010 and 5.2% in 2011.

Military—note: Lesotho's declared policy is maintenance of its independent sovereignty and preservation of internal security; in practice, external security is guaranteed by South Africa; restructuring of the Lesotho Defense Force (LDF) and Ministry of Defense and Public Service over the past five years has focused on subordinating the defense apparatus to civilian control and restoring the LDF's cohesion; the restructuring has considerably improved capabilities and professionalism, but the LDF is disproportionately large for a small, poor country; the government has outlined a reduction to a planned 1,500-man strength, but these plans have met with vociferous resistance from the political opposition and from inside the LDF (2008)

LIBERIA

INTRODUCTION

Background: Settlement of freed slaves from the US in what is today Liberia began in 1822; by 1847, the Americo-Liberians were able to establish a republic. Wil-

liam TUBMAN, president from 1944–71, did much to promote foreign investment and to bridge the economic, social, and political gaps between the descendants of the original settlers and the inhabitants of the interior. In 1980, a military coup

led by Samuel DOE ushered in a decade of authoritarian rule. In December 1989, Charles TAYLOR launched a rebellion against DOE's regime that led to a prolonged civil war in which DOE himself was killed. A period of relative peace in 1997

allowed for elections that brought TAYLOR to power, but major fighting resumed in 2000. An August 2003 peace agreement ended the war and prompted the resignation of former president Charles TAYLOR, who faces war crimes charges in The Hague related to his involvement in Sierra Leone's civil war. After two years of rule by a transitional government, democratic elections in late 2005 brought President Ellen JOHNSON SIRLEAF to power. The UN Mission in Liberia (UNMIL) maintains a strong presence throughout the country, but the security situation is still fragile and the process of rebuilding the social and economic structure of this war-torn country continues.

ECONOMY

Economy—overview: Liberia is a low income country heavily reliant on foreign assistance for revenue. Civil war and government mismanagement destroyed much of Liberia's economy, especially the infrastructure in and around the capital, Monrovia. Many businesses fled the country, taking capital and expertise with them, but with the conclusion of fighting and the installation of a democratically-elected government in 2006, several have returned. Liberia has the distinction of having the highest ratio of direct foreign investment to GDP in the world. Richly endowed with water, mineral resources, forests, and a climate favorable to agriculture, Liberia had

been a producer and exporter of basic products, primarily raw timber and rubber and is reviving those sectors. Local manufacturing, mainly foreign owned, had been small in scope. President JOHNSON SIRLEAF, a Harvard-trained banker and administrator, has taken steps to reduce corruption, build support from international donors, and encourage private investment. Embargos on timber and diamond exports have been lifted, opening new sources of revenue for the government and Liberia shipped its first major timber exports to Europe in 2010. The country reached its Heavily Indebted Poor Countries initiative completion point in 2010 and nearly \$5 billion of international debt was permanently eliminated. This new status will enable Liberia to establish a sovereign credit rating and issue bonds. Liberia's Paris Club creditors agreed to cancel Liberia's debt as well. The IMF has completed the sixth review of Liberia's extended credit facility, bringing total disbursements to over \$379 million. The African Development Bank approved a grant of \$48 million in 2011 to support economic governance and competitiveness. Rebuilding infrastructure and raising incomes will depend on generous financial and technical assistance from donor countries and foreign investment in key sectors, such as infrastructure and power generation.

in turn, shelters refugees fleeing turmoil in Cote d'Ivoire; despite the presence of over 9,000 UN forces in Cote d'Ivoire since 2004, ethnic conflict continues to spread into neighboring states who can no longer send their migrant workers to Ivorian cocoa plantations; UN sanctions ban Liberia from exporting diamonds and timber

Illicit drugs: transshipment point for Southeast and Southwest Asian heroin

and South American cocaine for the European and US markets; corruption, criminal activity, arms-dealing, and diamond trade provide significant potential for money laundering, but the lack of well-developed financial system limits the country's utility as a major money-laundering center

LIBYA

INTRODUCTION

Background: The Italians supplanted the Ottoman Turks in the area around Tripoli in 1911 and did not relinquish their hold until 1943 when defeated in World War II. Libya then passed to UN administration and achieved independence in 1951. Following a 1969 military coup, Col. Muammar Abu Minyar al-QADHAFI began to espouse his own political system, the Third Universal Theory. The system was a combination of socialism and Islam derived in part from tribal practices and was supposed to be implemented by the Libyan people themselves in a unique form of "direct democracy." QADHAFI used oil funds during the 1970s and 1980s to promote his ideology outside Libya, supporting subversives and terrorists abroad to hasten the end of Marxism and capitalism. In addition, beginning in 1973, he engaged in military operations in northern Chad's Aouzou Strip to gain access to minerals and to use as a base of influence in Chadian politics—but was forced to retreat in 1987. UN sanctions in 1992 isolated QADHAFI politically following the downing of Pan Am Flight 103 over Lockerbie, Scotland. During the 1990s, QADHAFI began to rebuild his relationships with Europe. UN sanctions were suspended in April 1999 and finally lifted in September 2003 after Libya accepted responsibility for the Lockerbie bombing. In December 2003, Libya announced that it had agreed to reveal and end its programs to develop weapons of mass destruction and to renounce terrorism. QADHAFI sub-

sequently made significant strides in normalizing relations with Western nations. The US rescinded Libya's designation as a state sponsor of terrorism in June 2006. In August 2008, the US and Libya signed a bilateral comprehensive claims settlement agreement to compensate claimants in both countries who allege injury or death at the hands of the other country, including the Lockerbie bombing, the LaBelle disco bombing, and the UTA 772 bombing. In October 2008, the US Government received \$1.5 billion pursuant to the agreement to distribute to US national claimants, and as a result effectively normalized its bilateral relationship with Libya. The two countries then exchanged ambassadors for the first time since 1973 in January 2009. Libya in May 2010 was elected to its first three-year seat on the UN Human Rights Council, prompting protests from international non-governmental organizations and human rights campaigners. Unrest that began in several Near Eastern and North African countries in late December 2010 spread to several Libyan cities in early 2011. In March 2011, a Transitional National Council (TNC) was formed in Benghazi with the stated aim of overthrowing the QADHAFI regime and guiding the country to democracy. In response to QADHAFI's harsh military crackdown on protesters, the UN Security Council adopted Resolution 1973, which demanded an immediate ceasefire and authorized the international community to establish a no-fly zone over Libya. After several months of see-saw fighting, anti-QADHAFI forces in August 2011 captured the capital, Tripoli. In mid-September, the UN General Assembly voted to recognize the TNC as the legitimate interim governing body of Libya. The TNC on 23 October officially declared the country liberated following the defeat of the last remaining pro-QADHAFI stronghold and QADHAFI's death, and plans to transition toward elections, the formation of a constitution, and a new government.

note: adopted 1969; the anthem was originally a battle song for the Egyptian Army in the 1956 Suez War

ECONOMY

Economy—overview: The Libyan economy depends primarily upon revenue from hydrocarbons, which contribute about 95% of export earnings, 65% of GDP, and 80% of government revenue. Substantial revenue from the energy sector coupled with a small population give Libya one of the highest per capita GDPs in Africa, but little of this income flowed to the lower orders of society. Libya in the past five years made progress on economic reform as part of a broader campaign to reintegrate the country into the international fold. This effort picked up steam after UN sanctions were lifted in September 2003 and after Libya announced in December 2003 that it would abandon programs to build weapons of mass destruction. The process of lifting US unilateral sanctions began in the spring of 2004; all sanctions were removed by June 2006, helping Libya attract greater foreign direct investment, especially in the energy sector. Libyan oil and gas licensing rounds drew high international interest, but new rounds are unlikely until Libya establishes a more permanent government. The National Oil Corporation (NOC) set a goal of nearly doubling oil production to 3 million bbl/day by 2012, but the goal is unlikely to be met by the target date. Libya faces a long road ahead in liberalizing its primarily socialist economy, but the revolution probably increases the opportunity for entrepreneurial activity and the evolution of a more market-based economy. The service and construction sectors, which account for roughly 20% of GDP, expanded over the past five years and could become a larger share of GDP after political volatility subsides. Climatic conditions and poor soils severely limit agricultural output, and Libya imports about 75% of its food. Libya's primary agricultural water source remains the Great Manmade River Project, but significant resources will be needed in desalinization to meet growing water demands.

TRANSNATIONAL ISSUES

Disputes—International: dormant disputes include Libyan claims of about 32,000 sq km still reflected on its maps of south-eastern Algeria and the FLN's assertions of a claim to Chirac Pastures in southeastern Morocco; various Chadian rebels from the Aozou region reside in southern Libya

Refugees and internally displaced persons:

Trafficking in persons: *current situation:*

Libya is a transit and destination country for men and women from sub-Saharan Africa and Asia trafficked for the purposes of forced labor and commercial sexual exploitation; Libya has experienced internal unrest, stranding many foreign workers in the country under harsh and unsafe conditions

tier rating: Tier 3—the Libyan Government failed to demonstrate significant efforts to investigate and prosecute trafficking offenses or to protect trafficking victims; the government's policies and practices with respect to undocumented migrant workers resulted in Libyan authorities also punishing trafficking victims for unlawful acts that were committed as a result of their being trafficked; following the outbreak of civil unrest in February 2011, accurate information regarding the situation in Libya has become very limited (2008)

LIECHTENSTEIN

INTRODUCTION

Background: The Principality of Liechtenstein was established within the Holy Roman Empire in 1719. Occupied by both French and Russian troops during the Napoleonic wars, it became a sovereign state in 1806 and joined the Germanic Confederation in 1815. Liechtenstein became fully independent in 1866 when the Confederation dissolved. Until the end of World War I, it was closely tied to Austria, but the economic devastation

caused by that conflict forced Liechtenstein to enter into a customs and monetary union with Switzerland. Since World War II (in which Liechtenstein remained neutral), the country's low taxes have spurred outstanding economic growth. In 2000, shortcomings in banking regulatory oversight resulted in concerns about the use of financial institutions for money laundering. However, Liechtenstein implemented anti-money-laundering legislation and a Mutual Legal Assistance Treaty with the US that went into effect in 2003.

ECONOMY

Economy—overview: Despite its small size and limited natural resources, Liechtenstein has developed into a prosperous, highly industrialized, free-enterprise economy with a vital financial service sector and likely the second highest per capita income in the world. The Liechtenstein economy is widely diversified with a large number of small businesses. Low business taxes—the maximum tax rate is 20%—and easy incorporation rules have induced many holding companies to establish nominal offices in Liechtenstein providing 30% of state revenues. The country participates in a customs union with Switzerland and uses the Swiss franc as its national currency. It imports more than 90% of its energy requirements. Liechtenstein has been a member of the European Economic Area (an organization serving as a bridge between the European Free Trade Association (EFTA) and the EU) since May 1995. The government is working to harmonize its economic policies with those of an integrated Europe. Since 2008, Liechtenstein has faced renewed international pressure—particularly from Germany—to improve transparency in its banking and tax systems. In December 2008, Liechtenstein signed a Tax Information Exchange Agreement with the US. Upon Liechtenstein's conclusion of 12 bilateral information-sharing agreements, the OECD in October 2009 removed the principality from its "grey list" of countries that had yet to implement the organiza-

tion's Model Tax Convention. By the end of 2010, Liechtenstein had signed 25 Tax Information Exchange Agreements or Double Tax Agreements. In 2011 Liechtenstein joined the Schengen area, which allows passport-free travel across 26 European countries.

Background: Lithuanian lands were united under MINDAUGAS in 1236; over the next century, through alliances and conquest, Lithuania extended its territory to include most of present-day Belarus and Ukraine. By the end of the 14th century Lithuania was the largest state in Europe. An alliance with Poland in 1386 led the two countries into a union through the person of a common ruler. In 1569, Lithuania and Poland formally united into a single dual state, the Polish-Lithuanian Commonwealth. This entity survived until 1795 when its remnants were partitioned by surrounding countries. Lithuania regained its independence following World War I but was annexed by the USSR in 1940—an action never recognized by the US and many other countries. On 11 March 1990, Lithuania became the first of the Soviet republics to declare its independence, but Moscow did not recognize this proclamation until September of 1991 (following the abortive coup in Moscow). The last Russian troops withdrew in 1993. Lithuania subsequently restructured its economy for integration into Western European institutions; it joined both NATO and the EU in the spring of 2004.

ECONOMY

Economy—overview: Lithuania gained membership in the World Trade Organization and joined the EU in May 2004. Despite Lithuania's EU accession, Lithuania's trade with its Central and Eastern European neighbors, and Russia in particular, accounts for a significant share of total trade. Foreign investment and business support have helped in the transition from the old command economy to a market economy. Lithuania's economy grew on average 8% per year for the four years prior to 2008 driven by exports and domestic demand. However, GDP plunged nearly 15% in 2009—the three former Soviet Baltic republics were among the hardest hit by the 2008–09 financial crisis. In 2009, the government launched a high-profile campaign, led by Prime Minister KUBILIUS, to attract foreign investment and to develop export markets, and the government's steadfast commitment to broad economic reforms has been vital in Lithuania's quick recovery from a deep recession—GDP grew 1.3% in 2010 and jumped 5.8% in 2011, making Lithuania one of the fastest growing economies in the EU. However, unemployment—at 15.6% in 2011—remains stubbornly high. Lithuania in 2011 also began to unbundle its energy networks in order to reduce its dependence on Russian energy.

TRANSNATIONAL ISSUES

Disputes—international: Lithuania and Russia committed to demarcating their boundary in 2006 in accordance with the land and maritime treaty ratified by Russia in May 2003 and by Lithuania in 1999; Lithuania operates a simplified transit regime for Russian nationals traveling from the Kaliningrad coastal exclave into Russia, while still conforming, as a EU member state having an external border with a non-EU member, to strict Schengen border rules; boundary demarcated with Latvia and Lithuania; as of January 2007, ground demarcation of the boundary with Belarus was complete and mapped with final ratification documents in preparation

Illicit drugs: transshipment and destination point for cannabis, cocaine, ecstasy, and opiates from Southwest Asia, Latin America, Western Europe, and neighboring Baltic countries; growing production of high-quality amphetamines, but limited production of cannabis, meth-amphetamines; susceptible to money laundering despite changes to banking legislation

LUXEMBOURG**INTRODUCTION**

Background: Founded in 963, Luxembourg became a grand duchy in 1815 and an independent state under the Netherlands. It lost more than half of its territory to Belgium in 1839 but gained a larger measure of autonomy. Full independence was attained in 1867. Overrun by Germany in both world wars, it ended its neutrality in 1948 when it entered into the Benelux Customs Union and when it joined NATO the following

year. In 1957, Luxembourg became one of the six founding countries of the European Economic Community (later the European Union), and in 1999 it joined the euro currency area.

ECONOMY

Economy—overview: This small, stable, high-income economy—benefiting from its proximity to France, Belgium, and Germany—has historically featured solid growth, low inflation, and low unemployment. The industrial sector, initially dominated by steel, has become increasingly diversified to include chemicals, rubber, and other products. Growth in the financial sector, which now accounts for about 28% of GDP, has more than compensated for the decline in steel. Most banks are foreign-owned and have extensive foreign dealings, but Luxembourg has lost some of its advantages as a tax haven because of OECD and EU pressure. The economy depends on foreign and cross-border workers for about 60% of its labor force. Luxembourg, like all EU members, suffered from the global economic crisis that began in late 2008, but unemployment has trended below the EU average. Following strong expansion from 2004 to 2007, Luxembourg's economy contracted 3.6% in 2009, but rebounded in 2010–11. The country continues to enjoy an extraordinarily high standard of living—GDP per capita ranks among the highest in the world, and is the highest in the euro zone. Turmoil in the world financial markets and lower global demand during 2008–09 prompted the government to inject capital into the banking sector and implement stimulus measures to boost the

economy. Government stimulus measures and support for the banking sector, however, led to a 5% government budget deficit in 2009. Nevertheless, the deficit was cut to 1.1% in 2011. Even during the financial crisis and recovery, Luxembourg retained the highest current account surplus as a share of GDP in the euro zone, owing largely to their strength in financial services. Public debt remains among the lowest of the region although it has more than doubled since 2007 as percentage of GDP.

INTRODUCTION

Background: Colonized by the Portuguese in the 16th century, Macau was the first European settlement in the Far East. Pursuant to an agreement signed by China and Portugal on 13 April 1987, Macau became the Macau Special Administrative Region (SAR) of the People's Republic of China on 20 December 1999. In this agreement, China promised that, under its "one country, two systems" formula, China's political and economic system would not be imposed on Macau, and that Macau would enjoy a high degree of autonomy in all matters except foreign affairs and defense for the next 50 years.

ECONOMY

Economy—overview: After opening up its locally-controlled casino industry to foreign competition in 2001, the territory attracted tens of billions of dollars in foreign investment, transforming Macau into one of the world's largest gaming centers. Macau's gaming and tourism businesses were fueled by China's decision to relax travel restrictions on Chinese citizens wishing to visit Macau. By 2006, Macau's gaming revenue surpassed that of the Las Vegas strip, and gaming-related taxes accounted for more than 70% of total government revenue. In 2008, Macau introduced measures to cool the rapidly developing sector. Macau's economy slowed dramatically in 2009 as a result of the global economic slowdown, but strong growth resumed in 2010, largely on the back of tourism from mainland China and the gaming sectors. This city of 550,000 hosted nearly 25 million visitors in 2010. Almost 53% came from mainland China. Macau's traditional manufacturing industry slowed greatly since the termination of the Multi-Fiber Agreement in 2005. The Closer Economic Partnership Agreement (CEPA) between Macau and mainland China that came into effect in January 2004 offers Macau-made products tariff-free access to the mainland; nevertheless, China is Macau's second largest goods export market, behind Hong Kong, and followed by the United States. However, exports in 2010 were less than US\$900 million, while gaming receipts were almost US\$24 billion, a 58% increase over 2009. Macau continues to face the challenges of managing its growing casino industry, money-laundering, and the need to diversifying the economy away from heavy dependence on gaming revenues. Macau's currency, the pataca, is closely tied to the Hong Kong dollar, which is also freely accepted in the territory.

MACEDONIA

INTRODUCTION

Background: Macedonia gained its independence peacefully from Yugoslavia in 1991. Greece's objection to the new state's use of what it considered a Hellenic name and symbols delayed international recognition, which occurred under the provisional designation of "the Former Yugoslav Republic of Macedonia." In 1995, Greece lifted a 20-month trade embargo and the two countries agreed to normalize relations, but the issue of the name remained unresolved and negotiations for a solution are ongoing. Since 2004, the United States and 133 other nations have recog-

nized Macedonia by its constitutional name, Republic of Macedonia. Some ethnic Albanians, angered by perceived political and economic inequities, launched an insurgency in 2001 that eventually won the support of the majority of Macedonia's ethnic Albanian population and led to the internationally-brokered Ohrid Framework Agreement, which ended the fighting and established guidelines for the creation of new laws that enhanced the rights of minorities. Fully implementing the Framework Agreement, maintaining momentum on democratic reforms, and stimulating economic growth and development continue to be challenges

for Macedonia, although progress has been made over the past several years.

ECONOMY

Economy—overview: Macedonia is vulnerable to economic developments in Europe—due to strong banking and trade ties—and dependent on regional integration and progress toward EU membership for continued economic growth. At independence in September 1991, Macedonia was the least developed of the Yugoslav republics, producing a mere 5% of the total federal output of goods and services. The collapse of the Socialist Federal Republic of Yugoslavia ended transfer payments from the central government and eliminated advantages from inclusion in a *de facto* free trade area. An absence of infrastructure, UN sanctions on the downsized Yugoslavia, and a Greek economic embargo over a dispute about the country's constitutional name and flag hindered economic growth until 1996. Since then, Macedonia has maintained macroeconomic stability with low inflation, but it has so far lagged the region in attracting foreign investment and creating jobs, despite making extensive fiscal and business sector reforms. Official unemployment remains high at 29.1%, but may be overstated based on the existence of an extensive gray market, estimated to be between 20% and 45% of GDP, that is not captured by official statistics. In the wake of the global economic downturn, Macedonia has experienced decreased foreign direct investment, lowered credit availability, and a large trade deficit. However, as a result of conservative fiscal policies and a sound financial system, in 2010 the country credit rating improved slightly to BB+ and was kept at that level in 2011. Macroeconomic stability has been maintained by a prudent monetary policy, which keeps the domestic currency pegged against the euro. As a result, GDP growth was modest, but positive, in 2010 and 2011, and inflation was under control.

Illicit drugs: major transshipment point for Southwest Asian heroin and hashish; minor transit point for South American cocaine destined for Europe; although not a financial center and most criminal activity is thought to be domestic, money laundering is a problem due to a mostly cash-based economy and weak enforcement

MADAGASCAR

INTRODUCTION

Background: Formerly an independent kingdom, Madagascar became a French colony in 1896 but regained independence in 1960. During 1992–93, free presidential and National Assembly elections were held ending 17 years of single-party rule. In 1997, in the second presidential race, Didier RATSIRAKA, the leader during the 1970s and 1980s, was returned to the presidency. The 2001 presidential election was contested between the followers of Didier RATSIRAKA and Marc RAVALOMANANA, nearly causing secession of half of the country. In April 2002, the

High Constitutional Court announced RAVALOMANANA the winner. RAVALOMANANA achieved a second term following a landslide victory in the generally free and fair presidential elections of 2006. In early 2009, protests over increasing restrictions on opposition press and activities resulted in RAVALOMANANA stepping down and the presidency was conferred to the mayor of Antananarivo, Andry RAJOELINA. Numerous activities have been made by regional and international organizations to resolve the subsequent political gridlock by forming a power-sharing government. In late 2011, RAJOELINA appointed a new cabinet, and the country appeared to be moving towards new elections sometime in 2012.

ECONOMY

Economy—overview: After discarding
socialist economic policies in the mid-
1990s, Madagascar followed a World
Bank- and IMF-led policy of privatization
and liberalization that has been under-
mined since the start of the political cri-
sis. This strategy placed the country on a
slow and steady growth path from an
extremely low level. Agriculture, includ-
ing fishing and forestry, is a mainstay of
the economy, accounting for more than
one-fourth of GDP and employing 80%
of the population. Exports of apparel boomed
in recent years primarily due to duty-free
access to the US, however, Madagascar's
failure to comply with the requirements
of the African Growth and Opportunity
Act (AGOA) led to the termination of
the country's duty-free access in January
2010 and a sharp fall in textile production.
Deforestation and erosion, aggravated by
the use of firewood as the primary source
of fuel, are serious concerns. The current
political crisis, which began in early 2009,
has dealt additional blows to the economy.
Tourism dropped more than 50% in 2009
compared with the previous year, and many
investors are wary of entering the uncertain
investment environment.

MALAWI

INTRODUCTION

Background: Established in 1891, the British protectorate of Nyasaland became the independent nation of Malawi in 1964. After three decades of one-party rule under President Hastings Kamuzu BANDA the country held multiparty elections in 1994, under a provisional constitution that came into full effect the following year. President Bingu wa MUTHARIKA, elected in May 2004 after a failed attempt by the previous president to amend the constitution to permit another term, struggled to assert his authority against his predecessor and subsequently started his own party, the Democratic Progressive Party (DPP) in 2005. MUTHARIKA was reelected to a second term in May 2009. As president, he oversaw some economic improvement. He died abruptly in April 2012 and was succeeded by his vice president, Joyce BANDA. Population growth, increasing pressure on agricultural lands, corruption, and the

spread of HIV/AIDS pose major problems for Malawi.

ECONOMY

Economy—overview: Landlocked Malawi ranks among the world's most densely populated and least developed countries. The economy is predominately agricultural with about 80% of the population living in rural areas. Agriculture, which has benefited from fertilizer subsidies since 2006, accounts for one-third of GDP and 90% of export revenues. The performance of the tobacco sector is key to short-term growth as tobacco accounts for more than half of exports. The economy depends on substantial inflows of economic assistance from the IMF, the World Bank, and individual donor nations. In 2006, Malawi was approved for relief under the Heavily Indebted Poor Countries (HIPC) program. In December 2007, the US granted Malawi eligibility status to receive financial support within the Millennium Challenge Corporation (MCC) initiative. The government faces many challenges including developing a market economy, improving educational facilities, facing up to environmental problems, dealing with the rapidly growing problem of HIV/AIDS, and satisfying foreign donors that fiscal discipline is being tightened. Since 2005 President MUTHARIKA's government has exhibited improved financial discipline under the guidance of Finance Minister Goodall GONDWE and signed a three year Poverty Reduction and Growth Facility worth \$56 million with the IMF. The government has announced infrastructure projects that could yield improvements, such as a new oil pipeline for better fuel access, and the potential for a waterway link through Mozambican rivers to the ocean for better transportation options. Since 2009, however, Malawi has experienced some setbacks, including a general shortage of foreign exchange, which has damaged its ability to pay for imports, and fuel shortages that hinder transportation

and productivity. Investment fell 23% in 2009, and continued to decline in 2010. The government has failed to address barriers to investment such as unreliable power, water shortages, poor telecommunications infrastructure,

MALAYSIA

INTRODUCTION

Background: During the late 18th and 19th centuries, Great Britain established colonies and protectorates in the area of current Malaysia; these were occupied by Japan from 1942 to 1945. In 1948, the British-ruled territories on the Malay Peninsula except Singapore formed the Federation of Malaya, which became independent in 1957. Malaysia was formed in 1963 when the former British colonies of Singapore as well as Sabah and Sarawak on the northern coast of Borneo joined the Federation. The first several years of the country's independence were marred by a Communist insurgency, Indonesian confrontation with Malaysia, Philippine claims to Sabah, and Singapore's departure from the Federation in 1965. During the 22-year term of Prime Minister MAHATHIR bin Mohamad (1981–2003), Malaysia was successful in diversifying its economy from dependence on exports of raw materials to the development of manufacturing, services, and tourism. Prime Minister Mohamed NAJIB bin Abdul Razak (in office since April 2009) has continued these pro-business policies.

Flag description: 14 equal horizontal stripes of red (top) alternating with white (bottom); there is a blue rectangle in the upper hoist-side corner bearing a yellow crescent and a yellow 14-pointed star; the flag is often referred to as Jalur Gemilang (Stripes of Glory); the 14 stripes stand for the equal status in the federation of the 13 member states and the federal government; the 14 points on the star represent the unity between these entities; the crescent is a traditional symbol of Islam; blue symbolizes the unity of the Malay people and yellow is the royal color of Malay rulers

note: the design is based on the flag of the US

National symbol(s): tiger

National anthem:

name: "Negaraku" (My Country)

lyrics/music: collective, led by Tunku ABDUL RAHMAN/Pierre Jean DE BERANGER

note: adopted 1957; the full version is only performed in the presence of the king; the tune, which was adopted from a popular French melody titled "La Rosalie," was originally the anthem of the state of Perak

ECONOMY

Economy—overview: Malaysia, a middle-income country, has transformed itself since the 1970s from a producer of raw materials into an emerging multi-sector economy. Under current Prime Minister NAJIB, Malaysia is attempting to achieve high-income status by 2020 and to move farther up the value-added production chain by attracting investments in Islamic finance, high technology industries, biotechnology, and services. The NAJIB administration also is continuing efforts to boost domestic demand and reduce the economy's dependence on exports. Nevertheless, exports—particularly of electronics, oil and gas, palm oil and rubber—remain a significant driver of the economy. As an oil and gas exporter, Malaysia has profited from higher world energy prices, although the rising cost of domestic gasoline and diesel fuel, combined

with strained government finances, has forced Kuala Lumpur to begin to reduce government subsidies. The government is also trying to lessen its dependence on state oil producer Petronas. The oil and gas sector supplies more than 40% of government revenue. The central bank maintains healthy foreign exchange reserves, and a well-developed regulatory regime has limited Malaysia's exposure to riskier financial instruments and the global financial crisis. Nevertheless, Malaysia could be vulnerable to a fall in commodity prices or a general slowdown in global economic activity because exports are a major component of GDP. In order to attract increased investment, NAJIB has raised possible revisions to the special economic and social preferences accorded to ethnic Malays under the New Economic Policy of 1970, but he has encountered significant opposition, especially from Malay nationalists and other vested interests.

TRANSNATIONAL ISSUES

Disputes—international: while the 2002 “Declaration on the Conduct of Parties in the South China Sea” has eased tensions over the Spratly Islands, it is not the legally binding “code of conduct” sought by some parties; Malaysia was not party to the March 2005 joint accord among the national oil companies of China, the Philippines, and Vietnam on conducting marine seismic activities in the Spratly

Islands; disputes continue over deliveries of fresh water to Singapore, Singapore's land reclamation, bridge construction, and maritime boundaries in the Johor and Singapore Straits; in 2008, ICJ awarded sovereignty of Pedra Branca (Pulau Batu Puteh/Horsburgh Island) to Singapore, and Middle Rocks to Malaysia, but did not rule on maritime regimes, boundaries, or disposition of South Ledge; land and maritime negotiations with Indonesia are ongoing, and disputed areas include the controversial Tanjung Datu and Camar Wulan border area in Borneo and the maritime boundary in the Ambalat oil block in the Celebes Sea; separatist violence in Thailand's predominantly Muslim southern provinces prompts measures to close and monitor border with Malaysia to stem terrorist activities; Philippines retains a dormant claim to Malaysia's Sabah State in northern Borneo; Per Letters of Exchange signed in 2009, Malaysia in 2010 ceded two hydrocarbon concession blocks to Brunei in exchange for Brunei's

sultan dropping claims to the Limbang corridor, which divides Brunei; piracy remains a problem in the Malacca Strait

Refugees and internally displaced persons: *refugees (country of origin):* 15,174 (Indonesia); 21,544 (Burma) (2007)

Trafficking in persons: *current situation:* Malaysia is a destination and, to a lesser extent, a source and transit country for women and children trafficked for the purpose of commercial sexual exploitation, and men, women, and children for forced labor; Malaysia is mainly a destination country for men, women, and children who migrate willingly from countries including Indonesia, Nepal, India, Thailand, China, the Philippines, Burma, Cambodia, Bangladesh, Pakistan, and Vietnam to work, some of whom are subjected to conditions of involuntary servitude by Malaysian employers in the domestic, agricultural, construction, plantation, and industrial sectors; a small number of Malaysian citizens were reportedly trafficked internally

and abroad to Singapore, China, and Japan for commercial sexual exploitation

tier rating: Tier 2 Watch List—the Government of Malaysia does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; while the government increased the number of convictions obtained under the Anti-Trafficking in Persons and Anti-Smuggling of Migrants Act during the year and continued public awareness efforts on trafficking, it did not effectively investigate and prosecute labor trafficking cases, and failed to address problems of government complicity in trafficking and lack of effective victim care and counseling by authorities (2009)

Illicit drugs: drug trafficking prosecuted vigorously and carries severe penalties; heroin still primary drug of abuse, but synthetic drug demand remains strong; continued ecstasy and methamphetamine producer for domestic users and, to a lesser extent, the regional drug market

MALDIVES

INTRODUCTION

Background: A sultanate since the 12th century, the Maldives became a British protectorate in 1887. It became a republic in 1968, three years after independence. President Maumoon Abdul GAYOOM dominated the islands' political scene for 30 years, elected to six successive terms by single-party referendums. Following riots in the capital Male in August 2003, the president and his government pledged to embark upon democratic reforms including a more representative political system and expanded political freedoms. Progress was sluggish, however, and many promised reforms were slow to be realized. Nonetheless, political parties were legalized in 2005. In June 2008, a constituent assembly-termed the "Special Majlis"—finalized a new constitution, which was ratified by the president in August. The first-ever

presidential elections under a multi-candidate, multi-party system were held in October 2008. GAYOOM was defeated in a runoff poll by Mohamed NASHEED, a political activist who had been jailed several years earlier by the former regime. President NASHEED faced a number of challenges including strengthening democracy and combating poverty and drug abuse. In early February 2012, after several weeks of street protests following his sacking of a top judge, NASHEED resigned the presidency and handed over power to Vice President Mohammed WAHEED Hassan Maniku. Maldives officials have played a prominent role in international climate change discussions (due to the islands' low elevation and the threat from sea-level rise) on the United Nations Human Rights Council, and in encouraging regional cooperation, especially between India and Pakistan.

ECONOMY

Economy—overview: Tourism, Maldives' largest economic activity, accounts for 28% of GDP and more than 60% of foreign exchange receipts. Over 90% of government tax revenue comes from import duties and tourism-related taxes. Fishing is the second leading sector, but the fish catch has dropped sharply in recent years. Agriculture and manufacturing continue to play a lesser role in the economy, constrained by the limited availability of cultivable land and the shortage of domestic labor. Most staple foods must be imported. In the last decade, real GDP growth averaged around 6% per year except for 2005, when GDP declined following the Indian Ocean tsunami, and in 2009, when GDP shrank by 7.5% as tourist arrivals declined and capital flows plunged in the wake of the global financial crisis. Falling tourist arrivals and fish exports, combined with high government spending on social needs, subsidies, and civil servant salaries contributed to a balance of payments crisis, which was eased with a December 2009, \$79.3 million IMF standby agreement. However, after the first two disbursements, the IMF withheld subsequent disbursements due to concerns over Maldives' growing budget deficit. Maldives has had chronic budget deficits in recent years and the government's plans to cut expenditures have not progressed well. A new Goods and Services Tax on Tourism (GST) was introduced in January 2011 and a new Business Profit Tax is to be introduced during 2012. These taxes are expected to increase government revenue by about 25%. The government has privatized the main airport and is partially privatizing the energy sector. Tourism will remain the engine of the economy. The Government of the Maldives has aggressively promoted building new island resorts. Due to increasing tourist arrivals, GDP growth climbed to 7.1% in 2010 and 6.5% in 2011. Diversifying the economy beyond tourism and fishing, reforming public finance, and increasing employment opportunities are major challenges facing the government

MALI

INTRODUCTION

Background: The Sudanese Republic and Senegal became independent of France in 1960 as the Mali Federation. When Senegal withdrew after only a few months, what formerly made up the Sudanese Republic was renamed Mali. Rule by dictatorship was brought to a close in 1991 by a military coup that ushered in a period of democratic rule. President Alpha KONARE won Mali's first two democratic presidential elections

in 1992 and 1997. In keeping with Mali's two-term constitutional limit, he stepped down in 2002 and was succeeded by Amadou TOURE, who was elected to a second term in 2007 elections that were widely judged to be free and fair.

A military coup overthrew the government in March 2012, claiming that the government had not adequately supported the Malian army's fight against an advancing Tuareg-led rebellion in the north. Heavy international pressure forced coup leaders to accelerate the transition back to democratic rule and, to that end, Dioncounda TRAORE was installed as interim president on 12 April 2012.

ECONOMY

Economy—overview: Among the 25 poorest countries in the world, Mali is a landlocked country highly dependent on gold mining and agricultural exports for revenue. The country's fiscal status fluctuates with gold and agricultural commodity prices

and the harvest. Mali remains dependent on foreign aid. Economic activity is largely confined to the riverine area irrigated by the Niger River and about 65% of its land area is desert or semidesert. About 10% of the population is nomadic and about 80% of the labor force is engaged in farming and fishing. Industrial activity is concentrated on processing farm commodities. The government in 2011 completed an IMF extended credit facility program that has helped the economy grow, diversify, and attract foreign investment. Mali is developing its cotton and iron ore extraction industries to diversify foreign exchange revenue away from gold. Mali has invested in tourism but security issues are hurting the industry. Mali experienced economic growth of about 5% per year between 1996-2010.

MALTA

INTRODUCTION

Background: Great Britain formally acquired possession of Malta in 1814. The island staunchly supported the UK through

both world wars and remained in the Commonwealth when it became independent in 1964. A decade later Malta became a republic. Since about the mid-1980s, the island has transformed itself into a freight transshipment point, a financial center, and a tourist destination. Malta became an EU member in May 2004 and began using the euro as currency in 2008.

Flag description: two equal vertical bands of white (hoist side) and red; in the upper hoist-side corner is a representation of the George Cross, edged in red; according to legend, the colors are taken from the red and white checkered banner of Count Roger of Sicily who removed a bi-colored corner and granted it to Malta in 1091; an uncontested explanation is that the colors are those of the Knights of Saint John who ruled Malta from 1530 to 1798; in 1942, King George VI of the United Kingdom awarded the George Cross to the islanders for their exceptional bravery and gallantry in World War II; since independence in

1964, the George Cross bordered in red has appeared directly on the white field

National symbol(s): Maltese cross

National anthem: name: "L-Innu Malti" (The Maltese Anthem)
lyrics/music: Dun Karm PSAILA/Robert SAMMUT
note: adopted 1945; the anthem is written in the form of a prayer

ECONOMY

Economy—overview: Malta produces only about 20% of its food needs, has limited fresh water supplies, and has few domestic energy sources. Malta's geographic position between Europe and North Africa makes it a target for illegal immigration, which has strained Malta's political and economic resources. Malta's fertility rate is below the EU average, and population growth in recent years has largely been from immigration, putting increasing pressure on the pension system. Malta adopted the euro on 1 January 2008. Malta's economy is dependent on foreign trade, manufacturing, and tourism, and was hurt by the global economic downturn. Malta has low unemployment relative to other European countries, and growth has recovered since the 2009 recession. Malta's financial services industry has grown in recent years and in 2008–09 it escaped significant damage from the international financial crisis, largely because the sector is centered on the indigenous real estate market and is not highly leveraged and the banking system is closely regulated. Fiscal stimulus measures contributed to a deterioration in Malta's public finances in 2011, leading the EU to warn Malta that it would risk sanctions if it failed to bring its deficit and debt levels within EU guidelines. Moody's downgraded Malta's sovereign credit rating in September 2011.

MARSHALL ISLANDS

INTRODUCTION

Background: After almost four decades under US administration as the eastern-most part of the UN Trust Territory of the Pacific Islands, the Marshall Islands attained independence in 1986 under a Compact of Free Association. Compensation claims continue as a result of US nuclear testing on some of the atolls between 1947 and 1962. The Marshall Islands hosts the US Army Kwajalein Atoll (USAKA) Reagan Missile Test Site, a key installation in the US missile defense network.

GEOGRAPHY

Location: Oceania, two archipelagic island chains of 29 atolls, each made up of many small islets, and five single islands in the North Pacific Ocean, about half way between Hawaii and Australia

Geographic coordinates: 9 00 N, 168 00 E

Map references: Oceania

Area: total: 181 sq km

country comparison to the world: 215

land: 181 sq km

water: 0 sq km

note: the archipelago includes 11,673 sq km of lagoon waters and includes the atolls of Bikini, Eniwetok, Kwajalein, Majuro, Rongelap, and Utirik

Area—comparative: about the size of Washington, DC

Land boundaries: 0 km

Coastline: 370.4 km

Maritime claims: territorial sea: 12 nm

contiguous zone: 24 nm

exclusive economic zone: 200 nm

Climate: tropical; hot and humid; wet season May to November; islands border typhoon belt

ECONOMY

Economy—overview: US Government assistance is the mainstay of this tiny island economy. The Marshall Islands received more than \$1 billion in aid from the US from 1986–2002. Agricultural production, primarily subsistence, is concentrated on small farms; the most important commercial crops are coconuts and breadfruit. Small-scale industry is limited to handicrafts, tuna processing, and copra. The tourist industry, now a small source of foreign exchange employing less than 10% of the labor force, remains the best hope for future added income. The islands have few natural resources, and imports far exceed exports. Under the terms of the Amended Compact of Free Association, the US will provide millions of dollars per year to the Marshall Islands (RMI) through 2023, at which time a Trust Fund made up of US and RMI contributions will begin perpetual annual payouts. Government downsizing, drought, a drop in construction, the decline in tourism, and less income from the renewal of fishing vessel licenses have held GDP growth to an average of 1% over the past decade.

MAURITANIA

INTRODUCTION

Background: Independent from France in 1960, Mauritania annexed the southern third of the former Spanish Sahara (now Western Sahara) in 1976 but relinquished it after three years of raids by the Polisario guerrilla front seeking independence for the territory. Maaouya Ould Sid Ahmed TAYA seized power in a coup in 1984 and ruled Mauritania with a heavy hand for more than two decades. A series of presidential elections that he held were widely seen as flawed. A bloodless coup in August 2005 deposed President TAYA and ushered in a military council that oversaw a transition

to democratic rule. Independent candidate Sidi Ould Cheikh ABDALLAHI was inaugurated in April 2007 as Mauritania's first freely and fairly elected president. His term ended prematurely in August 2008 when a military junta led by General Mohamed Ould Abdel AZIZ deposed him and ushered in a military council government. AZIZ was subsequently elected president in July 2009 and sworn in the following month. The country continues to experience ethnic tensions among its black population (Afro-Mauritanians) and white and black Moor (Arab-Berber) communities, and is having to confront a growing terrorism threat by al-Qa'ida in the Islamic Maghreb (AQIM).

Economy—overview: Half the population still depends on agriculture and livestock for a livelihood, even though many of the nomads and subsistence farmers were forced into the cities by recurrent droughts in the 1970s and 1980s. Mauritania has extensive deposits of iron ore, which account for nearly 40% of total exports. The nation's coastal waters are among the richest fishing areas in the world but overexploitation by foreigners threatens this key source of revenue. The country's first deepwater port opened near Nouakchott in 1986. Before 2000, drought and economic mismanagement resulted in a buildup of foreign debt. In February 2000, Mauritania qualified for debt relief under the Heavily Indebted Poor Countries (HIPC) initiative and nearly all of its foreign debt has since been forgiven. A new investment code approved in December 2001 improved the opportunities for direct foreign investment. Mauritania and the IMF agreed to a three-year Poverty Reduction and Growth Facility (PRGF) arrangement in 2006. Mauritania made satisfactory progress, but the IMF, World Bank, and other international actors suspended assistance and investment in Mauritania after the August 2008 coup. Since the presidential election in July 2009, donors have resumed assistance. Oil prospects, while initially promising, have largely failed to materialize, and the government has placed a priority on attracting private investment to spur economic growth. The Government also emphasizes reduction of poverty, improvement of health and education, and privatization of the economy. Economic growth remained above 5% in 2010-11, mostly because of rising prices of gold, copper, iron ore, and oil.

Portuguese in the 16th century and subsequently settled by the Dutch—who named it in honor of Prince Maurits van NASSAU—in the 17th century. The French assumed control in 1715, developing the

island into an important naval base overseeing Indian Ocean trade, and establishing a plantation economy of sugar cane. The British captured the island in 1810, during the Napoleonic Wars. Mauritius

remained a strategically important British naval base, and later an air station, playing an important role during World War II for anti-submarine and convoy operations, as well as the collection of signal intelligence. Independence from the UK was attained in 1968. A stable democracy with regular free elections and a positive human rights record, the country has attracted considerable foreign investment and has earned one of Africa's highest per capita incomes.

ECONOMY

Economy—overview: Since independence in 1968, Mauritius has developed from a low-income, agriculturally based economy to a middle-income diversified economy with growing industrial, financial, and tourist sectors. For most of the period, annual growth has been in the order of 5% to 6%. This remarkable achievement has been reflected in more equitable income distribution, increased life expectancy, lowered infant mortality, and a much-improved infrastructure. The economy rests on sugar, tourism, textiles and apparel, and financial services, and is expanding into fish processing, information and communications technology, and hospitality and property development. Sugarcane is grown on about 90% of the cultivated land area and accounts for 15% of export earnings. The government's development strategy centers on creating vertical and horizontal clusters of development in these sectors. Mauritius has attracted more than 32,000

offshore entities, many aimed at commerce in India, South Africa, and China. Investment in the banking sector alone has reached over \$1 billion. Mauritius, with its strong textile sector, has been well poised to take advantage of the Africa Growth and Opportunity Act (AGOA). Mauritius' sound economic policies and prudent banking practices helped to mitigate negative effects from the global financial crisis in 2008–09. GDP grew more than 4% per year in 2010–11, and the country continues to expand its trade and investment outreach around the globe.

MEXICO

INTRODUCTION

Background: The site of advanced Amerindian civilizations—including the Olmec, Toltec, Teotihuacan, Zapotec, Maya, and Aztec—Mexico was conquered and colonized by Spain in the early 16th century. Administered as the Viceroyalty of New Spain for three centuries, it achieved its independence early in the 19th century. The global financial crisis beginning in late 2008 caused a massive economic downturn the following year, although growth returned quickly in 2010. Ongoing economic and social concerns include low real wages, underemployment for a large segment of the population, inequitable income distribution, and few advancement opportunities for the largely Amerindian population in the impoverished southern states. The elections held in 2000 marked the first time since the 1910 Mexican Revolution that an opposition candidate—Vicente FOX of the National Action Party (PAN)—defeated the party in government, the Institutional Revolutionary Party (PRI). He was succeeded in 2006 by another PAN candidate Felipe CALDERON. National elections, including the presidential election, are scheduled for 1 July 2012. Since 2007, Mexico's powerful drug-trafficking organizations have engaged in bloody feuding, resulting in tens of thousands of drug-related homicides.

Flag description: three equal vertical bands of green (hoist side), white, and red; Mexico's coat of arms (an eagle with a snake in its beak perched on a cactus) is centered in the white band; green signifies hope, joy, and love; white represents peace and honesty; red stands for hardiness, bravery, strength, and valor; the coat of arms is derived from a legend that the wandering Aztec people were to settle at a location

where they would see an eagle on a cactus eating a snake; the city they founded, Tenochtitlan, is now Mexico City

note: similar to the flag of Italy, which is shorter, uses lighter shades of red and green, and does not have anything in its white band

National symbol(s): golden eagle

National anthem: *name:* "Himno Nacional Mexicano" (National Anthem of Mexico)
lyrics/music: Francisco Gonzalez BOCANEGRA/Jaime Nuno ROCA

note: adopted 1943, in use since 1854; the anthem is also known as "Mexicanos, al grito de Guerra" (Mexicans, to the War Cry); according to tradition, Francisco Gonzalez BOCANEGRA, an accomplished poet, was uninterested in submitting lyrics to a national anthem contest; his fiancée locked him in a room and refused to release him until the lyrics were completed

ECONOMY

Economy—overview: Mexico has a free market economy in the trillion dollar class. It contains a mixture of modern and outmoded industry and agriculture, increasingly dominated by the private sector. Recent administrations have expanded competition in seaports, railroads, telecommunications, electricity generation, natural gas distribution, and airports. Per capita income is roughly one-third that of the US; income distribution remains highly unequal. Since the implementation of the North American Free Trade Agreement (NAFTA) in 1994, Mexico's share of US imports has increased from 7% to 12%, and its share of Canadian imports has doubled to 5%. Mexico has free trade agreements with over 50 countries including Guatemala, Honduras, El Salvador, the European Free Trade Area, and Japan—putting more than 90% of trade under free trade agreements. In 2007, during its first year in office, the Felipe CALDERON administration was able to garner support from the opposition to successfully pass pension and fiscal reforms. The administration passed an energy reform measure in 2008 and another fiscal reform in 2009. Mexico's GDP plunged 6.2% in 2009 as world demand for exports dropped, asset prices tumbled, and remittances and investment declined. GDP posted positive growth of 5.4% in 2010 and 3.8% in 2011, with exports—particularly to the United States—leading the way. The administration continues to face many economic challenges, including improving the public education system, upgrading infrastructure, modernizing labor laws, and fostering private investment in the energy sector. CALDERON has stated that his top economic priorities remain reducing poverty and creating jobs.

TRANSNATIONAL ISSUES

Disputes—International: abundant rainfall in recent years along much of the Mexico-US border region has ameliorated periodically strained water-sharing arrangements; the US has intensified security measures to monitor and control legal and illegal personnel, transport, and commodities across its border with Mexico; Mexico must deal with thousands of impoverished Guatemalans and other Central Americans who cross the porous border looking for work in Mexico and the United States; Belize and Mexico are working to solve minor border demarcation discrepancies arising from inaccuracies in the 1898 border treaty

Refugees and internally displaced persons: IDPs: 5,500–10,000 (government's quashing of Zapatista uprising in 1994 in eastern Chiapas Region) (2007)

Illicit drugs: major drug-producing and transit nation; world's second largest opium poppy cultivator; opium poppy cultivation in 2009 rose 31% over 2008 to 19,500 hectares yielding a potential production of 50 metric tons of pure heroin, or 125 metric tons of "black tar" heroin, the dominant form of Mexican heroin in the western United States; marijuana cultivation increased 45% to 17,500 hectares in 2009; government conducts the largest independent illicit-crop eradication program in the world; continues as the primary transshipment country for US-bound cocaine from South America, with an estimated 95% of annual cocaine movements toward the US stopping in Mexico; major drug syndicates control the majority of drug trafficking throughout the country; producer and distributor of ecstasy; significant money-laundering center; major supplier of heroin and largest foreign supplier of marijuana and methamphetamine to the US market (2007)

FEDERATED STATES OF MICRONESIA

INTRODUCTION

Background: In 1979 the Federated States of Micronesia, a UN Trust Territory under US administration, adopted a constitution. In 1986 independence was attained under a Compact of Free Association with the US, which was amended and renewed in 2004. Present concerns include large-scale unemployment, overfishing, and overdependence on US aid.

National anthem:

name: "Patriots of Micronesia"

lyrics/music: unknown

note: adopted 1991; the anthem is also known as "Across All Micronesia;" the music is based on the 1820 German patriotic song "Ich hab mich ergeben," which was the West German national anthem from 1949-1950; variants of this tune are used in Johannes Brahms' "Festival Overture" and Gustav Mahler's "Third Symphony"

ECONOMY

Economy—overview: Economic activity consists primarily of subsistence farming and fishing. The islands have few mineral deposits worth exploiting, except for high-grade phosphate. The potential for a tourist industry exists, but the remote location, a lack of adequate facilities, and limited air connections hinder development. Under the original terms of the Compact of Free Association, the US provided \$1.3 billion in grant aid during the period 1986-2001; the level of aid has been subsequently reduced. The Amended Compact of Free Association with the US guarantees the Federated States of Micronesia (FSM) millions of dollars in annual aid through 2023, and establishes a Trust Fund into which the US and the FSM make annual contributions in order to provide annual payouts to the FSM in perpetuity after 2023. The country's medium-term economic outlook appears fragile due not only to the reduction in US assistance but also to the current slow growth of the private sector.

MOLDOVA**INTRODUCTION**

Background: Part of Romania during the interwar period, Moldova was incorporated into the Soviet Union at the close of World War II. Although the country has been independent from the USSR since 1991, Russian forces have remained on Moldovan territory east of the Dniester River

supporting a Transnistrian separatist region with a Slavic majority population of mostly Ukrainians and Russians. One of the poorest nations in Europe, Moldova became the first former Soviet state to elect a Communist, Vladimir VORONIN, as its president in 2001. VORONIN served as Moldova's president until he resigned in September 2009, following the opposition's gain of a narrow

majority in July parliamentary elections and the Communist Party's (PCRM) subsequent inability to attract the three-fifths of parliamentary votes required to elect a president. Moldova's four opposition parties formed a new coalition, the Alliance for European Integration (AEI), which has acted as Moldova's governing coalition since. Moldova experienced significant political uncertainty

between 2009 and early 2012, holding three general elections and numerous presidential ballots in parliament, all of which failed to secure a president. Following November 2012 parliamentary elections, a reconstituted AEL-coalition consisting of the Liberal Democratic Party, the Liberal Party, and the Democratic Party formed a government, and in March 2012 were finally able to elect an independent as president.

ECONOMY

Economy-overview: Moldova remains one of the poorest countries in Europe despite recent progress from its small economic base. It enjoys a favorable climate and good farmland but has no major mineral deposits. As a result, the economy depends heavily on agriculture, featuring fruits, vegetables, wine, and tobacco. Moldova must import almost all of its energy supplies. Moldova's dependence on Russian energy was underscored at the end of 2005, when a Russian-owned electrical station in Moldova's separatist Transnistria region cut off power to Moldova and Russia's Gazprom cut off natural gas in disputes over pricing. In January 2009, gas supplies were cut during a dispute between Russia and Ukraine. Previous Russian decisions to ban Moldovan wine and agricultural products, coupled with its decision to double the price Moldova paid for Russian natural gas, have hurt economic growth in the past. The onset of the global financial crisis and poor economic conditions in Moldova's main foreign markets caused GDP to fall 6% in 2009. Unemployment almost doubled and inflation dropped to -0.1%, a record low. Moldova's IMF agreement expired in May 2009. In fall 2009, the IMF allocated \$186 million to Moldova to cover its immediate budgetary needs, and the government signed a new agreement with the IMF in January 2010 for a program worth \$574 million. In 2010, an upturn in the world economy boosted GDP growth to about 7% per year and inflation to more than 7%. Economic reforms have been slow because of corruption and strong political forces backing government controls. Nevertheless, the government's primary goal of EU integration has resulted in

some market-oriented progress. The granting of EU trade preferences should encourage higher growth rates, but the agreements are unlikely to serve as a panacea, given the extent to which export success depends on higher quality standards and other factors. The economy has made a modest recovery, growing by 6% in 2011, but remains vulnerable to politica

TRANSNATIONAL ISSUES

Disputes—International: Moldova and Ukraine operate joint customs posts to monitor the transit of people and commodities through Moldova's break-away Transnistria region, which remains under Organization for Security and Cooperation in Europe supervision
Illicit drugs: limited cultivation of opium poppy and cannabis, mostly for CIS consumption; transshipment point for illicit drugs from Southwest Asia via Central Asia to Russia, Western Europe, and possibly the US; widespread crime and underground economic activity

MONACO

INTRODUCTION

Background: The Genoese built a fortress on the site of present day Monaco in 1215. The current ruling Grimaldi family first seized temporary control in 1297, and again in 1331, but were not able to permanently secure their holding until 1419. Economic development was spurred in the late 19th century with a railroad linkup to France and the opening of a casino. Since then, the principality's mild climate, splendid scenery, and gambling facilities have made Monaco world famous as a tourist and recreation center.

ECONOMY

Economy—overview: Monaco, bordering France on the Mediterranean coast, is a popular resort, attracting tourists to its casino and pleasant climate. The principality also is a major banking center and has successfully sought to diversify into services and small, high-value-added, nonpolluting industries. The state has no income tax and low business taxes and thrives as a tax haven both for individuals who have established residence and for foreign companies that have set up businesses and offices. Monaco, however, is not a tax-free shelter; it charges nearly 20% value-added tax, collects stamp duties, and companies face a 33% tax on profits unless they can show that three-quarters of profits are generated within the principality. Monaco's reliance on tourism and banking for its economic growth has left it vulnerable to a downturn in France and other European economies which are the principality's main trade partners. In 2009, Monaco's GDP fell by 11.5% as the euro-zone crisis precipitated a sharp drop in tourism and retail activity and home sales. A modest recovery ensued in 2010 with GDP growth of 2.5%, but Monaco's economic prospects remain clouded in uncertainty tied to future euro-zone growth. Weak economic growth also has deteriorated public finances as the principality recorded a budget deficit of 1.9% of GDP in 2010. Monaco was formally removed from the OECD's "grey list" of uncooperative tax jurisdictions in late 2009, but continues to face international pressure to abandon its banking secrecy laws and help combat tax evasion. The state retains monopolies in a number of sectors, including tobacco, the telephone network, and the postal service. Living standards are high, roughly comparable to those in prosperous French metropolitan areas.

MONGOLIA

INTRODUCTION

Background: The Mongols gained fame in the 13th century when under Chinggis

KHAAN they established a huge Eurasian empire through conquest. After his death the empire was divided into several powerful Mongol states, but these broke apart in

the 14th century. The Mongols eventually retired to their original steppe homelands and in the late 17th century came under Chinese rule. Mongolia won its independence in 1921 with Soviet backing and a Communist regime was installed in 1924. The modern country of Mongolia, however, represents only part of the Mongols' historical homeland; more ethnic Mongolians live in the Inner Mongolia Autonomous Region in the People's Republic of China than in Mongolia. Following a peaceful democratic revolution, the ex-Communist Mongolian People's Revolutionary Party (MPRP) won elections in 1990 and 1992, but was defeated by the Democratic Union Coalition (DUC) in the 1996 parliamentary election. The MPRP won an overwhelming majority in the 2000 parliamentary election, but the party lost seats in the 2004 election and shared power with democratic coalition parties from 2004-08. The MPRP regained

a solid majority in the 2008 parliamentary elections but nevertheless formed a coalition government with the Democratic Party that lasted until January 2012. In 2010 the MPRP voted to retake the name of the Mongolian People's Party (MPP), a name it used in the early 1920s.

ECONOMY

Economy—overview: Economic activity in Mongolia was traditionally based on herding and agriculture—Mongolia's extensive mineral deposits, however, have attracted foreign investors, and the country is undergoing an economic transformation through its mining boom. Mongolia holds copper, gold, coal, molybdenum, fluorspar, uranium, tin, and tungsten deposits, among others, which account for a large part of foreign direct investment and government revenues. Soviet assistance, at its height one-third of GDP, disappeared almost overnight in 1990 and 1991 at the time of the dismantlement of the USSR. The following decade saw Mongolia endure both deep recession, because of political inaction and natural disasters, as well as economic growth, because of reform-embracing, free-market economics and extensive privatization of the formerly state-run economy. The country opened a fledgling stock exchange in 1991. Mongolia joined the World Trade Organization in 1997 and seeks to expand its participation in regional economic and trade regimes. Growth averaged nearly 9% per year in 2004–08 largely because of high copper prices and new gold production. By late 2008, the country was faced with external shocks from the global financial crisis, and a sharp drop in commodity prices slashed government revenues. GDP dropped 1.3% in 2009. In early 2009, the

International Monetary Fund reached a \$236 million Stand-by Arrangement with Mongolia and the country has largely emerged from the crisis. The banking sector is recovering and the government has started to enact greater supervision regulations. In October 2009, Mongolia passed long-awaited legislation on an investment agreement to develop the Oyu Tolgoi mine, considered to be among the world's largest untapped copper deposits. Another similarly lengthy process is underway for an investment agreement for the massive coal mine at Tavan Tolgoi; it is under review by the National Security Council and a final decision is expected in 2012. The economy grew 6.4% in 2010 and 17.3% in 2011, largely on the strength of commodity exports to nearby countries. Trade with China represents more than half of Mongolia's total external trade—China receives more than 90% of Mongolia's exports. Mongolia purchases 95% of its petroleum products and a substantial amount of electric power from Russia, leaving it vulnerable to price increases. In the face of anticipated growth in mining revenues, the country is grappling with the challenge of avoiding an overheated economy. Due to severe winter weather in 2009–10, Mongolia lost 22% of its total livestock, and meat prices doubled. Renewed concerns are surfacing over controlling inflation, which was more than 10% for much of 2010–11, due in part to soaring food prices. Government spending on line to increase as much as 75% over 2011—has added to concerns over inflation. Remittances from Mongolians working abroad, particularly in South Korea, are significant. Money-laundering is a growing concern.

MONTENEGRO**INTRODUCTION**

Background: The use of the name Montenegro began in the 15th century when the Crnojević dynasty began to rule the Serbian principality of Zeta; over subsequent centuries Montenegro was able to maintain its independence from the Ottoman Empire. From the 16th to 19th centuries, Montenegro became a theocracy ruled by a series of bishop princes; in 1852, it was transformed into a secular principality. After World War I, Montenegro was absorbed by the Kingdom of Serbs, Croats, and Slovenes, which became the Kingdom of Yugoslavia in 1929; at the conclusion of World War II, it became a constituent republic of the Socialist Federal Republic of Yugoslavia. When the latter dissolved in 1992, Montenegro federated with Serbia, first as the Federal Republic of Yugoslavia and, after 2003, in a looser union of Serbia and Montenegro. In May 2006, Montenegro invoked its right under the Constitutional Charter of Serbia and Montenegro to hold a referendum on independence from the state union. The vote for severing ties with Serbia exceeded 55%—the threshold set by the EU—allowing Montenegro to formally declare its independence on 3 June 2006.

Flag description: a red field bordered by a narrow golden-yellow stripe with the Montenegrin coat of arms centered; the arms consist of a double-headed golden eagle—symbolizing the unity of church and state—surmounted by a crown; the eagle holds a golden scepter in its right claw and a blue orb in its left; the breast shield over the eagle shows a golden lion passant on a green field in front of a blue sky; the lion is symbol of episcopal authority and harks back to the three and a half centuries that Montenegro was ruled as a theocracy

National symbol(s): double-headed eagle

National anthem: *name:* "Oj, svijetla majska zoro" (Oh, Bright Dawn of May)

lyrics/music: Sekula Drljević/unknown, arranged by Zarko Miković

note: adopted 2004; the anthem's music is based on a Montenegrin folk song

ECONOMY

Economy—overview: Montenegro's economy is transitioning to a market sys-

tem, but the state sector remains large and additional institutional changes are needed. The economy relies heavily on tourism and the export of refined metals. Unprofitable state-owned enterprises weigh on public finances. Montenegro severed its economy from federal control and from Serbia during the Milošević era and maintained its own central bank, adopted the Deutsch mark, then the euro—rather than the Yugoslav dinar—as official currency, collected customs tariffs, and managed its own budget. The dissolution of the loose political union between Serbia and Montenegro in 2006 led to separate membership in several international financial institutions, such as the European Bank for Reconstruction and Development. In January 2007, Montenegro joined the World Bank and IMF. Montenegro became the 156th member of World Trade Organization in December 2011. The European Council (EC) granted candidate country status to Montenegro at the December 2010 session. Montenegro will begin negotiations to join the EC in 2012, if it meets the conditions set down by the European Council, which call on Montenegro to take further steps to fight corruption and organized crime. Unemployment and regional disparities in development are key political and economic problems. Montenegro has privatized its large aluminum complex—the dominant industry—as well as most of its financial sector, and has begun to attract foreign direct investment in the tourism sector. The global financial crisis had a significant negative impact on the economy, due to the ongoing credit crunch, a decline in the real estate sector, and a fall in aluminum exports. In 2011, real GDP growth reached 1.8%, the highest it has been in three years.

MONTSERRAT

INTRODUCTION

Background: English and Irish colonists from St. Kitts first settled on Montserrat in 1632; the first African slaves arrived three decades later. The British and French fought for possession of the island for most of the 18th century, but it finally was confirmed as a British possession in 1783. The island's sugar plantation economy was converted to small farm landholdings in the mid 19th century. Much of this island was devastated and two-thirds of the population fled abroad because of the eruption of the Soufriere Hills Volcano that began on 18 July 1995. Montserrat has endured volcanic activity since, with the last eruption occurring in July 2003.

ECONOMY

Economy—overview: Severe volcanic activity, which began in July 1995, has put a damper on this small, open economy. A catastrophic eruption in June 1997 closed the airport and seaports, causing further economic and social dislocation. Two-thirds of the 12,000 inhabitants fled the island. Some began to return in 1998 but lack of housing limited the number. The agriculture sector continued to be affected by the lack of suitable land for farming and the destruction of crops. Prospects for the economy depend largely on developments in relation to the volcanic activity and on public sector construction activity. Half of the island remains uninhabitable.

MOROCCO

INTRODUCTION

Background: In 788, about a century after the Arab conquest of North Africa, a series of Moroccan Muslim dynasties began to rule in Morocco. In the 16th century, the Sa'adi monarchy, particularly under Ahmad AL-MANSUR (1578–1603), repelled foreign invaders and inaugurated a golden age. The Alaouite dynasty, to which the current Moroccan royal family belongs, dates from the 17th century. In 1860, Spain occupied northern Morocco and ushered in a half century of trade rivalry among European powers that saw Morocco's sovereignty steadily erode; in 1912, the French imposed a protectorate over the country. A protracted independence struggle with France ended successfully in 1956. The internationalized city of Tangier and most Spanish possessions were turned over to the new country that same year. Sultan MOHAMMED V, the current monarch's grandfather, organized the new state as a constitutional monarchy and in 1957 assumed the title of king. Morocco annexed Western Sahara during the late 1970s, but final resolution on the status of the territory remains unresolved. Gradual political reforms in the 1990s resulted in the establishment of a bicameral legislature, which first met in 1997. Under King MOHAMMED VI—who in 1999 succeeded his father to the throne—human rights have improved. Morocco enjoys a moderately

free press, but the government has taken action against journalists who they perceive to be challenging the monarchy, Islam, and the status of Western Sahara. Influenced by protests elsewhere in the Middle East and North Africa, in February 2011 thousands of Moroccans began weekly rallies in multiple cities across the country to demand greater democracy and a crackdown on government corruption. Police response to most of the protests was subdued compared to the violence elsewhere in the region. A commission set up in March 2011 presented a draft constitution that was passed by popular referendum in July 2011. Under the new constitution, some new powers were extended to parliament and the prime minister, but ultimate authority remained in the hands of the monarch. That same month, the king urged swift implementation of the new constitution, starting with the holding of parliamentary elections in 2011 instead of in 2012. A prominent moderate Islamist party, the Justice and Development Party, subsequently won the largest number of seats on 25 November 2011, becoming the first Islamist party to lead the Moroccan Government. In January 2012, Morocco assumed a nonpermanent seat on the UN Security Council for the 2012–13 term.

ECONOMY

Economy—overview: Morocco has capitalized on its proximity to Europe and relatively low labor costs to build a diverse, open, market-oriented economy. In the 1980s Morocco pursued austerity measures and pro-market reforms, overseen by the IMF. Since taking the throne in 1999, King MOHAMMED VI has presided over a stable economy marked by steady growth, low inflation, and generally declining government debt. Industrial development strategies and infrastructure improvements—most visibly illustrated by a new port and free trade zone near Tangier—are improving Morocco's competitiveness. Key sectors of the economy include agriculture, tourism, phosphates, textiles, apparel, and subcomponents. In 2006 Morocco entered into a bilateral Free Trade Agreement with the United States; it remains the only African country to have one. In 2008 Morocco entered into an Advanced Status agreement with the European Union. Despite Morocco's economic progress, the country suffers from high unemployment and poverty. In 2011, high food and fuel prices strained the government's budget and widened the country's current account deficit. Key economic challenges for Morocco include fighting corruption, reducing government spending, reforming the education system and judiciary, addressing socioeconomic disparities, and building more diverse, higher value-added industries.

TRANSNATIONAL ISSUES

Disputes—International: claims and administers Western Sahara whose sovereignty remains unresolved; Morocco protests Spain's control over the coastal enclaves of Ceuta, Melilla, and Penon de Velez de la Gomera, the islands of Penon de Alhucemas and Islas Chafarinas, and surrounding waters; both countries claim Isla Perejil (Leila Island); discussions have not progressed on a comprehensive maritime delimitation, setting limits on resource exploration and refugee

interdiction, since Morocco's 2002 rejection of Spain's unilateral designation of a median line from the Canary Islands; Morocco serves as one of the primary launching areas of illegal migration into Spain from North Africa; Algeria's border with Morocco remains an irritant to

bilateral relations, each nation accusing the other of harboring militants and arms smuggling; the National Liberation Front's assertions of a claim to Chirac Pastures in southeastern Morocco is a dormant dispute

Illicit drugs: one of the world's largest producers of illicit hashish; shipments of hashish mostly directed to Western Europe; transit point for cocaine from South America destined for Western Europe; significant consumer of cannabis

MOZAMBIQUE

INTRODUCTION

Background: Almost five centuries as a Portuguese colony came to a close with independence in 1975. Large-scale emigration, economic dependence on South Africa, a severe drought, and a prolonged civil war hindered the country's development until the mid 1990s. The ruling Front for the Liberation of Mozambique (Frelimo) party formally abandoned Marxism in 1989, and a new constitution the following year provided for multiparty elections and a free market economy. A UN-negotiated peace agreement between Frelimo and rebel Mozambique National Resistance (Renamo) forces ended the fighting in 1992. In December 2004, Mozambique underwent a delicate transition as Joaquim CHISSANO stepped down after 18 years in office. His elected successor, Armando Emilio GUEBUZA, promised to continue the sound economic policies that have encouraged foreign investment. President GUEBUZA was reelected to a second term in October 2009. However, the elections were flawed by voter fraud, questionable disqualification of candidates, and Frelimo use of government resources during the campaign. As a result, Freedom House removed Mozambique from its list of electoral democracies.

 bands of green (top), black, and yellow with
 a red isosceles triangle based on the hoist
 side; the black band is edged in white; cen-
 tered in the triangle is a yellow five-pointed
 star bearing a crossed rifle and hoe in black
 superimposed on an open white book; green
 represents the riches of the land, white
 peace, black the African continent, yellow
 the country's minerals, and red the strug-
 gle for independence; the rifle symbolizes
 defense and vigilance, the hoe refers to the
 country's agriculture, the open book stresses
 the importance of education, and the star
 represents Marxism and internationalism

ECONOMY

Economy—overview: At independence in
 1975, Mozambique was one of the world's

poorest countries. Socialist mismanagement and a brutal civil war from 1977–92 exacerbated the situation. In 1987, the government embarked on a series of macroeconomic reforms designed to stabilize the economy. These steps, combined with donor assistance and with political stability since the multi-party elections in 1994, have led to dramatic improvements in the country's growth rate. Fiscal reforms, including the introduction of a value-added tax and reform of the customs service, have improved the government's revenue collection abilities. In spite of these gains, Mozambique remains dependent upon foreign assistance for more than half of its annual budget, and in 2008 54% of the population remained below the poverty line. Subsistence agriculture continues to employ the vast majority of the country's work force and smallholder agricultural productivity and productivity growth is weak. A substantial trade imbalance persists although the opening of the Mozal aluminum smelter, the country's largest foreign investment project to date, has increased export earnings. At the end of 2007, and after years of negotiations, the government took over Portugal's majority share of the Cahora Bassa Hydroelectricity Company (HCB), a dam that was not transferred to Mozambique at independence because of the ensuing civil war and unpaid debts. More electrical power capacity is needed for additional investment projects in titanium extraction and processing and garment manufacturing that could further close the import/export gap. Mozambique's once substantial foreign debt has been reduced through forgiveness and rescheduling under the IMF's Heavily Indebted Poor Countries (HIPC) and Enhanced HIPC initiatives, and is now at a manageable level. In July 2007 the Millennium Challenge Corporation (MCC) signed a compact with Mozambique; the compact entered into force in September 2008 and will continue for five years. Compact projects will focus on improving sanitation, roads, agriculture, and the business regulation environment in an effort to spur economic growth in the four northern provinces of the country. Mozambique grew at an average annual rate of 9% in the decade up to 2007, one of Africa's strongest performances. However, heavy reliance on aluminum, which accounts for about one-third of exports, subjects the economy to volatile international prices. The sharp decline in aluminum prices during the global economic crisis lowered GDP growth by several percentage points. Despite 6.8% GDP growth in 2010, the increasing cost of living prompted citizens to riot in September 2010, after fuel, water, electricity, and bread price increases were announced. In an attempt to contain the cost of living, the government implemented subsidies, decreased taxes and tariffs, and instituted other fiscal measures. Real growth of 7.2% was achieved in 2011.

TRANSNATIONAL ISSUES

Disputes—International: none

Illicit drugs: southern African transit point for South Asian hashish and heroin, and South American cocaine probably destined for the European and South African markets; producer of cannabis (for local consumption) and methaqualone (for export to South Africa); corruption and poor regulatory capability make the banking system vulnerable to money laundering, but the lack of a well-developed financial infrastructure limits the country's utility as a money-laundering center

NAMIBIA

INTRODUCTION

Background: South Africa occupied the German colony of South-West Africa during World War I and administered it as a mandate until after World War II, when it annexed the territory. In 1966 the Marxist South-West Africa People's Organization (SWAPO) guerrilla group launched a war of independence for the area that became Namibia, but it was not until 1988 that South Africa agreed to end its administration in accordance with a UN peace plan for the entire region. Namibia has been governed by SWAPO since the country won independence in 1990. Hifikepune POHAMBIA was elected president in November 2004 in a landslide victory replacing Sam NUJOMA who led the country during its first 14 years of self rule. POHAMBIA was reelected in November 2009.

to Namibia increased in 2009, but dropped in 2010 and 2011 because of the global recession, reducing Namibia's overall SACU income. Increased fish production and mining of zinc, copper, and uranium spurred growth in 2003–08, but growth in recent years was undercut by poor fish catches, a dramatic decline in demand for diamonds, higher costs of producing metals, and the global recession. A rebound in diamond and uranium prices in 2010 and the reopening of copper mines in 2011 provided a significant boost to Namibia's mining sector.

NAURU

INTRODUCTION

Background: The exact origins of the Nauruans are unclear since their language does not resemble any other in the Pacific. Germany annexed the island in 1888. A German-British consortium began mining the island's phosphate deposits early in the 20th century. Australian forces occupied Nauru in World War I; it subsequently became a League of Nations mandate. After the Second World War—and a brutal occupation by Japan—Nauru became a UN trust territory. It achieved independence in 1968 and joined the UN in 1999 as the world's smallest independent republic.

ECONOMY

Economy—overview: Revenues of this tiny island traditionally have come from exports of phosphates. Few other resources exist, with most necessities being imported, mainly from Australia, its former occupier and later major source of support. In 2005 an Australian company entered into an agreement to exploit remaining supplies. Primary reserves of phosphates were exhausted and mining ceased in 2006, but mining of a deeper layer of "secondary phosphate" in the interior of the island began the following year. The secondary phosphate deposits may last another 30 years. The rehabilitation of mined land and the replacement of income from phosphates are serious long-term problems. In anticipation of the exhaustion of Nauru's phosphate deposits, substantial amounts of phosphate income were invested in trust funds to help cushion the transition and provide for Nauru's economic future. As a result of heavy spending from the trust funds, the government faced virtual bankruptcy. To cut costs the government has frozen wages and reduced overstuffed public service departments. Nauru lost further revenue in 2008 with the closure of Australia's refugee processing center, making it almost totally dependent on food imports and foreign aid. Housing, hospitals, and other capital plant are deteriorating. The cost to Australia of keeping the government and economy afloat continues to climb. Few comprehensive statistics on the Nauru economy exist with estimates of Nauru's GDP varying widely.

NAVASSA ISLAND

INTRODUCTION

Background: This uninhabited island was claimed by the US in 1857 for its guano. Mining took place between 1865 and 1898. The lighthouse, built in 1917, was shut down in 1996 and administration of Navassa Island transferred from the US Coast Guard to the Department of the

Interior. A 1998 scientific expedition to the island described it as a unique preserve of Caribbean biodiversity; the following year it became a National Wildlife Refuge and annual scientific expeditions have continued.

INTRODUCTION

Background: In 1951, the Nepali monarch ended the century-old system of rule by hereditary premiers and instituted a cabinet system of government. Reforms in 1990 established a multiparty democracy within the framework of a constitutional monarchy. An insurgency led by Maoist extremists broke out in 1996. The ensuing 10-year civil war between insurgents and government forces witnessed the dissolution of the cabinet and parliament and assumption of absolute power by the king. Several weeks of mass protests in April 2006 were followed by several months of peace negotiations between the Maoists and government officials, and culminated in a November 2006 peace accord and the promulgation of an interim constitution. Following a nation-wide election in April 2008, the newly formed Constituent Assembly declared Nepal a federal democratic republic and abolished the monarchy at its first meeting the following month. The Constituent Assembly elected the country's first president in July. Between 2008 and 2011 there have been four different coalition governments, led twice by the United Communist Party of Nepal-Maoist, which received a plurality

of votes in the Constituent Assembly election, and twice by the Communist Party of Nepal-United Marxist-Leninist. In November 2011, Maoist Prime Minister Baburam BHATTARAI, who was elected in August 2011, and the leaders of the main political parties signed an agreement seeking to conclude the peace process and recommit the Constituent Assembly to finish drafting the constitution by a May 2012 deadline.

Flag description: red with a blue border around the unique shape of two overlapping right triangles; the smaller, upper triangle bears a white stylized moon and the larger, lower triangle displays a white 12-pointed sun; the color red represents the rhododendron (Nepal's national flower) and is a sign of victory and bravery, the blue border signifies peace and harmony; the two right triangles are a combination of two single

pennons (pennants) that originally symbolized the Himalaya Mountains while their charges represented the families of the king (upper) and the prime minister, but today they are understood to denote Hinduism and Buddhism, the country's two main religions; the moon represents the serenity of the Nepalese people and the shade and cool weather in the Himalayas, while the sun depicts the heat and higher temperatures of the lower parts of Nepal; the moon and the sun are also said to express the hope that the nation will endure as long as these heavenly bodies *note:* Nepal is the only country in the world whose flag is not rectangular or square

National symbol(s): rhododendron blossom

National anthem: name: "Sayaun Thunga Phool Ka" (Hundreds of Flowers)

lyrics/music: Pradeep Kumar RAI/Ambar GURUNG

note: adopted 2007; after the abolition of the monarchy in 2006, a new anthem was required because of the previous anthem's praise for the king

ECONOMY

Economy—overview: Nepal is among the poorest and least developed countries in the world, with almost one-quarter of its population living below the poverty line. Agriculture is the mainstay of the economy, providing a livelihood for three-fourths of the population and accounting for about one-third of GDP. Industrial activity mainly involves the processing of agricultural products, including pulses, jute, sugarcane, tobacco, and grain. Nepal has considerable scope for exploiting its potential in hydropower, with an estimated 42,000 MW of feasible capacity, but political instability hampers foreign investment. Additional challenges to Nepal's growth include its landlocked geographic location, civil strife and labor unrest, and its susceptibility to natural disaster.

NETHERLANDS

INTRODUCTION

Background: The Dutch United Provinces declared their independence from Spain in 1579; during the 17th century, they became a leading seafaring and commercial power, with settlements and colonies around the world. After a 20-year French occupation, a Kingdom of the Netherlands was formed in 1815. In 1830 Belgium seceded and formed a separate kingdom. The Netherlands

remained neutral in World War I, but suffered invasion and occupation by Germany in World War II. A modern, industrialized nation, the Netherlands is also a large exporter of agricultural products. The country was a founding member of NATO and the EEC (now the EU), and participated in the introduction of the euro in 1999. In October 2010, the former Netherlands Antilles was dissolved and the three smallest islands—Bonaire, Sint Eustatius, and

Saba—became special municipalities in the Netherlands administrative structure. The larger islands of Sint Maarten and Curacao joined the Netherlands and Aruba as constituent countries forming the Kingdom of the Netherlands.

Flag description: three equal horizontal bands of red (top), white, and blue; similar to the flag of Luxembourg, which uses a lighter blue and is longer; the colors were those of WILLIAM I, Prince of Orange, who led the Dutch Revolt against Spanish sovereignty in the latter half of the 16th century; originally the upper band was orange, but because it tended to fade to red over time, the red shade was eventually made the permanent color; the banner is perhaps the oldest tricolor in continuous use

National symbol(s): lion

National anthem: *name:* "Het Wilhelmus" (The William)

lyrics/music: Philips VAN MARNIX van Sint Aldegonde (presumed)/unknown

note: adopted 1932, in use since the 17th century, making it the oldest national anthem in the world; also known as "Wilhelmus van Nassouwe" (William of Nassau), it is in the form of an acrostic, where the first letter of each stanza spells the name of the leader of the Dutch Revolt

ECONOMY

Economy—overview: The Dutch economy is the fifth-largest economy in the euro-zone and is noted for its stable industrial relations, moderate unemployment and inflation, a sizable trade surplus, and an important role as a European transportation hub. Industrial activity is predominantly in food processing, chemicals, petroleum refining, and electrical machinery. A highly mechanized agricultural sector employs only 2% of the labor force but provides large surpluses for the food-processing industry and for exports. The Netherlands, along with 11 of its EU partners, began circulating the euro currency on 1 January 2002. After 26 years of uninterrupted economic growth, the Dutch economy—highly dependent on an international financial sector and international trade—contracted by 3.5% in 2009 as a result of the global financial crisis. The Dutch financial sector suffered, due in part to the high exposure of some Dutch banks to U.S. mortgage-backed securities. In 2008, the government nationalized two banks and injected billions of dollars of capital into other financial institutions, to prevent further deterioration of a crucial sector. The government also sought to boost the domestic economy by accelerating infrastructure programs, offering corporate tax breaks for employers to retain workers, and expanding export credit facilities. The stimulus programs and bank bailouts, however, resulted in a government budget deficit of 5.3% of GDP in 2010 that contrasted sharply with a surplus of 0.7% in 2008. The government of Prime Minister Mark RUTTE began implementing

fiscal consolidation measures in early 2011, mainly reductions in expenditures, which resulted in an improved budget deficit of 3.8% of GDP.

NEW CALEDONIA**INTRODUCTION**

Background: Settled by both Britain and France during the first half of the 19th century, the island was made a French possession

in 1853. It served as a penal colony for four decades after 1864. Agitation for independence during the 1980s and early 1990s ended in the 1998 Noumea Accord, which over a period of 15 to 20 years will transfer an increasing amount of governing responsibility from France to New Caledonia. The agreement also commits France to conduct a referendum between 2014 and 2018 to decide whether New Caledonia should assume full sovereignty and independence.

ECONOMY

Economy—overview: New Caledonia has about 25% of the world's known nickel resources. Only a small amount of the land is suitable for cultivation, and food accounts for about 20% of imports. In addition to nickel, substantial financial support from France—equal to more than 15% of GDP—and tourism are keys to the health of the economy. Substantial new investment in the nickel industry, combined with the recovery of global nickel prices, brightens the economic outlook for the next several years.

NEW ZEALAND

INTRODUCTION

Background: The Polynesian Maori reached New Zealand in about A.D. 800. In 1840, their chieftains entered into a compact with Britain, the Treaty of Waitangi, in which they ceded sovereignty to Queen Victoria while retaining territorial rights. In that same year, the British began the first organized colonial settlement. A series of land wars between 1843 and 1872 ended with the defeat of the native peoples. The British colony of New Zealand became an independent dominion in 1907 and supported the UK militarily in both world wars. New Zealand's full participation in a number of defense alliances lapsed by the 1980s. In recent years, the government has sought to address longstanding Maori grievances.

ECONOMY

Economy—overview: Over the past 20 years the government has transformed New Zealand from an agrarian economy dependent on concessionary British market access to a more industrialized, free market economy that can compete globally. This dynamic growth has boosted real incomes—but left behind some at the bottom of the ladder—and broadened and deepened the technological capabilities of the industrial sector. Per capita income rose for ten consecutive years until 2007 in purchasing power parity terms,

but fell in 2008–09. Debt-driven consumer spending drove robust growth in the first half of the decade, helping fuel a large balance of payments deficit that posed a challenge for economic managers. Inflationary pressures caused the central bank to raise its key rate steadily from January 2004 until it was among the highest in the OECD in 2007–08; international capital inflows attracted to the high rates further strengthened the currency and housing market, however, aggravating the current account deficit. The economy fell into recession before the start of the global financial crisis and contracted for five consecutive quarters in 2008–09. In line with global peers, the central bank cut interest rates aggressively and the government developed fiscal stimulus measures. The economy posted a 2% decline in 2009, but pulled out of recession late in the year, and achieved 1.7% growth in 2010 and 2% in 2011. Nevertheless, key trade sectors remain vulnerable to weak external demand. The government plans to raise productivity growth and develop infrastructure, while reining in government spending.

NICARAGUA

INTRODUCTION

Background: The Pacific coast of Nicaragua was settled as a Spanish colony from Panama in the early 16th century. Independence from Spain was declared in 1821 and the country became an independent republic in 1838. Britain occupied the Caribbean Coast in the first half of the 19th century, but gradually ceded control of the region in subsequent decades. Violent opposition to governmental manipulation and corruption spread to all classes by 1978 and resulted in a short-lived civil war that brought the Marxist Sandinista guerrillas to power in 1979. Nicaraguan aid to leftist rebels in El Salvador caused the US

to sponsor anti-Sandinista contra guerrillas through much of the 1980s. After losing free and fair elections in 1990, 1996, and 2001, former Sandinista President Daniel ORTEGA Saavedra was elected president in 2006 and reelected in 2011. The 2008 municipal elections, 2010 regional elections, and November 2011 presidential elections were marred by widespread irregularities. Nicaragua's infrastructure and economy—hard hit by the earlier civil war and by Hurricane Mitch in 1998—are slowly being rebuilt, but democratic institutions have been weakened under the ORTEGA administration.

Flag description: three equal horizontal bands of blue (top), white, and blue with the national coat of arms centered in the white band; the coat of arms features a triangle encircled by the words REPUBLICA DE NICARAGUA on the top and AMERICA CENTRAL on the bottom; the banner is based on the former blue-white-blue flag of the Federal Republic of Central America; the blue bands symbolize the Pacific Ocean and the Caribbean Sea, while the white band represents the land between the two bodies of water *note:* similar to the flag of El Salvador, which features a round emblem encircled by the words REPUBLICA DE EL SALVADOR EN LA AMERICA CENTRAL centered in the white band; also

similar to the flag of Honduras, which has five blue stars arranged in an X pattern centered in the white band

National symbol(s):

turquoise-browed motmot (bird)

National anthem: *name:* "Salve a ti, Nicaragua" (Hail to Thee, Nicaragua)

lyrics/music: Salomon Ibarra MAYORGA/traditional, arranged by Luis Abraham DELGADILLO

note: although only officially adopted in 1971, the music was approved in 1918 and the lyrics in 1939; the tune, originally from Spain, was used as an anthem for Nicaragua from the 1830's until 1876

ECONOMY

Economy—overview: Nicaragua, the poorest country in Central America and the second poorest in the Hemisphere, has widespread underemployment and poverty. The US-Central America Free Trade Agreement (CAFTA) has been in effect since April 2006 and has expanded export opportunities for many agricultural and manufactured goods. Textiles and apparel account for nearly 60% of Nicaragua's exports, but increases in the minimum wage during the ORTEGA administration will likely erode its comparative advantage in this industry. ORTEGA's promotion of mixed business initiatives, owned by the Nicaraguan and Venezuelan state oil firms, together with the weak rule of law, could undermine the investment climate for domestic and international private firms in the near-term. Nicaragua relies on international economic assistance to meet internal and external-debt financing obligations. Foreign donors have curtailed this funding, however, in response to November 2008 electoral fraud. In early 2004, Nicaragua secured some \$4.5 billion in foreign debt reduction under the Heavily Indebted Poor Countries (HIPC) initiative. Managua still struggles with a high public debt burden, however, it succeeded in reducing that burden substantially in 2011. The economy grew at a rate of about 4% in 2011.

NIGER

INTRODUCTION

Background: Niger became independent from France in 1960 and experienced single-party and military rule until 1991, when Gen. Ali SAIBOU was forced by public pressure to allow multiparty elections, which resulted in a democratic government in 1993. Political infighting brought the government to a standstill and in 1996 led to a coup by Col. Ibrahim BARE. In 1999, BARE was killed in a counter coup by military officers who restored democratic rule and held elections that brought Mamadou TANDJA to power in December of that year. TANDJA was reelected in 2004 and in 2009 spearheaded a constitutional amendment that would allow him to extend his term as president. In February 2010, a military coup deposed TANDJA, immediately suspended the constitution and dissolved the Cabinet. ISSOUFOU Mahamadou emerged victorious from a crowded field in the election following the coup and was inaugurated in April 2011. Niger is one of the poorest countries in the world with minimal government services and insufficient funds to develop its resource base. The largely agrarian and subsistence-based economy is frequently disrupted by extended droughts common to the Sahel region of Africa. The Nigerien Movement for Justice, a predominantly Tuareg ethnic group, emerged in February 2007, and attacked several military targets in Niger's northern region throughout 2007 and 2008. Successful government offensives in 2009 limited the rebels' operational capabilities.

ECONOMY

Economy—overview: Niger is a landlocked, Sub-Saharan nation, whose economy centers on subsistence crops, livestock, and some of the world's largest uranium deposits. Agriculture contributes about 40% of GDP and provides livelihood for about 80% of the population. Niger also has sizable reserves of oil, and oil production, refining, and exports are expected to grow significantly between 2011 and 2016. Drought, desertification, and strong population growth have undercut the economy. Niger shares a common currency, the CFA franc, and a common central bank, the Central Bank of West African States (BCEAO), with seven other members of the West African Monetary Union. In December 2000, Niger qualified for enhanced debt relief under the International Monetary Fund program for Highly Indebted Poor Countries (HIPC) and concluded an agreement with the Fund on a Poverty Reduction and Growth Facility (PRGF). Debt relief provided under the enhanced HIPC initiative significantly reduced Niger's annual debt service obligations, freeing funds for expenditures on basic health care, primary education, HIV/AIDS prevention, rural infrastructure, and other programs geared at poverty reduction. In December 2005, Niger received 100% multilateral debt relief from the IMF, which translated into the forgiveness of approximately US\$86 million in debts to the IMF, excluding the remaining assistance under HIPC. The economy was hurt when the international community cut off non-humanitarian aid in response to TANDJA's moves to extend his term as president. Nearly half of the government's budget is derived from foreign donor resources. Future growth may be sustained by exploitation of oil, gold, coal, and other mineral resources. The government has announced an expansionary budget for 2012 with anticipated revenue increases from uranium, oil production, and donor aid, and it has made efforts to secure a new

three-year extended credit facility with the IMF following the one that completed in 2011. Food security re

TRANSNATIONAL ISSUES

Disputes—International: Libya claims about 25,000 sq km in a currently dormant dispute in the Tommo region; location of Benin-Niger-Nigeria tripoint is unresolved; only Nigeria and Cameroon have heeded the Lake Chad Commission's admonition to ratify the delimitation treaty that also includes the Chad-Niger and Niger-Nigeria boundaries; the dispute with Burkina Faso was referred to the ICJ in 2010

Trafficking in persons: *current situation:* Niger is a source, transit, and destination country for children and women trafficked for forced labor and sexual exploitation; caste-based slavery practices, rooted in ancestral master-slave relationships, continue in isolated areas of the country—an estimated 8,800 to 43,000 Nigeriens live under conditions of traditional slavery; children are trafficked within Niger for forced begging, forced labor in gold mines, domestic servitude, sexual exploitation, and possibly for forced labor in agriculture and stone quarries; women and children

from neighboring states are trafficked to and through Niger for domestic servitude, sexual exploitation, forced labor in mines and on farms, and as mechanics and welders; to a lesser extent, Nigerien women and children are recruited from Niger and transported to Nigeria, North Africa, the Middle East, and Europe for domestic servitude and sex trafficking

tier rating: Tier 2 Watch List—the Government of Niger does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government demonstrated marginal efforts to combat human trafficking, including traditional slavery; the transitional government enacted the country's first specific law to address trafficking; however, the government's few efforts to investigate and prosecute trafficking offenses during the year came only after receiving complaints from Non Governmental Organizations, and efforts to prosecute cases of traditional slavery and to provide assistance to victims remained weak (2009)

NIGERIA

2003 and 2007 presidential elections were marred by significant irregularities and violence, Nigeria is currently experiencing its longest period of civilian rule since independence. The general elections of April 2007 marked the first civilian-to-civilian transfer of power in the country's history.

INTRODUCTION

Background: British influence and control over what would become Nigeria and Africa's most populous country grew through the 19th century. A series of constitutions after World War II granted Nigeria greater autonomy; independence came in 1960. Following nearly 16 years of military rule, a new constitution was adopted in 1999, and a peaceful transition to civilian government was completed. The government continues to face the daunting task of reforming a petroleum-based economy, whose revenues have been squandered through corruption and mismanagement, and institutionalizing democracy. In addition, Nigeria continues to experience longstanding ethnic and religious tensions. Although both the

ECONOMY

Economy—overview: Oil-rich Nigeria has been hobbled by political instability, corruption, inadequate infrastructure, and poor macroeconomic management but in 2008 began pursuing economic reforms. Nigeria's former military rulers failed to diversify the economy away from its overdependence on the capital-intensive oil sector, which provides 95% of foreign exchange earnings and about 80% of budgetary revenues. Following the signing of an IMF stand-by agreement in August 2000, Nigeria received a debt-restructuring deal from the Paris Club and a \$1 billion credit from the IMF, both contingent on economic reforms. Nigeria pulled out of its IMF program in April 2002, after failing to meet spending and exchange rate targets, making it ineligible for additional debt forgiveness from the Paris Club. In November 2005, Abuja won Paris Club approval for a debt-relief deal that eliminated \$18 billion of debt in exchange for \$12 billion in payments—a total package worth \$30 billion of Nigeria's total \$37 billion external debt. Since 2008 the government has begun to show the political will to implement the market-oriented reforms urged by the IMF, such as modernizing the banking system, removing subsidies, and resolving regional disputes over the distribution of earnings from the oil industry. GDP rose strongly in 2007–11 because of growth in non-oil sectors and robust global crude oil prices. President JONATHAN has established an economic team that includes experienced and reputable members and has announced plans to increase transparency, diversify economic growth, and improve fiscal management. Lack of infrastructure and slow implementation of reforms are key impediments to growth. The government is working toward developing stronger public-private partnerships for roads, agriculture, and power. Nigeria's financial sector was hurt by the global financial and economic crises, but the Central Bank governor has taken measures to restructure and strengthen the sector to include imposing mandator

TRANSNATIONAL ISSUES

Disputes—International: Joint Border Commission with Cameroon reviewed 2002 ICJ ruling on the entire boundary and bilaterally resolved differences, including June 2006 Greentree Agreement that immediately cedes sovereignty of the

Bakassi Peninsula to Cameroon with a phase-out of Nigerian control within two years while resolving patriation issues; the ICJ ruled on an equidistance settlement of Cameroon–Equatorial Guinea–Nigeria maritime boundary in the Gulf of Guinea, but imprecisely defined coordinates in the ICJ decision and a sovereignty dispute between Equatorial Guinea and Cameroon over an island at the mouth of the Ntem River all contribute to the delay in implementation; only Nigeria and Cameroon have heeded the Lake Chad Commission's admonition to ratify the delimitation treaty which also includes the Chad–Niger and Niger–Nigeria boundaries; location of Benin–Niger–Nigeria tripoint is unresolved

Illicit drugs: a transit point for heroin and cocaine intended for European, East Asian, and North American markets; consumer of amphetamines; safe haven for Nigerian narcotraffickers operating worldwide; major money-laundering center; massive corruption and criminal activity; Nigeria has improved some anti-money-laundering controls, resulting in its removal from the Financial Action Task Force's (FATF's) Noncooperative Countries and Territories List in June 2006; Nigeria's anti-money-laundering regime continues to be monitored by FATF

NIUE

INTRODUCTION

Background: Niue's remoteness, as well as cultural and linguistic differences between its Polynesian inhabitants and those of the rest of the Cook Islands, have caused it to be separately administered. The population of the island continues to drop (from a peak of 5,200 in 1966 to an estimated 1,311 in 2011) with substantial emigration to New Zealand 2,400 km to the southwest.

ECONOMY

Economy—overview: The economy suffers from the typical Pacific island problems of geographic isolation, few resources, and a small population. Government expenditures regularly exceed revenues, and the shortfall is made up by critically needed grants from New Zealand that are used to pay wages to public employees. Niue has cut government expenditures by reducing the public service by almost half. The agricultural sector consists mainly of subsistence gardening, although some cash crops are grown for export. Industry consists primarily of small factories to process passion fruit, lime oil, honey, and coconut cream. The sale of postage stamps to foreign collectors is an important source of revenue. The island in recent years has suffered a serious loss of population because of emigration to New Zealand. Efforts to increase GDP include the promotion of tourism and financial services, although the International Banking Repeal Act of 2002 resulted in the termination of all offshore banking

licenses. Economic aid from New Zealand in FY08/09 was US\$5.7 million. Niue suffered a devastating typhoon in January 2004, which decimated nascent economic programs. While in the process of rebuilding, Niue has been dependent on foreign aid.

NORTHERN MARIANA ISLANDS

INTRODUCTION

Background: Under US administration as part of the UN Trust Territory of the Pacific, the people of the Northern Mariana Islands decided in the 1970s not to seek independence but instead to forge closer links with the US. Negotiations for territorial status began in 1972. A covenant to establish a commonwealth in political union with the

US was approved in 1975, and came into force on 24 March 1976. A new government and constitution went into effect in 1978.

ECONOMY

Economy—overview: The economy benefits substantially from financial assistance from the US. The rate of funding has declined as locally generated government

revenues have grown. The key tourist industry employs about 50% of the work force and accounts for roughly one-fourth of GDP. Japanese tourists predominate. Annual tourist entries have exceeded one-half million in recent years, but financial difficulties in Japan have caused a temporary slowdown. The agricultural sector is made up of cattle ranches and small farms producing coconuts, breadfruit, tomatoes, and melons. Garment production is by far the most important industry with the employment of 17,500 mostly Chinese workers and sizable shipments to the US under duty and quota exemptions.

NORWAY

INTRODUCTION

Background: Two centuries of Viking raids into Europe tapered off following the adoption of Christianity by King Olav TRYGGVASON in 994. Conversion of the Norwegian kingdom occurred over the next several decades. In 1397, Norway was absorbed into a union with Denmark that lasted more than four centuries. In 1814, Norwegians resisted the cession of their country to Sweden and adopted a new constitution. Sweden then invaded Norway but agreed to let Norway keep its constitution in return for accepting the union under a Swedish king. Rising nationalism throughout the 19th century led to a 1905 referendum granting Norway independence. Although Norway remained neutral in World War I, it suffered heavy losses to its shipping. Norway proclaimed its neutrality at the outset of World War II, but was nonetheless occupied for five years by Nazi Germany (1940–45). In 1949, neutrality was abandoned and Norway became a member of NATO. Discovery of oil and gas in adjacent waters in the late 1960s boosted Norway's economic fortunes. In referenda held in 1972 and 1994, Norway rejected joining the EU. Key domestic issues include immigration and integration of ethnic minorities, maintaining the country's extensive social safety net with an aging population, and preserving economic competitiveness.

ECONOMY

Economy—overview: The Norwegian economy is a prosperous mixed economy, with a vibrant private sector, a large state sector and an extensive social safety net. The government controls key areas, such as the vital petroleum sector, through extensive regulation and large-scale state-majority-owned enterprises. The country is richly endowed with natural resources—petroleum, hydropower, fish, forests, and

minerals—and is highly dependent on the petroleum sector, which accounts for the largest portion of export revenue and about 20% of government revenue. Norway is the world's second-largest gas exporter, and seventh largest oil exporter, making one of its largest offshore oil finds in 2011. Norway opted to stay out of the EU during a referendum in November 1994; nonetheless, as a member of the European Economic Area, it contributes sizably to the EU budget. In anticipation of eventual declines in oil and gas production, Norway saves state revenue from the petroleum sector in the world's second largest sovereign wealth fund, valued at over \$500 billion in 2011 and uses the fund's return to help finance public expenses. After solid GDP growth in 2004–07, the economy slowed in 2008, and contracted in 2009, before returning to positive growth in 2010–11, however, the government budget is set to remain in surplus.

OMAN

INTRODUCTION

Background: The inhabitants of the area of Oman have long prospered on Indian Ocean trade. In the late 18th century, a newly established sultanate in Muscat signed the first in a series of friendship treaties with Britain. Over time, Oman's dependence on British political and military advisors increased, but it never became a British colony. In 1970, QABOOS bin Said Al-Said overthrew the restrictive rule of his father; he has ruled as sultan ever since. His extensive modernization program has opened the country to the outside world while preserving the long-standing close ties with the UK. Oman's moderate, independent foreign policy has sought to maintain good relations with all Middle Eastern countries. Inspired by the popular uprisings that swept the Middle East and North Africa in 2010–11, Omanis began staging marches and demonstrations to demand economic benefits, an end to corruption, and greater political rights. In February and March 2011, in response to protester demands, QABOOS pledged to create more government jobs and promised to implement economic and political reforms, such as granting legislative and regulatory powers to the Council of Oman and the introduction of unemployment benefits. Also in March, the Gulf Cooperation Council pledged \$20 billion in financial aid to Oman and Bahrain over a 10-year period to assist the two nations in their struggle with Arab protests. Amid concessions made to oppositionists, the government during the summer continued to crack down on protests and demonstrations, and increasingly clamped down on the media. In October 2011, QABOOS issued a royal decree expanding the legislative powers of the Council of Oman to draft, amend, and approve legislation.

ECONOMY

Economy—overview: Oman is a middle-income economy that is heavily dependent on dwindling oil resources. Because of declining reserves and a rapidly growing labor force, Muscat has actively pursued a development plan that focuses on diversification, industrialization, and privatization, with the objective of reducing the oil sector's contribution to GDP to 9% by 2020 and creating more jobs to employ the rising numbers of Omanis entering the workforce. Tourism and gas-based industries are key components of the government's diversification strategy. By using enhanced oil recovery techniques, Oman succeeded in increasing oil production, giving the country more time to diversify, and the increase in global oil prices throughout 2011 provides the government greater financial resources to invest in non-oil sectors.

PACIFIC OCEAN

INTRODUCTION

Background: The Pacific Ocean is the largest of the world's five oceans (followed by the Atlantic Ocean, Indian Ocean, Southern Ocean, and Arctic Ocean). Strategically important access waterways include the La Perouse, Tsugaru, Tsushima, Taiwan, Singapore, and Torres Straits. The decision by the International Hydrographic Organization in the spring of 2000 to delimit a fifth ocean, the Southern Ocean, removed the portion of the Pacific Ocean south of 60 degrees south.

GEOGRAPHY

Location: body of water between the Southern Ocean, Asia, Australia, and the Western Hemisphere

Geographic coordinates:
0 00 N, 160 00 W

Map references:
Political Map of the World

Area: total: 155,557 million sq km
note: includes Bali Sea, Bering Sea, Bering Strait, Coral Sea, East China Sea, Gulf of Alaska, Gulf of Tonkin, Philippine Sea, Sea of Japan, Sea of Okhotsk, South China Sea, Tasman Sea, and other tributary water bodies

Area—comparative: about 15 times the size of the US; covers about 28% of the global surface; almost equal to the total land area of the world

Coastline: 135,663 km

Climate: planetary air pressure systems and resultant wind patterns exhibit remarkable uniformity in the south and east; trade winds and westerly winds are well-developed patterns, modified by seasonal fluctuations; tropical cyclones (hurricanes) may

form south of Mexico from June to October and affect Mexico and Central America; continental influences cause climatic uniformity to be much less pronounced in the eastern and western regions at the same latitude in the North Pacific Ocean; the western Pacific is monsoonal—a rainy season occurs during the summer months, when moisture-laden winds blow from the ocean over the land, and a dry season during the winter months, when dry winds blow from the Asian landmass back to the ocean; tropical cyclones (typhoons) may strike southeast and east Asia from May to December

Terrain: surface currents in the northern Pacific are dominated by a clockwise, warm-water gyre (broad circular system of currents) and in the southern Pacific by a counterclockwise, cool-water gyre; in the northern Pacific, sea ice forms in the Bering Sea and Sea of Okhotsk in winter; in the southern Pacific, sea ice from Antarctica reaches its northernmost extent in October; the ocean floor in the eastern Pacific is dominated by the East Pacific Rise, while the western Pacific is dissected by deep trenches, including the Mariana Trench, which is the world's deepest

Elevation extremes:

lowest point: Challenger Deep in the Mariana Trench -10,924 m
highest point: sea level 0 m

Natural resources: oil and gas fields, poly-metallic nodules, sand and gravel aggregates, placer deposits, fish

Natural hazards: surrounded by a zone of violent volcanic and earthquake activity sometimes referred to as the "Pacific Ring of Fire"; subject to tropical cyclones (typhoons) in southeast and east Asia from May to December (most frequent from July to October); tropical cyclones (hurricanes) may form south of Mexico and strike Central America and Mexico from June to October (most common in August and September); cyclical El Nino/La Nina phenomenon occurs in the equatorial Pacific, influencing weather in the Western Hemisphere and the western Pacific; ships subject to superstructure icing in extreme north from October to May; persistent fog in the northern Pacific can be a maritime hazard from June to December

Environment—current issues: endangered marine species include the dugong, sea lion, sea otter, seals, turtles, and whales; oil pollution in Philippine Sea and South China Sea

Geography—note: the major chokepoints are the Bering Strait, Panama Canal, Luzon Strait, and the Singapore Strait; the Equator divides the Pacific Ocean into the North Pacific Ocean and the South Pacific Ocean; dotted with low coral islands and rugged volcanic islands in the southwestern Pacific Ocean

ECONOMY

Economy—overview: The Pacific Ocean is a major contributor to the world economy and particularly to those nations its waters directly touch. It provides low-cost sea transportation between East and West, extensive fishing grounds, offshore oil and gas fields, minerals, and sand and gravel for the construction industry. In 1996, over 60% of the world's fish catch came from the Pacific Ocean. Exploitation of offshore oil and gas reserves is playing an ever-increasing role in the energy supplies of the US, Australia, NZ, China, and Peru. The high cost of recovering offshore oil and gas, combined with the wide swings in world prices for oil since 1985, has led to fluctuations in new drillings.

TRANSPORTATION

Ports and terminals: Bangkok (Thailand), Hong Kong (China), Kao-hsiung (Taiwan), Los Angeles (US), Manila (Philippines), Pusan (South Korea), San Francisco (US), Seattle (US), Shanghai (China), Singapore, Sydney (Australia), Vladivostok (Russia), Wellington (NZ), Yokohama (Japan)

Transportation—note: the Inside Passage offers protected waters from southeast Alaska to Puget Sound (Washington state); the International Maritime Bureau reports the territorial waters of littoral states and offshore waters in the South China Sea as high risk for piracy and armed robbery against ships; numerous commercial vessels have been attacked and hijacked both at anchor and while underway; hijacked vessels are often disguised and cargoes stolen; crew and passengers are often held for ransom, murdered, or cast adrift

TRANSNATIONAL ISSUES

Disputes—international: some maritime disputes (see littoral states)

PAKISTAN

INTRODUCTION

Background: The Indus Valley civilization, one of the oldest in the world and dating back at least 5,000 years, spread over much of what is presently Pakistan. During the second millennium B.C., remnants of this culture fused with the migrating Indo-Aryan peoples. The area underwent successive invasions in subsequent centuries from the Persians, Greeks, Scythians, Arabs (who brought Islam), Afghans, and Turks. The Mughal Empire flourished in the 16th and 17th centuries; the British came to dominate the region in the 18th century. The separation in 1947 of British India into the Muslim state of Pakistan (with West and East sections) and largely Hindu India was never satisfactorily resolved, and India and Pakistan fought two wars—in 1947–48 and 1965—over the disputed Kashmir territory. A third war between these countries in 1971—in which India capitalized on Islamabad's marginalization of Bengalis in Pakistani politics—resulted in East Pakistan becoming the separate nation of Bangladesh. In response to Indian nuclear weapons testing, Pakistan conducted its own tests in 1998. India-Pakistan relations have been rocky since the November 2008 Mumbai attacks, but both countries are taking small steps to put relations back on track. In February 2008, Pakistan held parliamentary elections and in September 2008, after the resignation of former President MUSHARRAF, elected Asif Ali ZARDARI to the presidency. Pakistani government and military leaders are struggling to control domestic insurgents, many of whom are located in the tribal areas adjacent to the border with Afghanistan. In January 2012, Pakistan assumed a nonpermanent seat on the UN Security Council for the 2012–13 term.

ECONOMY

Economy—overview: Decades of internal political disputes and low levels of foreign investment have led to slow growth and underdevelopment in Pakistan. Agriculture accounts for more than one-fifth of output and two-fifths of employment. Textiles account for most of Pakistan's export earnings, and Pakistan's failure to expand a viable export base for other manufactures has left the country vulnerable to shifts in world demand. Official unemployment is 5.6%, but this fails to capture the true picture, because much of the economy is informal and underemployment remains high. Over the past few years, low growth and high inflation, led by a spurt in food prices, have increased the amount of poverty—the UN Human Development Report estimated poverty in 2011 at almost 50% of the population. Inflation has worsened the situation, climbing from 7.7% in 2007 to more than 13% for 2011, before declining to 9.3% at year-end. As a result of political and economic instability, the Pakistani rupee has depreciated more than 40% since 2007. The government agreed to an International Monetary Fund Standby Arrangement in November 2008 in response to a balance of payments crisis. Although the economy has stabilized since the crisis, it has failed to recover. Foreign investment has not returned, due to investor concerns related to governance, energy, security, and a slow-down in the global economy. Remittances from overseas workers, averaging about \$1 billion a month since March 2011, remain a bright spot for Pakistan. However, after a small current account surplus in fiscal year 2011 (July 2010/June 2011), Pakistan's current account turned to deficit in the second half of 2011, spurred by higher prices for imported oil and lower prices for exported cotton. Pakistan remains stuck in a low-income, low-growth trap, with growth averaging 2.9% per year

from 2008 to 2011. Pakistan must address long standing issues related to government revenues and energy production in order to spur the amount of economic growth

TRANSNATIONAL ISSUES

Disputes—international: various talks and confidence-building measures cautiously have begun to defuse tensions over Kashmir, particularly since the October 2005 earthquake in the region; Kashmir nevertheless remains the site of the world's largest and most militarized territorial dispute with portions under the de facto administration of China (Aksai Chin), India (Jammu and Kashmir), and Pakistan (Azad Kashmir and Northern Areas); UN Military Observer Group in India and Pakistan has maintained a small group of peacekeepers since 1949; India does not recognize Pakistan's ceding historic Kashmir lands to China in 1964; India and Pakistan have maintained their 2004 cease-fire in Kashmir and initiated discussions on defusing the armed standoff in the Siachen glacier region; Pakistan protests India's fencing the highly militarized Line of Control and construction of the Baglihar Dam on the Chenab River in Jammu and Kashmir, which is part of the larger dispute on water sharing of the Indus River and its tributaries; to defuse tensions and prepare for discussions on a maritime boundary, India and Pakistan seek technical resolution of the disputed boundary in Sir Creek estuary at the mouth of the Rann of Kutch in the Arabian Sea; Pakistani maps continue to show the Junagadh claim in India's Gujarat State; by 2005, Pakistan, with UN assistance, repatriated 2.3 million Afghan refugees leaving slightly more than a million, many of whom remain at their own choosing; Pakistan has sent troops across and built fences along some remote tribal areas of its treaty-defined Durand Line border with Afghanistan, which serve as bases for foreign terrorists and other illegal activities; Afghan, Coalition, and Pakistan military meet periodically to clarify the alignment of the boundary on the ground and on maps

Refugees and internally displaced persons: *refugees (country of origin):* 1,043,984 (Afghanistan)
IDPs: undetermined (government strikes on Islamic militants in South Waziristan); 34,000 (October 2005 earthquake; most of those displaced returned to their home villages in the spring of 2006) (2007)

Illicit drugs: significant transit area for Afghan drugs, including heroin, opium, morphine, and hashish, bound for Iran, Western markets, the Gulf States, Africa,

and Asia; financial crimes related to drug trafficking, terrorism, corruption, and smuggling remain problems; opium poppy cultivation estimated to be 2,300 hectares in

2007 with 600 of those hectares eradicated; federal and provincial authorities continue to conduct anti-poppy campaigns that utilizes forced eradication, fines, and arrests

PALAU

INTRODUCTION

Background: After three decades as part of the UN Trust Territory of the Pacific under US administration, this westernmost cluster of the Caroline Islands opted for independence in 1978 rather than join the Federated States of Micronesia. A Compact of Free Association with the US was approved in 1986 but not ratified until 1993. It entered into force the following year when the islands gained independence.

ECONOMY

Economy—overview: The economy consists primarily of tourism, subsistence agriculture, and fishing. The government is the major employer of the work force relying heavily on financial assistance from the US. The Compact of Free Association with the US, entered into after the end of the UN trusteeship on 1 October 1994, provided Palau with up to \$700 million in US aid for the following 15 years in return for furnishing military facilities. Business and tourist arrivals numbered 85,000 in 2007. The population enjoys a per capita income roughly 50% higher than that of the Philippines and much of Micronesia. Long-run prospects for the key tourist sector have been greatly bolstered by the expansion of air travel in the Pacific, the rising prosperity of leading East Asian countries, and the willingness of foreigners to finance infrastructure development.

PANAMA

INTRODUCTION

Background: Explored and settled by the Spanish in the 16th century, Panama broke with Spain in 1821 and joined a union of Colombia, Ecuador, and Venezuela—named the Republic of Gran Colombia. When the latter dissolved in 1830, Panama remained part of Colombia. With US backing, Panama seceded from Colombia in 1903 and promptly signed a treaty with the US allowing for the construction of a canal and US sovereignty over a strip of land on either side of the structure (the Panama Canal Zone). The Panama Canal was built by the US Army Corps of Engineers between 1904 and 1914. In 1977, an agreement was signed for the complete transfer of the Canal from the US to Panama by the end of the century. Certain portions of the Zone and increasing responsibility over the Canal were turned over in the subsequent decades. With US help, dictator Manuel NORIEGA was deposed in 1989. The entire Panama Canal, the area supporting the Canal, and remaining US military bases were transferred to Panama by the end of

1999. In October 2006, Panamanians approved an ambitious plan (estimated to cost \$5.3 billion) to expand the Canal. The project, which began in 2007 and could double the Canal's capacity, is expected to be completed in 2014-15.

ECONOMY

Economy—overview: Panama's dollar-based economy rests primarily on a well-developed services sector that accounts for more than three-quarters of GDP. Services include operating the Panama Canal, logistics, banking, the Colon Free Zone, insurance, container ports, flagship registry, and tourism. Economic growth will be bolstered by the Panama Canal expansion project that began in 2007 and is scheduled to be completed by 2014 at a cost of \$5.3 billion—about 10% of current GDP. The expansion project will more than double the Canal's capacity, enabling it to accommodate ships that are too large to traverse the existing canal. The United States and China are the top users of the Canal. Panama also plans to construct a metro system in Panama City, valued at \$1.2 billion and scheduled to be completed by 2014. Panama's booming transportation and logistics services sectors, along with aggressive infrastructure development projects, have led the economy to continued growth in 2011. Strong economic performance has not translated into broadly shared prosperity, as Panama has the second worst income distribution in Latin America. About 30% of the population lives in poverty; however, from 2006 to 2010 poverty was reduced by 10 percentage points, while unemployment dropped from 12% to less than 3% of the labor force in 2011. A US-Panama Trade Promotion Agreement was approved by Congress and signed into law in October 2011. Seeking removal from the Organization of Economic Development's gray-list of tax havens, Panama has also recently signed various double taxation treaties with other nations.

Military branches: no regular military forces; Panamanian public forces include: Panamanian National Police (PNP), National Air-Naval Service (SENAN), National Border Service (SENAFRONT) (2010)

Manpower available for military service:

males age 16–49: 890,006 (2010 est.)

Manpower fit for military service: males

age 16–49: 731,254

females age 16–49: 728,329 (2010 est.)

Manpower reaching militarily significant age annually: male: 32,142

female: 30,879 (2010 est.)

Military expenditures: 1% of GDP (2006) country comparison to the world: 128

Military—note: on 10 February 1990, the government of then President ENDARA abolished Panama's military and reformed the security apparatus by creating the Panamanian Public Forces; in October 1994, Panama's Legislative Assembly approved a constitutional amendment prohibiting the creation of a standing military force but allowing the temporary establishment of special police units to counter acts of "external aggression"

TRANSNATIONAL ISSUES

Disputes—International: organized illegal narcotics operations in Colombia operate within the remote border region with Panama

Illicit drugs: major cocaine transshipment point and primary money-laundering center for narcotics revenue; money-laundering activity is especially heavy in the Colon Free Zone; offshore financial center; negligible signs of coca cultivation; monitoring of financial transactions is improving; official corruption remains a major problem

PAPUA NEW GUINEA

INTRODUCTION

Background: The eastern half of the island of New Guinea—second largest in the world—was divided between Germany (north) and the UK (south) in 1885. The latter area was transferred to Australia in 1902, which occupied the northern portion during World War I and continued to administer the combined areas until independence in 1975. A nine-year secessionist revolt on the island of Bougainville ended in 1997 after claiming some 20,000 lives.

GEOGRAPHY

Location: Oceania, group of islands including the eastern half of the island of New Guinea between the Coral Sea and the South Pacific Ocean, east of Indonesia

ECONOMY

Economy—overview: Papua New Guinea (PNG) is richly endowed with natural resources, but exploitation has been hampered by rugged terrain, land tenure issues, and the high cost of developing infrastructure. The economy has a small formal sector, focused mainly on the export of those natural resources, and an informal sector, employing the majority of the population. Agriculture provides a subsistence livelihood for 85% of the people. Mineral deposits, including copper, gold, and oil, account for nearly two-thirds of export earnings. Natural gas reserves amount to an estimated 227 billion cubic meters. A consortium led by a major American oil company is constructing a liquefied natural gas (LNG) production facility that could begin exporting in 2014. As the largest investment project in the country's history, it has the potential to double GDP in the near-term and triple Papua New Guinea's export revenue. An American-owned firm also opened PNG's first oil refinery in 2004 and is building a second LNG production facility. The government faces the challenge of ensuring transparency and accountability for revenues flowing from this and other large LNG projects. In 2011 and 2012, the National Parliament passed legislation that created an offshore Sovereign Wealth Fund (SWF) to manage government surpluses

from mineral, oil, and natural gas products. In recent years, the government has opened up markets in telecommunications and air transport, making both more affordable to the people. Numerous challenges still face the government of Peter O'NEILL, including providing physical security for foreign investors, regaining investor confidence, restoring integrity to state institutions, promoting economic efficiency by privatizing moribund state institutions, and maintaining good relations with Australia, its former colonial ruler. Other socio-cultural challenges could upend the economy including chronic law and order and land tenure issues. The global financial crisis had little impact because of continued foreign demand for PNG's commodities.

TRANSNATIONAL ISSUES

Disputes—International: relies on assistance from Australia to keep out illegal

cross-border activities from primarily Indonesia, including goods smuggling, illegal narcotics trafficking, and squatters and secessionists

Refugees and internally displaced persons:

refugees (country of origin): 10,177 (Indonesia) (2007)

Trafficking in persons: *current situation:* Papua New Guinea is a source, destination, and transit country for men, women, and children subjected to sex trafficking and forced labor; women and children are subjected to sex trafficking and domestic servitude; trafficked men are forced to labor in logging and mining camps; migrant women and teenage girls from Malaysia, Thailand, China, and the Philippines are subjected to sex trafficking; men from China are transported to the country for forced labor

tier rating: Tier 3—Papua New Guinea does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; despite the government's acknowledgement of trafficking as a problem in the country, the government did not investigate any suspected trafficking offenses, prosecute or convict any trafficking offenders under existing laws, address allegations of officials complicit in human trafficking crimes, or identify or assist any trafficking victims (2008)

Illicit drugs: major consumer of cannabis

PARACEL ISLANDS

INTRODUCTION

Background: The Paracel Islands are surrounded by productive fishing grounds and by potential oil and gas reserves. In 1932, French Indochina annexed the islands and set up a weather station on Pattle Island; maintenance was continued by its successor, Vietnam. China has occupied all the

Paracel Islands since 1974, when its troops seized a South Vietnamese garrison occupying the western islands. China built a military installation on Woody Island with an airfield and artificial harbor. The islands also are claimed by Taiwan and Vietnam.

PARAGUAY**INTRODUCTION**

Background: Paraguay achieved its independence from Spain in 1811. In the disastrous War of the Triple Alliance (1865–70)—between Paraguay and Argentina, Brazil, and Uruguay—Paraguay lost two-thirds of all adult males and much of its territory. The country stagnated economically for the next half century. Following the Chaco War of 1932–35 with Bolivia, Paraguay gained a large part of the Chaco lowland region. The 35-year military dictatorship of Alfredo STROESSNER ended in 1989, and, despite a marked increase in political infighting in recent years, Paraguay has held relatively free and regular presidential elections since then.

Flag description: three equal, horizontal bands of red (top), white, and blue with an emblem centered in the white band; unusual flag in that the emblem is different on each side; the obverse (hoist side at the left) bears the national coat of arms (a yellow five-pointed star within a green wreath capped by the words REPUBLICA DEL PARAGUAY, all within two circles); the reverse (hoist side at the right) bears a circular seal of the treasury (a yellow lion below a red Cap of Liberty and the words PAZ Y JUSTICIA (Peace and Justice)); red symbolizes bravery and patriotism, white represents integrity and peace, and blue

denotes liberty and generosity *note*: the three color bands resemble those on the flag of the Netherlands; one of only three national flags that differ on their obverse and reverse sides—the others are Moldova and Saudi Arabia

National symbol(s): lion

National anthem: *name*: “Paraguayos, Republica o muerte!” (Paraguayans, The Republic or Death!)

lyrics/music: Francisco Esteban ACUNA de Figueroa/disputed

note: adopted 1934, in use since 1846; the anthem was officially adopted following its re-arrangement in 1934

ECONOMY

Economy—overview: Landlocked Paraguay has a market economy distinguished by a large informal sector, featuring re-export of imported consumer goods to neighboring countries, as well as the activities of thousands of microenterprises and urban street vendors. A large percentage of the population, especially in rural areas, derives its living from agricultural activity, often on a subsistence basis. Because of the importance of the informal sector, accurate economic measures are difficult to obtain. On a per capita basis, real income has stagnated at 1980 levels. The economy grew rapidly between 2003 and 2008 as growing world demand for commodities combined with high prices and favorable weather to support Paraguay's commodity-based export expansion. Paraguay is the sixth largest soy producer in the world. Drought hit in 2008, reducing agricultural exports and slowing the economy even before the onset of the global recession. The economy fell 3.8% in 2009, as lower world demand and commodity prices caused exports to contract. The government reacted by introducing fiscal and monetary stimulus packages. Growth resumed at a 15% level in 2010, the highest in South America, but slowed to 6.4% in 2011 as the stimulus subsided. Political uncertainty, corruption, limited progress on structural reform, and deficient infrastructure are the main obstacles to growth.

TRANSNATIONAL ISSUES

Disputes—International: unruly region at convergence of Argentina-Brazil-Paraguay borders is locus of money laundering, smuggling, arms and illegal narcotics trafficking, and fundraising for extremist organizations

Illicit drugs: major illicit producer of cannabis, most or all of which is consumed in Brazil, Argentina, and Chile; transshipment country for Andean cocaine headed for Brazil, other Southern Cone markets, and Europe; weak border controls, extensive corruption and money-laundering activity, especially in the Tri-Border Area; weak anti-money-laundering laws and enforcement

PERU

INTRODUCTION

Background: Ancient Peru was the seat of several prominent Andean civilizations, most notably that of the Incas whose empire was captured by the Spanish

conquistadors in 1533. Peruvian independence was declared in 1821, and remaining Spanish forces were defeated in 1824. After a dozen years of military rule, Peru returned to democratic leadership in 1980, but experienced economic problems and the growth of a violent insurgency. President Alberto FUJIMORI's election in 1990 ushered in a decade that saw a dramatic turnaround in the economy and significant progress in curtailing guerrilla activity. Nevertheless, the president's increasing reliance on authoritarian measures and an economic slump in the late 1990s generated mounting dissatisfaction with his regime, which led to his ouster in 2000. A caretaker government oversaw new elections in the spring of 2001, which ushered in Alejandro TOLEDO Manrique as the new head of government—Peru's first democratically elected president of Native American ethnicity. The presidential election of 2006 saw the return of

Alan GARCIA Perez who, after a disappointing presidential term from 1985 to 1990, has overseen a robust macroeconomic performance. In June 2011, former army officer Ollanta HUMALA Tasso was elected president, defeating Keiko FUJIMORI Higuchi, the daughter of Alberto FUJIMORI. Since his election, HUMALA has carried on the sound, market-oriented economic policies of the three preceding administrations.

ECONOMY

Economy—overview: Peru's economy reflects its varied geography—an arid coastal region, the Andes further inland, and tropical lands bordering Colombia and Brazil. Important mineral resources are found in the mountainous and coastal areas, and Peru's coastal waters provide excellent fishing grounds. The Peruvian economy has been growing by an average of 6.4% per year since 2002 with a stable/slightly appreciating exchange rate and low inflation. Growth in 2010 was close

to 9% and in 2011 almost 7%, due partly to a leap in private investment, especially in the extractive sector, which accounts for more than 60% of Peru's total exports. At 3.4%, inflation in 2011 exceeded somewhat the upper range of the Central Bank's 1%-3% target. Despite Peru's strong macroeconomic performance, dependence on minerals and metals exports and imported foodstuffs subjects the economy to fluctuations in world prices. Poor infrastructure hinders the spread of growth to Peru's non-coastal areas. Peru's rapid expansion coupled with cash transfers and other programs have helped to reduce the national poverty rate by 23 percentage points since 2002. A growing number of Peruvians are sharing in the benefits of growth but inequality persists posing a challenge for the new Ollanta HUMALA administration, which has championed indigenous and local disenfranchised groups. The administration seems committed to Peru's free-trade path. Since 2006, Peru has signed trade deals with the US, Canada, Singapore, China, Korea, Mexico, and Japan, concluded negotiations with the European Free Trade Association and Chile, and begun trade talks with Central American countries and others. The US-Peru Trade Promotion Agreement entered into force 1 February 2009, opening the way to greater trade and investment between the two economies. Trade agreements with South Korea, Japan, and Mexico also were signed in 2011. Although Peru has continued to attract foreign investment, political disputes and protests may impede development

Disputes—international: Chile and Ecuador rejected Peru's November 2005 unilateral legislation to shift the axis of their joint treaty-defined maritime boundaries along the parallels of latitude to equidistance lines which favor Peru; organized illegal narcotics operations in Colombia have penetrated Peru's shared border; Peru rejects Bolivia's claim to restore maritime access through a sovereign corridor through Chile along the Peruvian border

Refugees and internally displaced persons: *IDPs:* 60,000–150,000 (civil war from 1980–2000; most IDPs are indigenous peasants in Andean and Amazonian regions) (2007)

Illicit drugs: until 1996 the world's largest coca leaf producer, Peru is now the world's second largest producer of coca leaf, though it lags far behind Colombia; cultivation of coca in Peru was estimated at 40,000 hectares in 2009, a slight decrease over 2008; second largest producer of cocaine, estimated at 225 metric tons of potential pure cocaine in 2009; finished cocaine is shipped out from Pacific ports to the international drug market; increasing amounts of base and finished cocaine, however, are being moved to Brazil, Chile, Argentina, and Bolivia for use in the Southern Cone or transshipment to Europe and Africa; increasing domestic drug consumption

PHILIPPINES

INTRODUCTION

Background: The Philippine Islands became a Spanish colony during the 16th century; they were ceded to the US in 1898 following the Spanish-American War. In 1935 the Philippines became a self-governing commonwealth. Manuel QUEZON was elected president and was tasked with preparing the country for independence after a 10-year transition. In 1942 the islands fell under Japanese occupation during World War II, and US forces and Filipinos fought together during 1944–45 to regain control. On 4 July 1946 the Republic of the Philippines attained its independence. A 20-year rule by Ferdinand MARCOS ended in 1986, when a “people power” movement in Manila (“EDSA 1”) forced him into exile and installed Corazon AQUINO as president. Her presidency was hampered by several coup attempts that prevented a return to full political stability and economic development. Fidel RAMOS was elected president in 1992. His administration was marked by increased stability and by progress on economic reforms. In 1992, the US

closed its last military bases on the islands. Joseph ESTRADA was elected president in 1998. He was succeeded by his vice-president, Gloria MACAPAGAL-ARROYO, in January 2001 after ESTRADA's stormy impeachment trial on corruption charges broke down and another “people power” movement (“EDSA 2”) demanded his resignation. MACAPAGAL-ARROYO was elected to a six-year term as president in May 2004. Her presidency was marred by several corruption allegations but the Philippine economy was one of the few to avoid contraction following the 2008 global financial crisis, expanding each year of her administration. Benigno AQUINO III was elected to a six-year term as president in May 2010. The Philippine Government faces threats from several groups, some of which are on the US Government's Foreign Terrorist Organization list. Manila has waged a decades-long struggle against ethnic Moro insurgencies in the southern Philippines, which has led to a peace accord with the Moro National Liberation Front and on-again/off-again peace talks with the Moro Islamic Liberation Front. The

decades-long Maoist-inspired New People's Army insurgency also operates through much of the country. The Philippines faces increased tension with China over disputed territorial claims in the South China Sea.

ECONOMY

Economy—overview: Philippine GDP grew 7.6% in 2010, spurred by consumer demand, a rebound in exports and investments, and election-related spending, before cooling to 3.7% in 2011. The economy weathered the 2008–09 global recession better than its regional peers due to minimal exposure to troubled international securities, lower dependence on exports, relatively resilient domestic consumption, large remittances from four- to five-million overseas Filipino workers, and a growing business process outsourcing industry. Economic growth in the Philippines averaged 4.5% during the MACAPAGAL-ARROYO administration (January 2001–June 2010). Despite this growth, however, poverty worsened during her presidency. The AQUINO administration is working to reduce the government deficit from 3.9% of GDP, when it took office, to 2% of GDP by 2013. The government has had little difficulty issuing debt, both locally and internationally, to finance the deficits. The AQUINO Administration reduced public debt to below 50% of GDP and obtained several ratings upgrades on sovereign debt so that the Philippines is now close to investment grade. However, the lack of government spending, especially on infrastructure, was one of several factors which slowed GDP growth in the second half of 2011, leading the government to announce a stimulus effort and increased public spending on infrastructure in 2012. AQUINO's first budget emphasized education, health, conditional cash transfers for the poor, and other social spending programs, relying mostly on the private sector to finance important infrastructure projects. Weak tax

collection, exacerbated by new tax breaks and incentives, has limited the government's ability to address major challenges. The AQUINO administration has vowed to focus on improving tax collection efficiency, rather than imposing new taxes, as a part of its good governance platform. The economy still faces several long-term challenges, including reliance on energy imports and foreign demand for

PITCAIRN ISLANDS

INTRODUCTION

Background: Pitcairn Island was discovered in 1767 by the British and settled in 1790 by the Bounty mutineers and their Tahitian companions. Pitcairn was the first Pacific island to become a British colony (in 1838) and today remains the last vestige of that empire in the South Pacific. Outmigration, primarily to New Zealand, has thinned the population from a peak of 233 in 1937 to less than 50 today.

GEOGRAPHY

Location: Oceania, islands in the South Pacific Ocean, about midway between Peru and New Zealand

ECONOMY

Economy—overview: The inhabitants of this tiny isolated economy exist on fishing, subsistence farming, handicrafts, and postage stamps. The fertile soil of the valleys produces a wide variety of fruits and vegetables, including citrus, sugarcane, watermelons, bananas, yams, and beans. Bartering is an important part of the economy. The major sources of revenue are the sale of postage stamps to collectors and the sale of handicrafts to passing ships.

POLAND

INTRODUCTION

Background: Poland's history as a state begins near the middle of the 10th century. By the mid-16th century, the Polish-Lithuanian Commonwealth ruled a vast tract of land in central and eastern Europe. During the 18th century, internal disorders weakened the nation, and in a series of agreements between 1772 and 1795, Russia, Prussia, and Austria partitioned Poland among themselves. Poland regained its independence in 1918 only to be overrun by Germany and the Soviet Union in World War II. It became a Soviet satellite state following the war, but its government

was comparatively tolerant and progressive. Labor turmoil in 1980 led to the formation of the independent trade union "Solidarity" that over time became a political force with over ten million members. Free elections in 1989 and 1990 won Solidarity control of the parliament and the presidency, bringing the Communist era to a close. A "shock therapy" program during the early 1990s enabled the country to transform its economy into one of the most robust in Central Europe. Poland joined NATO in 1999 and the European Union in 2004. With its transformation to a democratic, market-oriented country largely completed, Poland is an increasingly active member of Euro-Atlantic organizations.

GEOGRAPHY

total: 11.73 cu km/yr (13%/79%/8%)

per capita: 304 cu m/yr (2002)

Natural hazards: flooding

Environment—current issues: situation has improved since 1989 due to decline in heavy industry and increased environmental

concern by post-Communist governments; air pollution nonetheless remains serious because of sulfur dioxide emissions from coal-fired power plants, and the resulting acid rain has caused forest damage; water pollution from industrial and municipal sources is also a problem, as is disposal of hazardous wastes; pollution levels should continue to decrease as industrial establishments bring their facilities up to EU code, but at substantial cost to business and the government

Environment—international agreements:

party to: Air Pollution, Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Kyoto Protocol, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Wetlands

signed, but not ratified: Air Pollution-Nitrogen Oxides, Air Pollution-Persistent Organic Pollutants, Air Pollution-Sulfur 94

Geography—note: historically, an area of conflict because of flat terrain and the lack of natural barriers on the North European Plain

Flag description: two equal horizontal bands of white (top) and red; colors derive from the Polish emblem—a white eagle on a red field **note:** similar to the flags of Indonesia and Monaco which are red (top) and white

National symbol(s): white eagle

National anthem: name: "Mazurek

Dąbrowskiego" (Dąbrowski's Mazurka)

lyrics/music: Józef WYBICKI/traditional

note: adopted 1927; the anthem, commonly known as "Jeszcze Polska nie zginieła" (Poland Has Not Yet Perished), was written in 1797; the lyrics resonate strongly with Poles because they reflect the numerous occasions in which the nation's lands have been occupied

ECONOMY

Economy—overview: Poland has pursued a policy of economic liberalization since 1990 and today stands out as a success story among transition economies. It is the only country in the European Union to avoid a recession through the 2008-09 economic downturn, although GDP per capita is still much below the EU average. Since 2004, EU membership and access to EU structural funds have provided a major boost to the economy. Unemployment has been 2% more than the EU average. Inflation reached a low of about 2.6% in 2010 due to the global economic slowdown, but climbed to 4.3% in 2011. Poland's economic performance could improve over the longer term if the country addresses some of the remaining deficiencies in its road and rail infrastructure and its business environment. An inefficient commercial court system, a rigid labor code, bureaucratic red tape, burdensome tax system, and persistent low-level

corruption keep the private sector from performing up to its full potential. Weak revenues, together with rising demands to fund healthcare, education, and the state pension system caused the public sector budget deficit to rise to 7.8% of GDP in 2010, but the PO/PSL coalition government, which came to power in November 2007, took measures to shore up public finances—including increasing contributions to the public pension scheme at the expense of private pension funds—and reduced the deficit to 2.9% of GDP in 2011. For 2012 the coalition government has proposed further deficit-reducing reforms and to fulfill its promise to enact business-friendly reforms.

TRANSNATIONAL ISSUES

Disputes—International: as a member state that forms part of the EU's external border, Poland has implemented the strict Schengen border rules to restrict illegal immigration and trade along its eastern borders with Belarus and Ukraine

Illicit drugs: despite diligent counter-narcotics measures and international information sharing on cross-border crimes, a major illicit producer of synthetic drugs for the international market; minor transshipment point for Southwest Asian heroin and Latin American cocaine to Western Europe

PORTUGAL

INTRODUCTION

Background: Following its heyday as a global maritime power during the 15th and 16th centuries, Portugal lost much of its

wealth and status with the destruction of Lisbon in a 1755 earthquake, occupation during the Napoleonic Wars, and the independence of its wealthiest colony of Brazil in 1822. A 1910 revolution deposed the monarchy; for most of the next six decades, repressive governments ran the country. In 1974, a left-wing military coup installed broad democratic reforms. The following year, Portugal granted independence to all of its African colonies. Portugal is a founding member of NATO and entered the EC (now the EU) in 1986. In January 2011, Portugal assumed a nonpermanent seat on the UN Security Council for the 2011–12 term.

consulate(s): Ponta Delgada (Azores)

Flag description: two vertical bands of green (hoist side, two-fifths) and red (three-fifths) with the national coat of arms (armillary sphere and Portuguese shield) centered on the dividing line; explanations for the color meanings are ambiguous, but a popular interpretation has green symbolizing hope and red the blood of those defending the nation

National symbol(s):

armillary sphere (a spherical astrolabe modeling objects in the sky)

National anthem: name: "A Portuguesa" (The Song of the Portuguese)

lyrics/music: Henrique LOPES DE MENDOÇA/Alfredo KEIL

note: adopted 1910; "A Portuguesa" was originally written to protest the Portuguese monarchy's acquiescence to the 1890 British ultimatum forcing Portugal to give up areas of Africa; the lyrics refer to the "insult" that resulted from the event

ECONOMY

Economy—overview:

Portugal has become a diversified and increasingly service-based economy since joining the European Community—the EU's predecessor—in 1986. Over the past two decades, successive governments have privatized many state-controlled firms and liberalized key areas of the economy, including the financial and telecommunications sectors. The country qualified for the Economic and Monetary Union (EMU) in 1998 and began circulating the euro on 1 January 2002 along with 11 other EU members. The economy had grown by more than the EU average for much of the 1990s, but fell back in 2001–08, and contracted 2.5% in 2009, before growing 1.3% in 2010. But GDP fell again in 2011, as the government implemented austerity measures, including a 5% public salary cut, a 2% increase in the value-added tax, and an extraordinary tax on year-end bonuses to comply with conditions of an EU-IMF financial rescue package agreed to in May 2011. GDP per capita stands at roughly two-thirds of the EU-27 average. A rigid labor market has been an obstacle to greater productivity and growth. Portugal also has been increasingly overshadowed by lower-cost producers in Central Europe and Asia as a destination for foreign direct investment. Portugal's low competitiveness, low growth prospects, and high levels of public debt have made it vulnerable to bond market turbulence. The government reduced the budget deficit from 10.1% of GDP in 2009 to 4.5% in 2011, an achievement made possible only by the extraordinary revenues obtained from the one-time transfer of bank pension funds to the social security system. Investors, however, continue to express concern about the government's ability to achieve future budget deficit targets and obtain foreign financing to cover its sovereign debt obligations when the EU-IMF financing program expires in 2013. Without the option for stimulus measures, the government is focusing instead on boosting exports and implementing labor market and other structural reforms to try to

INTRODUCTION

Background: Populated for centuries by aboriginal peoples, the island was claimed by the Spanish Crown in 1493 following Christopher COLUMBUS' second voyage to the Americas. In 1898, after 400 years of colonial rule that saw the indigenous population nearly exterminated and African slave labor introduced, Puerto Rico was ceded to the US as a result of the Spanish-American War. Puerto Ricans were granted US citizenship in 1917. Popularly-elected governors have served since 1948. In 1952, a constitution was enacted providing for internal self government. In plebiscites held in 1967, 1993, and 1998, voters chose not to alter the existing political status with the US.

National anthem: name: “La Borinquena” (The Puerto Rican)

lyrics/music: Manuel Fernandez JUNCOS/Felix Astol ARTES

note: music adopted 1952, lyrics adopted 1977; the local anthem's name is a reference to the indigenous name of the island, Borinquen; the music was originally composed as a dance in 1867 and gained popularity

in the early 20th century; there is some evidence that the music was written by Francisco RAMIREZ; as a commonwealth of the United States, "The Star-Spangled Banner" is official (see United States)

ECONOMY

Economy—overview: Puerto Rico has one of the most dynamic economies in the Caribbean region, however, growth has been negative for the past four years, and unemployment has risen to nearly 16% in 2011. The industrial sector has surpassed agriculture as the primary locus of economic activity and income. Mainland US firms have invested heavily in Puerto Rico since the 1950s. US minimum wage laws apply. Sugar production has lost out to dairy production and other livestock products as the main source of income in the agricultural sector. Tourism has traditionally been an important source of income with estimated arrivals of more than 3.6 million tourists in 2008. Closing the budget deficit while restoring economic growth and employment remain the central concerns of the government.
